New York Stock Market

New York, May 2.—The undertone of speculative sentiment to-day remained depressed and discouraged, notwithstanding an apparent lightening of the active pressure of liquidation and signs of hesitation on the part of the shorts about pursuing the downward course of prices with further sales. The bears, on account of this feeling, were inclined to cover their shorts at frequent intervals, to establish a fresh vantage point from which to attack prices. Hence the recurrent checks to the decline and intermittent rallies. This covering demand from the shorts, however, constituted about the only apparent demand for stocks, and there was nothing like an aggressive stand against the crumbling process by attempts to support prices and turn the market against the bears. With the market left in this unprotected state, the bear party renewed its courage from time to time and returned to the attack. As prices were forced lower under this process, selling was forced by the wiped-out margins and uncovering of stop loss orders.

Expressions on the part of bankers of the inopportune money market position for entering on any speculative campaign in stocks discouraged operators in that side of the market. These expressions of bankers seemed to be unaffected by the passage of some of the most urgent requirements on the money market. Cotton payments in fulfilment of the three-day notices sent out to purchasers on Friday were made on a large scale, and the regular May interest and dividend payments were somewhat larger than usual.

It is expected that the completion of these settlements will be followed by the return of funds thus released to the money market. Foreign money markets, also, are affected by the passing of the monthly settlements. The Bank of England reserve was further replenished by more arrivals of American gold, but the holiday on the London Stock Exchange left no medium for speculative appraisement of that development. The foreign exchange rate here declined further, widening the margin away from the profit on gold exports.

It was on the industrial and commercial side that the speculation had encountered its most depressing influences. These were most acute in the metal group of industrials, especially the coppers. Amalgamated Copper broke through the lowest prices touched during the whole year of 1909. Unsatisfactory demand and accumulating stocks gave force to the rumors of an intended sharp cut in prices of copper in some such spasmodic fashion as iron and steel prices were readjusted more than a year ago. April exports of copper were shown to have fallen off comparatively without affecting any reduction in the reported visible supply in London. The related dullness in the iron market and its apparent spread to different departments of the steel trade widenended the inferences drawn from this condition.

The speculative temper was inclined to make something of a number of Supreme Court decisions in minor cases as marking a uniform tenor against the corporation contentions.

Such comfort as was offered by crop advices seemed to be accepted with some reluctance. The early decline of wheat on reports of rains in the Southwest, with the subsequent recovery and renewal of fears of damage, fairly measured the influence of the subject on the stock market.

It was commented upon that Pennsylvania suffered no more than the average decline, although the directors refrained from advancing the dividend rate. Returns of March net earnings showed the Eastern trunk lines rather better off in the proportion of gross increases conserved for the net, than in the case of lines in some other parts of the country. Inspired intimations were given out of coming increases in rates on the part of the Eastern railroads in consonance with the increases by Western trunk lines.

Bonds were easy. Total sales, par value, $2,318,000. United States bonds were unchanged on call.

Total sales of stocks for the day were 1,080,600 shares.

New York, May 2.—Money on call strong, 3 1-2@6 per cent.; ruling rate, 6; closing bid, 4 1-4; offered at 4 1-2. Time loans dull and firm; sixty days and ninety days, 4 1-4@4 1-2 per cent.; six months, 4 1-4@4 1-2. Prime mercantile paper, 4 3-4@5 per cent. Sterling exchange steady — the decline, with actual business in bankers' bills at $4.8125@$4.8450 for sixty-day bills, and at $4.8750 for demand. Commercial bills, $4.83 3-4@$4.84 1-4. Bar silver, 54 1-4. Mexican dollars, 44.

COTTON MARKETS.

New York, May 2.—The cotton market was very nervous to-day with fluctuations irregular and the close steady, net 3 points lower to 5 points higher. The opening was steady at a decline of 2 points to an advance of 3 points, near months being lower under disappointing cables, while later positions showed the influence of less favorable weather reports. Trading was not general and the whole list firmed up after the opening on New Orleans bull support of the old crop positions, while the new crop advanced on covering of shorts and rather a better demand through commission houses, attributed to fears of lower temperatures in the Southwest, complaints of dry weather from the Gulf States and private advices from various sections of the South indicating greater damage from the recent storm. Shorts covering caused an advance of 1@5 points, and it looked as though apprehensions of labor troubles in Lancashire were restricting fresh purchases for the time being. At any rate moderate realizing and local bear pressure sent prices off to a shade under the close figures of Saturday for the old crop months, and the new crop lost most of its early advance, but later stiffened up a little on covering and a report from a local authority indicating an increase of only 2.9 per cent. in acreage. Private cables state that mill operatives in Lancashire have refused to accept the proposed reduction in wages, but local authorities state their advices lead them to believe that these reductions will not be immediately insisted upon by the spinners. According to the official report 173,000 bales were delivered on contract in New York to-day. It is reported that freight room has been engaged for 15,000 bales to Liverpool and 2,000 to France. Southern spot markets generally unchanged.

Receipts at the ports to-day 8,357 bales against 8,219 last week and 11,187 last year. For the week 70,000 bales against 68,166 last week and 115,096 last year. To-day's receipts at New Orleans 1,293 bales against 3,328 last year.

Cotton futures opened and closed steady:

September and January opening are bid figures.

Spot cotton closed quiet; middling uplands, 15.26; middling gulf, 15.50; sales, 173,900 bales.

Cotton, quiet; middling, 15.25; sales, 173,900 bales; stock, 242,856 bales.

Total to-day at all ports—Net receipts, 8,357 bales; export to Great Britain, 5,000 bales; to the Continent, 1,118 bales; stock, 530,506 bales.

Consolidated at all ports—Net receipts, 15,146 bales; export to Great Britain, 12,674 bales; to France, 4,216 bales; to the Continent, 1,693 bales.

Total since September 1 at all ports—Net receipts, 6,769,483 bales; export to Great Britain, 2,095,882 bales; to France, 833,515 bales; to the Continent, 2,317,390 bales; to Japan, 78,974 bales; to Mexico, 13,819 bales.

New Orleans, La., May 2.—Cotton—Spot cotton quiet and unchanged. Sales on the spot 125 bales and 200 to arrive. Cotton futures opened quiet, 1 point off to 3 points up. Cables were better than expected and the weather forecast for cold weather caused considerable nervousness among shorts, with the result that soon after the call October stood 5 points above Saturday's closing. July opened 1 point down, but reacted and advanced a couple of points over Saturday's last quotation. The market had little life, and bulls evinced no disposition to force things, with the result that at the end of the first half hour of trading October was 5 points and July was 3 points down from the top. Additional strength was given the market by reports from both Texas and Alabama that the drought was getting serious. July and October went 7 points over Saturday's closing, and December went 9 points over. There was no life in the trading, however, and toward noon the downward trend of prices in the stock market began to have an effect. At noon the old crop months were 1 point down and the new crops were 4@6 points up compared with Saturday's last quotations. Many cablegrams were received from Liverpool and Manchester stating that the meeting between master spinners and operatives had adjourned with no definite action being taken on the question of wage reduction. The uncertainty in this quarter was against the market. In the afternoon session little business was done, and prices barely moved. At 2 o'clock the July position was unchanged, while the new crop months were 3 points up compared with Saturday's closing. Ring leaders were doing nearly all of the trading. The close was steady at a decline of 6@10 points on the old crop months and unchanged to 1 up on the new. Futures closed steady. Closing bids: May, 14.43 flat; June, 14.51; July, 14.61; August, 14.02; September, 13.11; October, 12.67; December, 12.56; January, 12.57.

CHICAGO GRAIN MARKET.

Chicago, Ill., May 2.—Predictions of freezing temperatures for to-night formed part of an array of influence that nearly neutralized the day in the wheat pit under the bearish effect of general rain in the West and Southwest. An unexpected large decrease in the visible supply was coupled with a private estimate that total winter wheat yield will be less than 400,000,000 bushels as against 445,366,000 bushels, according to official figures last year. The market closed steady, but ¼@½c. to ½c. net lower than Saturday. Corn finished ¼c. to 1⅛@1¼c. up; oats, ¼c. lower to ⅝@½c. higher, and provisions off 2½@10c.

MISCELLANEOUS MARKETS.

DRY GOODS MARKET.

New York, May 2.—The dry goods market for cotton goods was steadier during the day with a broader inquiry and slightly more active buying noted. The actuon sale of $4,000,000 worth of rugs and carpets opened most successfully, the goods being taken rapidly and prices ranging relatively higher than any recent sale of the kind in the market. Dress goods are quiet; raw silk is easy. The jobbing trade is light and confined to small lots for immediate consumption.
