A. P. DOREMUS Supt.

TELEGRAPHIC

CRIMINAL CALENDAR.

How the Wicked Ones are Behaving.

Des Moines, 22.—A young man named Patrick King was shot through the stomach to-night as he was escorting two young women home. Several girls and a man named Wallace are arrested. Wallace confesses the deed. It is doubtful if King can recover.

New York, 22.—At 4 o'clock this morning five thieves boarded a Third Avenue Railroad car on the Bowery, near Spruce street, and first robbed Parker, the driver. When the conductor came to the forward platform to collect their fare they rushed into the car, and drawing revolvers, robbed several passengers of watches and money. One passenger was lifted bodily out of the car and knocked down and kicked in the street.

Chicago, 23.—Chinese residents, last night, got into a riot caused by efforts of Ah Kung to stab and club some of his friends. Some dozen of them were run in, and the whole Celestial population turned out and surrounded the station, bearing to their brethren confined within boxes of matches, papers of tobacco, pipes, cigars, cigarettes, plates of rice, candies, tom toms, chop sticks and little brass joss. No one was seriously hurt.

Deadwood, 23.—The jury, in the case of ex-Postmaster R. O. Adams, charged with the embezzlement of nearly $12,000 brought in a verdict of guilty. Adams will probably give bail and appeal the case to the territorial supreme court.

Kansas City, 23.—James Thorpe, a workman in the machine shops, shot and killed Alfred Perry, a negro, yesterday, for attempting to throw stones during an altercation with him yesterday. He was arrested.

VanBultze Brothers on Saturday night, shot and killed Henry Stock, at Pleasant Hill. On Saturday evening Stock had ordered them out of his store, and began filing at them. They have the sympathy of citizens.

Burlingame, Ks., 23.—Thomas Smith and Wesley Thomas, negroes, quarreled, last night, in front of Baker's saloon, and Smith sent a pistol ball through Thomas' lungs. The second shot fired by Smith passed through the window of the saloon and struck Baker in the breast. Thomas died in a few minutes and Baker is mortally wounded. Cause, Smith was too intimate with Thomas' wife.

Chicago, 23.—Dr. Cream and Hattie Mack were held, without bail, for the murder of a young woman, Mary Faulkner, by abortion. They left her body in a deserted house and the stench of decomposition was the first intimation of the whereabouts of the body. Each party accuses the other of the crime.

The Congressional Representation.

New York, 23.—*World's* Washington, speaking of congressional representation under the new congress, gives the following as the probable result: The effect would be, with reference to New York, as reported by the enumerators, to lessen the number of representatives from thirty-five to thirty-three. Pennsylvania would drop from twenty-seven to twenty-six; Ohio would lose one, making her representation nineteen; Maine, New Hampshire and Vermont each one, and Indiana, Alabama and Tennessee each one, a total loss of ten. Minnesota and Nebraska would each gain two, Kansas three, Texas four, and Michigan, Missouri, Kentucky, Virginia, West Virginia and California each one, a total gain of seventeen. Other states would neither gain nor lose. Placing the gains in Minnesota, Nebraska, Kansas, Michigan and California, in all nine, against the losses of New York, Pennsylvania, Ohio, Maine, New Hampshire, Vermont and Indiana, in all eight, it would leave for the north and west a net gain of one. Placing the gains of Texas, Missouri, Kentucky, Virginia and West Virginia, in all eight, against the losses of Alabama and Tennessee, each one, it would leave the south a net gain of six, and give the House 300 members. Carrying this comparison to cover the present political status of the states named, and omitting New York and Indiana as doubtful, the states ordinarily classed as republican would have a net gain of four, and those classed as democrats a net gain of six. This might not mean an increase in the democratic majority, for so far from that, that majority might be wiped out in spite of this showing, but it would mean simply that the states now considered democratic would gain two more members than those now considered republican.

The *Herald* has a long article going to show that the new census demonstrates that the great south is passing out of existence as a political factor according to its figures. The following states will lose in congressional representation: Alabama, one; Florida, one; Georgia, one; Louisiana, one; North Carolina, one; South Carolina, one; Tennessee, one; Maine, one; New Hampshire, one; Vermont, one; New York, three; Pennsylvania, two; Ohio, two; Indiana, one. The following will gain: Missouri, one; Texas, three; Michigan, one; Iowa, two; Wisconsin, one; Minnesota, two; Nebraska, one; Kansas, three; California, two; Oregon, one. The facts and figures given to uphold this statement seem to be much more authentic than those given by the *World*.

The Standard Dollars.

Chicago, 23.—*Inter-Ocean's* Washington: To-day the treasury department will issue revision of the mint regulations. The effect of the proposed changes will enable the superintendents of the mint as soon as they have received notice from an assistant treasurer that a certificate of deposit for standard dollars has been received, to at once ship the dollars. Under the present arrangement the United States treasury must first receive a certificate and then instruct the superintendent of a mint to forward the dollars. This caused great delay amounting to over a week, on an order from New Orleans, and in cases where the cart wheel dollar is wanted in the far west more time still. Orders come in now at the rate of about 300,000 per week, but the trouble is they do not stay out, and the report at the end of each month shows the amount on hand to be nearly the same as the number coined.

Ouray Sick.

Los Pinos Agency, 20.—Indian runners from the Southern Ute Agency arrived this morning and report Chief Ouray dangerously ill and not expected to live. They came with a message from Ouray to the agency physician here, Dr. Lacey, in whom he has the utmost confidence, requesting him to come immediately. The doctor and his escort left immediately by a mountain trail. The Indians will furnish relays of horses; the doctor intends making the distance, 120 miles, in fifteen hours. Ouray went to that point to assist the commission in prevailing upon the Utes to sign the treaty. If Ouray dies the treaty will never be signed by White River and Southern Utes.

Pointing to the Guilty.

Philadelphia, 23.—The coroner's inquiry into the May's Landing disaster closed to-day. The jury, in the verdict, say the people killed came to their death from a collision, which might have been prevented if Engineer Aitken and Conductor Hoglund had more carefully observed the rules and regulations of the company governing the running of trains.

Miss Nelson's Will.

London, 23.—The greater part of Miss Nelson's property, estimated at about £40,000 sterling, is left by will to Rear Admiral Henry Carr Glyn, C. B. Edward Compton received a legacy of £1,000.

GLASS BALLS.

How Dr. and Mrs. Ruth Shatter Them.

New York, 23.—The *World* describes the shooting by Dr. Ruth and wife Mrs. Ruth began with a pistol at glass balls, and they were shattered in almost every case. With the pistol held sideways there was a miss or two more, but generally every shot told. When the pistol was inverted and aim taken below, instead of above the line of fire, there was no apparent loss in the percentage of hits. When a ball was hung by a string and set swinging, Mrs. Ruth stood eighteen yards off and made a clean break in her first shot. The rifle was then handled through the same series of shots, and the usual want of grace with which all women handle guns, was apparent. When balls were thrown up in the air Mrs. Ruth stood a good distance off and shattered a dozen out of fifteen, and this feature when encored was equally as good. While the lady shooter chatted with lady spectators Dr. Ruth began to show his ability as a snap shot. The sights of the rifle seemed to be of no special assistance to him, for when they were covered by a cord he used the weapon on balls placed on a stand, and again at glass spheres thrown into the air with wonderful effect. Some balls were thrown on the ground a dozen yards off, and the doctor aiming at the ground below the ball would send it spinning up into the air and then rapidly unloading and loading his piece would hit the ball in its descent. This double shooting drew out plenty of applause. Again when balls were thrown up the rifle was given a turn about after the manner of a flail handle and it fell into position soon enough to enable to breaking shot to be made on the ball. Balls thrown from side to side were hit at either coming from the right or left. When tired of breaking glassware Dr. Ruth picked up a fragment of glass, and stepping off a dozen paces, held it off in his fingers while Mrs. Ruth, picking up a small piece, tossed it in the air, took aim, and the glass was shattered into powder. With an ordinary visiting card held in his mouth and turned so as to show a side, Dr. Ruth permitted his wife to put several bullets through it. Dozens of other similar ways of testing the quickness of sight and steadiness of nerve of the shooters were improvised, and generally it was found that anything fired at was hit almost every time. There was a good attendance, including several experts.

The President's Trip.

Washington, 23.—The following details are learned of the President's western trip: The President will start from Washington for the far west on Thursday. His party will consist of the President, Mrs. Hayes and two sons, General Sherman, and one of his daughters, and three others. Hayes' family will start over the Pennsylvania road, spend Sunday at their home in Fremont, devote next week to the reunion of the President's old regiment, at Canton, Ohio, and by September 1st will be joined by Sherman and the other members of the party, and strike out west by way of Chicago and Omaha. They will proceed over the Union Pacific to Ogden, then over the Utah Central to Salt Lake City, where a brief stay will be made. A great sensation is expected there, as never before has Salt Lake seen a chief magistrate of the country. From here they will proceed to San Francisco, stopping perhaps at Carson City, and Virginia City. From San Francisco they will go by steamer to Portland, Oregon, and thence to Puget Sound, and Walla Walla, in Washington Territory, where they will be guests of General James W. Forsythe, lieutenant colonel of the First Cavalry, who is stationed there as commander. Returning to San Francisco the party will proceed over the Southern Pacific to Tucson, and will then penetrate Colorado by stage. The trip is expected to be finished by the 1st of October.

New York, 23.—The programme of the President's trip to the west has been published several times. The only modification of it is the following: On the return from California the party will visit points in Arizona and New Mexico. From Santa Fe or thereabouts they expect to take stages until the northern road is struck at some point in Colorado, and thence home again.

Dr. Parsons' Assassination.

London, 22.—Reuter's Pera dispatch says Mr. Heap, American consul-general, has delivered a note to the Porte, demanding that the murderers of Rev. Parsons be brought to Pera immediately to be tried.

Bucharest, 23.—The following are additional details of the murder of Dr. Parsons, American missionary: The assassin placed the muzzle of his rifle close to Dr. Parsons, but his servant fired at and killed him instantly. Dr. Parsons then started up, but before he could say or do anything a bullet pierced his heart. The two Circassians threw the body over a precipice, at the foot of which it was found after a few days. The residing minister at Ismit telegraphed the facts to Goschen, British ambassador, who communicated them to Heap, American consul-general. A squad of soldiers went to the camp of the Circassians and threatened to shoot the whole tribe unless the murderers were surrendered, whereupon the murderers were delivered to the authorities. The affair caused great consternation at Constantinople, and people travel armed, and if possible with an armed guard, when riding or driving in the suburbs.

Seven Saved.

London, 22.—The Lloyd's agent at St. Vincent telegraphs, under date of the 21st, that one of the missing boats containing seven men and five bags of mail matter from the steamer *American*, of the Cape of Good Hope and Southampton Line, which foundered April 28th, near the equator, was picked up by the Portuguese brig *Turejo*, and the men and mails landed at Loeda, Africa, July 11th.

Preparing for a "Deal."

New York, 23.—The *Evening Post*: Telegrams are being sent to New York from San Francisco to the effect that private advices from the Comstock Lode mines, from eminent and trustworthy sources indicate that the prospects for the whole of the great lode are more favorable that they have been for years, and all expect that the period of depression has passed, to give way to an era of sound prosperity.

Golden Bricks.

New York, 23.—A Broadway banker who returned last week from a visit to New Mexico, describes his visit to the village of Real de Dolores, which he says approaches nearer to the city whose streets are paved with gold, than any spot in this country. He saw some men tearing down one of the adobe houses, and by request they washed out one of the bricks of clay and straw. The result was $5 in gold. There is a scarcity of water in the country, which operates to discourage mining, but the traveler sees abundant evidence of the mineral wealth of the country.

AN OPEN SECRET AMONG THE LADIES

The brilliant, fascinating tints of Complexion for which ladies strive are chiefly artificial, and all who will take the trouble may secure them. These roseate, bewitching hues follow the use of Hagan's Magnolia Balm—a delicate, harmless and always reliable article. Sold by all druggists.

The Magnolia Balm conceals every blemish, removes Sallowness, Tan, Redness, Eruptions, all evidences of excitement and every imperfection.

Its effects are immediate and so natural that no human being can detect its application.

TARRANT'S SELTZER APERIENT

A CHEMICAL MARVEL.

Though a thousand leagues away
Seltzer's Tonic fountain foams,
We can drink the same to-day,
In our far-off Western homes.
Thanks to Chemistry's spell—
In an instant—presto! pass!
Fresh as from the living well
Seltzer bubbles in the glass!
TARRANT'S PURE APERIENT
Gives the rare elixir birth,
Healthful as the fluid sent
Flashing, from the breast of Earth.
Time and distance, what are they?
When Art thus can reproduce
Springs a thousand leagues away,
For the sick man's instant use!
SOLD BY ALL DRUGGISTS.
