Answering Many Demands

THE one-piece frock of wool, with all the practicality of a suit and a somewhat wider field of usefulness, is taken as a matter of course in our spring and summer outfitting. It stole in as a rival of suits for wear on the street, a few years ago, and established itself as a necessity in the wardrobe then and there, fitting in with the demands of these busy days of womanhood. It is a pleasant change from the blouse and skirt costume and adaptable to all sorts of weather and many occasions.

There is an endless variety of styles in these serviceable frocks, as in suits, with straight-line models leading the throng. Two of these are shown in the picture made of any of the finer weaves used for suits, as serge gabardine, Poiret twill, tricotine and other wool materials combined with Canton crepe or crepe de chine in bodices. Capes to match reinforce these frocks quite often, when they must serve for cool weather and long coats cover them when it is cold. The frock at the left of the two shown here is very simple, but attains a smartness that is enviable. It has an almost plain bodice, a box-plaited skirt in the new and approved length, three-quarter length, slightly-flaring sleeves and a very long, narrow girdle of the material that crosses in the back and fastens in front. In all these points it gives its testimony in favor of the spring modes. There is a little simple embroidery on the front of the bodice and the round neck is outlined by a narrow band of it that reappears on the sleeves.

The dress at the right is another straight-line model, with plain bodice fastening at the left side and slight slider. Along the closing silk balls pendent on small silk cord provide a decoration. The skirt is embellished with embroidered motifs, slightly draped at the sides and shows a scant fullness where it joins the bodice. Its long narrow girdle ties at the side and falls almost to the bottom of the skirt.
