LAND WARRANTS—40 acres $199; 80 acres $177; 120 acre $110; 160 acres $155.

RATES OF ADVERTISING.

Newspaper proprietors generally, and especially of this city, under the usages and regulations heretofore prevailing are called upon to perform more labor without remuneration, than any other class of community. The gratuitous publication of charity and religious advertisement, and communications, tributes of respect, obituaries, &c. &c., which can only be inserted at a heavy cost to the proprietor, imposes upon them a burden so enorous, that they feel called upon, in self-defence, to check the abuse, by making such publications a charge, to some extent at least, upon the parties more immediately interested. In this they are but following the example of the press in other cities, impelled by a sense of its intrinsic propriety, and imperative duty to themselves. The subscribers have, therefore, united together in a mutual agreement, upon the following specified terms for the publication of these as well as every sort of regular business advertising.

For each square of 12 lines or less of brevier, or 10 lines or less of nonpareil, for the 1st insertion, $1 00

Patent Medicines will be published at $100 per column daily, or $50 tri-weekly—with $5 for each renewal.

Steamboats running to New Orleans will be charged $10 for the season; and when running to St. Louis, Cincinnati, &c. $15 for the season of not more than six months.

The privilege of Yearly Advertisers is strictly limited to their own immediate and regular business; and the business of an Advertising Firm is not considered as including that of its individual members.

Advertisements published at intervals, viz: weekly, or monthly, are charged $1 per square or the first, and 50 cts for every subsequent insertion.

Calls on persons to become candidates, will be inserted as other advertisements, to be paid for invariably in advance.

Announcing candidates for County and State offices $5, and for municipal offices $3, to be paid in advance in every instance.

All advertisements for strangers or transient persons to be paid in advance.

Advertisements not marked on the copy for a specified time will be inserted till forbid, and payment exacted.

No advertisements can be inserted gratuitously.

All advertisements for charitable institutions, fire companies, ward, town, and other public meetings, including religious notices, to be charged half price.

Marriages and deaths are published as news. Obituaries, tributes of respect, and funeral invitations as other advertisements.

Genuine advertisers and all others sending communications or requiring notices designed to call attention to Fairs, Concerts, or any public entertainments, where charges are made for admittance, all notices of private associations, every notice designed to call attention to private enterprises calculated or intended to promote individual interest, can only be inserted with the understanding that the same is to be paid for. If inserted in the editorial columns (which can be only at the discretion of the editors) the same will be charged at the rate of not less than 20 cents per line.

The undersigned, publishers of daily and tri weekly papers in Nashville, pledge ourselves strictly to adhere to the above bill of prices, and in no instance to deviate from them.

MARBELIZED IRON MANTELS.

THIS magnificent style of Mantel is fast taking the place of all other descriptions, both on account of its superior beauty, richness, durability, and particularly its cheapness. While their cost is only about half that of the real marble, they indeed exceed the former in beauty, have a superior lustre, are less liable to soil, are much easier kept clean, and far exceed marble in durability, and are, at the same time, less liable to break.

The undersigned are agents for the manufacturers, Wallace, Lithgow & Co., Louisville, Ky., and will furnish them to their patrons, and the public generally, with grates, summer pieces, and every thing complete; and will also superintend their putting up. STEWART & OWEN,

SCOTT'S LITTLE GIANT

CORN AND COBB MILL.

THERE are features connected with this mill worthy consideration and close examination on the part those wishing to purchase a Feed Mill.

Its mechanical construction and adaptation to the purposes designed, to crush and grind ear corn. Its great capacity while doing an immense work with extraordinary ease, its durability is amply provided for. The complete and entire portableness of the Little Giant, rendering its greater convenience for plantation and farm use impossible. It requires no mechanical aid or bill of expense to put it up; any farm hand or servant can put up and set it to running in half an hours time. The convenience with which the sweep may be applied to run horizontal—as is most usual—or over head, and the mill may be easily attached where steam or water is used. The power it takes, requiring one and two horses. The quantity and quality of product, 10 to 50 bushels of good feed meal per hour, according to the degree of fineness ground, and the size mill. It is the cheapest mill, all things considered, there is before the public.

Another thing connected with the Little Giant, as a patent, and worthy of note, is the fact that there has been no Patent Right speculating or huckstering about the country, as is usual with the thousand bungling make-shift implements that are got up as a trade—merely to get money by selling or palming off the patent right upon the credulous—then the machine to be abandoned by all parties as a humbug; on the other hand the Patentee and Proprietors of the Little Giant Mills, believing that they can—and determined that they will supply the Agriculturalists and Stock raisers of our country with a superior Mill, are permanently engaged in the business, and have over one hundred thousand dollars invested in the manufacture of these mills, in the East, West and south, some of these establishments employing 60 men solely in this business. So highly are these mills appreciated, that for one thousand have been sold within the past eighteen months, and the heaviest and the most extensive Manufacturers of Agricultural implements in the United States have eagerly sought an interest in their manufacture and sale.

No implement has been more thoroughly tested; no one of the kind has received so numerous and high testimonials from Machanics' Institutes and Agricultural Associations, and none, by reason of substantial, practical utility and merit have more fairly ground their way into every day use and popular favor than the Little Giant Corn and Cobb Mill. Orders promptly filled,
