FOREIGN NEWS.

EUROPEAN.

LONDON, Feb. 5.—The tone of the press on the Alabama claims is slightly moderated, and looks forward to the Queen's speech to-morrow for the positive announcement of the stand taken by the Government with regard to the American case.

The *Times* of Saturday has the following language: "We repudiate the construction which has been put on the Treaty of Washington in the American case, and must withdraw from arbitration if this construction is insisted; but this point rectified, we are ready to stand loyally by the Treaty." The *Times* to-day is afraid that the attempt to solve the Alabama difficulty may prove abortive, and hopes the failure will not excite bitter feeling in America.

The *Post* thinks it will be time enough when the United States refuse to withdraw their charge for indirect damage, to decide upon future action. Menaces are now unpalatable.

The *Daily News* says that the Queen in her speech on the opening of Parliament to-morrow, will express a wish that the tribunal at Geneva may be able to proceed with its duties on a basis acceptable to the English Government.

The *Saturday Review* thinks that the United States prefer to have no settlement, and wish to hold the Alabama claims as a perpetual menace for political ends.

The *Pall Mall Gazette* this evening (5th,) claims to have seen an early copy of the Queen's speech to be delivered on the opening of Parliament to-morrow, and gives the following abstract: The Queen congratulates Parliament and the country that her relations with all the nations of Europe are of the most friendly character.

Considerable space is devoted to the subject of the Alabama claims, on which the Queen says: "To uphold the extent of my international obligations, I have concluded a treaty with the United States for the settlement of the questions which have been discussed for several years; having become obvious that the horrors of war are avoidable by peaceful arbitrament instead of arbitrament by the sword, I have given my consent to the reference of the Alabama claims to an International Tribunal, the highest authority to which their decision could have been intrusted; through a perfectable oversight on the part of the negotiators the claims were not expressly limited to *direct* losses, and therefore the President of the United States has preferred a considerable amount of indirect claims, to many of which my Government has demurred. I hope the amount to be ultimately delivered will not exceed the French payment to Germany. (!)

The Queen deplores the troubles in India. She felicitates Parliament upon the condition of the finances of the country, and the collection of unprecedented revenues, and refers to the peaceable state of Ireland, and promises the introduction of bills in relation to the ballot, for the regulation of modes for the acquisition of railways for the State, and for the regulation of licenses for the sale of liquors.

The *Evening Post* says that Sir Charles Dilke organized a large meeting in Trafalgar Square to-night. Fully 10,000 persons were in attendance. The proceedings bid fair to be orderly, and disturbances improbable.

The *Times* complains that the American case has been translated into the Continental languages and scattered broadcast over Europe. If the intention is to make retraction impossible, no method could be chosen which would prove more effective.

PARIS, Feb. 5.—Great interest is felt here in the discussion of the Alabama claims now going on in England, and the result is awaited with much anxiety.

The resignation of Minister Casselmer Periere is in the hands of the Government. No successor has yet been nominated. The matter will be definitely settled to-morrow.

MADRID, Feb. 5.—Investigation shows that the disturbances in Barcelona and elsewhere were fomented by the International Society, and many members of the organization are now under arrest.

Subscriptions have been opened here to aid the people of France in the payment of the war indemnity to Germany.

The Captain-General of Cuba sends a re-assuring dispatch to the Government here. He says he has just made a journey through the disaffected districts, and declares from personal observation that the insurrection will be ended by March or April. He makes a requisition for 2,000 fresh troops from Spain, with which he promises to bring the war to a conclusion.

CALCUTTA, Feb. 5.—Deputy Commissioner Cowan has ordered fifty Kooka malineers to be blown from the mouths of cannons.

LONDON, Feb. 6.—The demonstration at Trafalgar Square last night by the supporters of Sir Charles Dilke was attended with comparative quiet. A procession, numbering at least 4,000 persons, marched to Trafalgar Square. Numerous red flags were borne throughout the line, and the bands played the Marseillaise. At a banquet of the Liberals at Lambeth, last night, Wm. M. Arthur, in a speech, referred to the Alabama claims. He said he scorned the claims of the United States Government for indirect damages.

A special from Hongkong reports the arrival there of the crew of the ship British Admiral, from San Francisco, abandoned at sea.

A bill to abolish the Polynesian coolie slave trade will be introduced in Parliament this session.

PARIS, Feb. 6.—It is stated that Lefranc will succeed Casselmer Perrier as Minister of the Interior. Louis Joseph Martel is mentioned as the successor of Lefranc. Poncier Quartier is now ready to pay half a milliard of the German war indemnity, which is due on the first of May. The Assembly is discussing a motion for the establishment of a provisional commission to govern the country in case the Assembly is illegally dissolved. The debate was tumultuous.

Cardinal Antonelli is sick, but not dangerous.

AMERICAN.

NEW YORK, Feb. 5.—The *Herald* editorially says that in fact the British representative at Washington being instructed to make proposals of accommodation, and for compromise of the Alabama claims to our Government, is an insult to our nation from Great Britain. Britain is liable for the loss of our commerce and prolongation of our civil war; damages awarded must be paid precisely, or will be collected at the point of the bayonet.

The *Times* says that the action of the British Government will be matter of surprise to Americans.

The *Tribune* says if popular clamor in England should compel withdrawal from the Treaty of Washington, it is not the United States that will be the heaviest loser by such a course.

The *World* says it looks as if the Administration had over-stepped its work in trying to make capital out of this controversy, and if the Treaty is repudiated the public verdict will be that the President and his advisers have bungled instead of settling it.

NORWICH, (Ct.,) Feb. 5.—A terrible double-murder and suicide was committed at Bozrar, Connecticut, to-day. Wm. Ewing, an employee of Dr. Johnson, killed first the Doctor's daughter, then his wife, and afterwards cut his own throat. The cause of the murder was Miss Johnson's refusal to marry him. The murderer's first shot scarred the girl; he then beat her over the head with the gun, fracturing her skull; he then attacked her mother and beat her over the head, inflicting injuries from which she has since died. He also attacked the servant girl, who, however, fled and raised the alarm.

CHICAGO, February 5.—A *Tribune* special says Morton's early adjournment resolution, which was referred by the House to the Committee of Ways and Means, does not meet with much favor in that Committee. It is said to-day that the majority of the Committee would not consent to any adjournment until a bill to modify the tariff had been passed. Dawes, however, is not sanguine of any work being done in this direction by the Committee this session.

CINCINNATI, Feb. 5.—The names of the killed in the explosion at the power works were Noyo Bellard, Robinson White, and Conley, colored. Conley was blown into fragments—nothing could be found of him but a portion of his head and trunk. The shock was distinctly felt at Dayton, Urbana, and Xenia. The amount of loss not ascertained. Hundreds of citizens are hurrying to the scene of disaster, and are rendering all possible assistance.

DUNCAN, a colored man, is so terribly lacerated that death is momentarily expected. Search is being made among the ruins for more workmen, some of whom are missing. The bodies of the dead are shockingly mutilated and burned. The mills were thrown some distance apart, and the concussion was so great as to produce explosion in all the rest. A brick house standing more than a mile distant had its windows completely blown out, and was otherwise damaged. Great excitement prevails.

HALIFAX, Feb. 5.—The intimation of the English press of the intention of the British Government to repudiate the Treaty of Washington excites grave comment here. It is believed that such a violent course would be almost a certain sign for war. The English Government, it is thought, will follow public opinion, and take no decisive a movement. The people are deeply interested in the Treaty.

This place was visited with snow and hail on Saturday night. Considerable damage was done to the shipping in port.

NEW YORK, Feb. 6.—A special London dispatch says the *Times* yesterday used the following language: The Treaty of Washington has become inoperative, for the reason that it is not based on a perfect understanding between the signatory parties. It is with the utmost reluctance that we contemplate the possibility that the reference of this question to the Arbitration Court will come to nothing; that there will remain nothing of the expectation thus raised of the successful issue of the case. A satisfactory answer from Washington, excluding the American claim for indirect damages, cannot be anticipated. A misunderstanding which will thus be sufficiently established between us and the United States, can have no sequel but the abandonment of the reference for arbitration.

Accounts from England regarding dissatisfaction with the Treaty of Washington produces no excitement whatever in Executive or Congressional circles, nor is it evident that any complications between the two countries can result from a decision of the question between England and the United States; and it is believed that the matters at issue will be settled in accordance with the terms of the Treaty. None of the members of the two Committees on Foreign Affairs have heard of any dissatisfaction with the Treaty apart from the London press; nor has their attention been called to the subject by either the President or the Secretary of State, and it is equally certain that they and other members of Congress will stand by the treaty as it is, without yielding to any demand which will affect its purposes. And such is also said to be the determination of those connected with the Executive Department, whose right it was to protest this American statement of the case with as much earnestness as was exercised by the British themselves.

A NICE LITTLE GIRL.—During the recent fires in Wisconsin, a little four-year old determined to try the efficacy of prayer; but having a pious mother and a profane father, the result of her early training was manifested in the following manner: "Oh, good Lord, send us rain; send us rain right away, for we're having a h—l of a time here."

PRUNE should be very careful in the application of acids. A young lady with golden tresses fainted the other night, and an alarmed friend bathed her forehead with vinegar, and in the most expeditious manner bathed all the beautiful golden color out of her friend's front hair.
