All persons are cautioned against purchasing it as it has never been sold or assigned by me. DANIEL WHITNEY.

THE AUBIN PORTABLE GAS WORKS are now admitted to be the best known, whether for private consumers or villages, because of their simplicity of construction and operation, their freedom from smell, and their unequaled economy; they do not require mechanical skill or constant attendance; they will work night and day if required—never clog the pipes, and cannot explode; they generate gas from any material containing it. These great advantages, in connection with the fact that with a working plan any experienced worker in metal can set up the works, make rights under our patents safe and profitable investment. Parties in search of business will do well to investigate. If they do, they will buy. We refer to our works in operation on the Island near Newburgh, the Delavan House, Albany, and in many other places. In a few weeks they will be in use for several villages now in negotiation. For further information apply to N. AUBIN, No. 359 Broadway, New-York; or H. Q. HAWLEY & Co., Albany.

Real Estate for Sale.

FARM LANDS for SALE.—The ILLINOIS CENTRAL RAILROAD COMPANY is now prepared to sell over

TWO MILLION OF ACRES of FARMING LANDS, IN TRACTS OF FORTY ACRES AND UPWARD, ON LONG CREDITS And at LOW RATES OF INTEREST.

These Lands were granted by the Government to aid in the construction of this Railroad, and include some of the richest and most fertile Prairies in the State, interspersed here and there with magnificent groves of oak and other timber. The Road extends from Chicago on the north east to Cairo at the south, and from thence to Galena and Dunleith, in the northwest extreme of the State; and as all the lands lie within fifteen miles on each side of this Road, ready and cheap means are afforded by it for transporting the products of the lands to any of these points, and from thence to Eastern and Southern markets. Moreover, the rapid growth of flourishing towns and villages along the line, and the great increase in population by immigration, &c., afford a substantial and growing home demand for farm produce.

The soil is a dark, rich mold, from one to five feet in depth, is gently rolling, and peculiarly fitted for grazing Cattle and Sheep or the cultivation of Wheat, Indian Corn, &c.

Economy in cultivating and great productiveness are the well known characteristics of Illinois lands. These are not required to be cut down, stumps grubbed, or stone picked off as is generally the case in cultivating new land in the older States. The first crop of Indian Corn, planted on the newly broken sod, usually repays the cost of plowing and fencing.

Wheat sown on the newly turned sod is sure to yield very large profits. A man with a plow and two yoke of oxen will break one and a half to two acres per day. Contracts can be made for breaking ready for Corn or Wheat, at from $2 to $2 50 per acre. By judicious management the land may be plowed and fenced the first, and under a high state of cultivation the second year.

Corn, Grain, Cattle, &c., will be forwarded at reasonable rates to Chicago for the Eastern market and to Cairo for the Southern. The largest yields on the cheap lands of Illinois over the high-priced land in the Eastern and Middle States is known to be much more than sufficient to pay the difference of transportation to the Eastern market.

Bituminous Coal is mined at several points along the Road, and is a cheap and desirable fuel. It can be delivered at several points along the Road at $1 50 to $2 per ton. Wood can be had at the same rates per cord.

Those who think of settling in Iowa or Minnesota, should bear in mind that lands of any value, along the water-courses and for many miles inland, have been disposed of; that for those located in the interior there are no conveniences for transporting the produce to markets, railroads not having been introduced there; that to send the produce of those lands one or two hundred miles by wagon to market would cost much more than the expense of cultivating them, and hence Government lands thus situated, at $1 25 per acre, are not so good investments as the land of this Company at the prices fixed.

The same remarks hold good in relation to the lands in Kansas and Nebraska, for although vacant lands may be found nearer the water courses, the distance to market is far greater, and every hundred miles the produce of these lands is carried either in wagons, or interrupted water communications, adds the expenses of transportation, which must be borne by the settlers, in the reduced prices of their products; and to that extent precisely are the incomes from their farms, and of course on their investments, annually and every year reduced.

The great fertility of the lands now offered for sale by this Company, and their consequent yield over those of the Eastern and Middle States, is much more than sufficient to pay the difference in the cost of transportation, especially in view of the facilities furnished by this Road, and others with which it connects, the operators of which are not interrupted by the low water of Summer or the frost of Winter.

PRICE AND TERMS OF PAYMENT.

The price will vary from $5 to $25, according to location, quality, &c. Contracts for Deeds may be made during the year 1856, stipulating the purchase money to be paid in five annual installments—the first to become due in two years from the date of contract, and the others annually thereafter. The last payment will become due at the end of the sixth year from the date of the contract.

INTEREST WILL BE CHARGED AT ONLY THREE PER CENT PER ANNUM.

As a security to the performance of the contract, the first two years' interest must be paid in advance, and it must be understood that at least one-tenth of the land purchased shall yearly be brought under cultivation. Longer credits, at six per cent per annum, may be negotiated by special application. Twenty per cent from the credit price will be deducted for cash. The Company's construction bonds will be received as cash.

Ready framed Farm Buildings, which can be set up in a few days, can be obtained from responsible persons.

They will be 12 feet by 20 feet, divided into one living and three bedrooms, and will cost complete, set up on ground chosen any where along the road, $300 in cash, exclusive of transportation. Larger buildings may be contracted for at proportionate rates. The Company will forward all the materials for such buildings over their road promptly.

Special arrangements with dealers can be made to supply those purchasing the Company's lands with fencing materials, agricultural tools, and outfit of provisions to any quantity, at the lowest wholesale prices.

It is believed that the price, long credit, and low rate of interest charged for these lands, will enable a man with a few hundred dollars in cash and ordinary industry to make himself independent before all the purchase money becomes due. In the mean time, the rapid settlement of the country will probably have increased their value four or five fold. When required, an experienced person will accompany applicants to give information and aid in selecting lands.

Circulars, containing numerous instances of successful farming, signed by respectable and well-known farmers living in the neighborhood of the Railroad lands throughout the State—also, the cost of fencing, price of cattle, expense of harvesting, threshing, etc., by contract—or any other information—will be cheerfully given, on application, either personally or by letter, in English, French or German, addressed to JOHN WILSON, Land Commissioner of the Illinois Central Railroad Co., No. 52 Michigan-av., Chicago, Illinois.
