Professional Notices.

ARTIFICIAL EYES.—This Day received, the largest and most beautiful collection of ARTIFICIAL EYES ever imported. They resemble the natural eye exactly in color and expression, and will move and look precisely like it, and can be inserted and removed at pleasure without the slightest pain or operation. The Profession supplied on liberal terms. JAMES W. POWELL, Oculist and Aurist, No. 562 Broadway.

DR. C. D. GRISWOLD, No. 66 White-st., will devote the hours from 9 to 12 A. M. and from 7 to 10 evening to office patients. Office prescriptions, in all cases, $100.

IMPROVED ARTIFICIAL TEETH.—Dr. J. ALLEN, late Professor in the Ohio College of Dental Surgery, invites attention to his improved method of constructing ARTIFICIAL DENTURES, which combines the following advantages:

1st. There are no seams or crevices for the lodgement of food, to vitiate the saliva, or infect the breath, so not even the slightest moisture can get between the teeth and plate.

2d. An Artificial Gum, which is as firm and indestructible as the teeth, is fused at a high heat, between and around their base, which unites them firmly to each other and to the plate upon which they are set. This gum imparts to the teeth that peculiar expression and life-like appearance which characterizes the natural organs.

3d. Great strength is obtained by thus uniting the Teeth, Gum and Plate, and no ordinary force in masticating can break them from their base.

4th. A clear and distinct articulation of speech is restored. This important change is effected by having the inside of the teeth and gum of a natural form. To this form the tongue is readily adapted. This perfect adaptation of the tongue to the denture prevents the hissing or muffled sounds in speaking or singing so often observed in persons wearing artificial teeth.

5th. The natural form and expression of the mouth and face can be restored, in cases where they have become sunken. This is done by means of additional attachments to the framework supporting the teeth. These attachments are so formed as to bring out the sunken portions, and sustain them in their proper position. They are covered with the above named gum-compound, and become component parts of the denture, and when rightly formed cannot be detected by the closest observer. This method of restoring the cheeks to their original fullness, and also the natural form and expression of the mouth and lips, has been well tested, having been made a special feature in the authors practice for several years past. A variety of Photographs and Daguerreotype likenesses, which have been taken of persons wearing this improvement, and also while it can be seen at his office, showing the great change in appearance which is produced in the counte-nance of individuals now wearing dentures constructed upon this principle, which the public are invited to call and examine, together with other specimens of his improved style of work, not requiring the above attachments.

6th. The plates usually employed for this work are platina, the purity of which prevents even the slightest tarnish, or unpleasant taste in the mouth. In short, this system embraces every real and important feature, which are readily appreciated by those wearing artificial dentures upon this principle. With reference to the utility of this method, numerous testimonials can be given from eminent Dentists in the various cities of the Union, and persons wearing the work in this and other cities. J. ALLEN, No. 20 Bond-st., N. Y.

CASH paid for all kinds of DOMESTIC RAGS, CANVAS, BAGGING, and ROPE, by CYRUS W. FIELD & Co., No. 276 Water-st.

COBURN'S EXTRA OIL for MACHINERY and BURNING.—This is a simple and not a compound OIL, being entirely free from Resin, Turpentine, India Rubber, or any other mixture. It is very uniform in quality, so that purchasers will not get a good Oil to-day and a poor Oil to-morrow. It is pure, and burns in fine mechanical lamps as well as in small tube night-lamps which are good tests of pure Oil. For machinery it is unsurpassed by any other except purest Sperm, (which is not often found.) It will not gum machinery—and prevents machinery from heating. It is durable, and has taken the place of sperm in some large establishments, as it answers every purpose, and costs less. This is not a new Oil, or an experiment, but has been sold to Railroads, Steamships, Factories, Machine Shops, as well as to Grocers and Dealers, for the past eight years, and commends itself particularly to Railroads and other large consumers who wish an Oil they can safely substitute for Sperm, and at much less price; and it will give them, as it does give others, entire satisfaction. Parrels 30 to 40 gallons each. This Oil is not to be had of any other Dealer in this city. The only Agent being JOHN W. QUINCY No. 81 John-st.

GOLD LEAF and DENTISTS' GOLD FOIL, at the very lowest cash prices. Gold Foil $25 per oz., at the Factory, No. 112 Franklin-st. J. L. WAUGH.
