

To Measure a Room for Wall Paper.

To determine the number of rolls of paper to cover the walls of a room, measure the circumference, from which deduct the width of doors and windows, and divide the remainder by 3.

Example—Let us suppose a room 12x16 feet, which has two doors and windows which average 4 feet wide:

12x12x16x16=56, circumference.	56
4x1=16, doors and windows.	16
	—
	340
	—
	13 1/3, or say 14 rolls.

This rule is calculated for a room of not less than 10 nor more than 12 feet in height. For a room under 10 feet high, having a freize, say of 6 inches, we will proceed as before with the measurement of the room, deducting the width of doors and windows. But in this case multiply the remainder by 2 and divide by 15; for this reason, that we can cut 5 lengths out of a double roll, which, placed side by side on the wall, cover a space 7 feet 6 inches from the ceiling, and instead of multiplying by 7 feet 6 inches, we multiply both by 2.

Example—Take a room 14x14, with two doors and windows:

Circumference of room	56
Less for doors and windows	12
	—
	44
	—
	2
	—
	15.88
	—
	5 13-15

Say 6 double rolls, or 12 pieces. Of course if a dado is required its width will determine how much paper will have to be deducted.—Carpet and Upholstery Review.

SUNNYSIDE SAMPLES.

A meeting of the voters of district No. 38 was held at the house of J. W. McGinnis, one and a half miles east of Sunnyside, on the 10th to decide upon a location for the new schoolhouse for this district.

Sunnyside presents an animated appearance. The streets are being graded, the water system put in, and active building operations are under way all around the business section. Last week E. V. Smalley, of the Northwest Magazine, St. Paul, Minn., visited Sunnyside. Mr. Smalley was astonished at the remarkable growth of our three weeks' old town, and in company with D. R. McGinnis made a trip over the well irrigated lands thereabout, and particularly to section 29, township 10, range 23, one and a half miles east of the town, which is now divided among twenty-one owners and is the best developed section around Sunnyside.

Mr. C. Wiltschko, of North Dakota, has been examining the fruit orchards and hop yards with a view of establishing a colony near Sunnyside. This he has decided to do, and in conversation with your correspondent said: "These orchards are an eye-opener to a North Dakota man. If eastern people only knew that this country is what it is there would not be an acre of land left unsettled here within a week."

Albert Wright has just completed a

building upon lot 22, block 31. Mr. Wright will live in Sunnyside and farm twenty acres of very choice land which he owns adjoining the town. This land will be planted to fruits of various kinds.

Fisk & Allen are preparing plans for erecting a two story building at the corner of Mayhew and Tacoma avenues.

Nathan Morris has about completed his wagon repair shop on lots 1 and 2, block 42. Mr. Morris is also preparing plans for a residence to be built on the same property.

C. D. Gillis has bought acre lots Nos 3 and 4, block R, upon which to build a residence.

P. C. Bacon, of Illinois, has bought twenty acres of land in section 31, township 10, range 23, and returned in haste for his family.

Over 50,000 fruit trees have been sold up to date to farmers within three miles of Sunnyside. *

A 100, 50, 20 or 10 cents. Half as many names of your friends. We send each a copy of *The Ranch* and pay postage.
