Morton's Celebrated Gold Pens.—Improvements made in the machinery for manufacturing Gold Pens, and secured to the subscriber by Letters Patent, have enabled him to overcome the many imperfections hitherto unavoidable in their production, and also to bring the cost within the reach of all. The writing public should know the following facts: Constant writing for six months is done cheaper with Gold Pens than with steel, therefore, it is economy to use Gold Pens. The Gold Pen remains unchanged by years of continued use, while the Steel Pen is ever changing by corrosion and wear; therefore perfect uniformity of writing is obtained only by the use of the Gold Pen. The Gold Pen is always ready and reliable, while the Steel Pen must be often consumed and a new one selected; therefore in the use of the Gold Pen there is great saving of time. Gold is capable of receiving any degree of elasticity, so that the Gold Pen is exactly adapted to the hand of the writer; therefore, the nerves of the hand and arm are not injured, as is known to be the case by the use of Steel Pens. He is now selling Gold Pens at prices varying from 25 cents to $1, according to size, the average wear of every one of which will far outlast a gross of the best Steel Pens. Sold by all dealers in the line throughout the country. Wholesale and retail at the store, No. 25 Maiden-lane, where all orders, inclosing cash or post stamps, will receive prompt attention; and a Pen or Pens corresponding in value, and selected according to description, will immediately be sent by mail or otherwise, as directed. Address
A. MORTON, No. 25 Maiden-lane, New-York.

THE NEW-YORK TRIBUNE.
NEW VOLUME.

On the seventh of September, 1861, THE NEW-YORK WEEKLY TRIBUNE commenced the twenty-first year of its existence; THE DAILY TRIBUNE being some months older and THE SEMI-WEEKLY TRIBUNE somewhat younger. For more than twenty years, this journal has labored in what its conductors have felt to be the cause of Humanity, Justice and Freedom, endeavoring to moderate the condition of the oppressed and unfortunate, to honor and encourage useful exertion in whatever sphere, and, to promote by all means the moral, intellectual and material advancement of our country.

It has aimed to be right rather than popular, and to expose and condemn to-day the truth that others may not be willing to accept till to-morrow. In pursuing this course, mistakes have doubtless been made and faults committed; but, having in all things incited our readers to think and judge for themselves rather than adopt blindly our own or others' conclusions, we believe we may fairly claim for this journal the credit of having qualified its readers to detect and expose even its own errors. To develop the minds of the young by the most general, thorough and practical Education, and to encourage and stimulate Productive Industry, through free grants of Public Lands to actual settlers and cultivators, as also through the protection of immature or peculiarly exposed branches from too powerful foreign competition, are among the aims to which this journal has adhered through good and evil report, and which it steadfastly commends to American patriotism and philanthropy.

As to the Civil War now devastating our country, we hold it to have originated in a Rebellion more wanton, wicked, inexcusable, than was ever before known—a Rebellion in the interest of the few against the many—a Rebellion designed to raise high her the walls of caste and tighten the chains of oppression. Having done all we could without a surrender of vital principle to avoid this War, and witnessed the forbearance, meekness and long-suffering with which the Federal Government sought to avert its horrors, we hold it our clear duty, with that of every other citizen, to stand by the nation and its fairly chosen rulers, and to second with all our energies their efforts to uphold the Union, the Constitution, and the supremacy of the Laws. And, though the Rebellion has become, through usurpation, deception, terrorism, and spoliation, fearfully strong, we believe the American Republic far stronger, and that the unanimous, earnest efforts of loyal hearts and hands will insure its overthrow. But on all questions affecting the objects, the scope, and duration of this most extraordinary contest, we defer to those whom the American People have clothed with authority, holding unity of purpose and of action indispensable in a grave an emergency.

In a crisis like the present, our columns must be largely engrossed with the current history of the War for the Union, and with elucidations of its more striking incidents. We shall not, however, remit that attention to Literature, to Foreign Affairs, to Agricultural Progress, to Crops, Markets, &c., &c., which has already, we trust, won for THE TRIBUNE an honorable position among its contemporaries. Our main object is and shall be to produce a comprehensive newspaper, from which a careful reader may glean a vivid and faithful history of the times, not merely in the domain of Action but in that of Opinion also. As our facilities for acquiring information increase with years, we trust that an improvement in the contents of our journal is perceptible, and that, in the variety and fullness of intelligence afforded, we may still hope to "make each day a critic on the last." In this hope, we solicit a continuance of the generous measure of patronage hitherto accorded to our journal.

TO CAPITALISTS.—SOMETHING BETTER THAN A GOLD MINE.—Parties having the requisite capital, and desirous of investing in the Business of Manufacturing the
AERATED UNFERMENTED BREAD,
By the new process, patented by Messrs. Perry & Fitzgerald, are requested to call on, or address the undersigned, who is prepared to negotiate for the sale of "Rights" or "Licences," for several of the largest cities in the United States.
"The grand discovery of the time," says The N. Y. Daily Times, "is the process of making the most wholesome Bread, and that which can longest be preserved fresh, in the shortest time, and at a considerable reduction of cost over present plans."
WHAT MEN OF SCIENCE SAY OF THE PROCESS.
"The process employed is based on true scientific principles."—[Walcott Gibbs, Professor of Chemistry and Physics in New-York Free Academy.
"The process is simple, cleanly, and uniform in its results, involving the use of no substance requiring whose wholesomeness a question can be raised. It saves all the constituents of the flour, while bread raised by fermentation inevitably sacrifices some of them."—[Samuel St. John, Professor Chemistry, College of Physicians and Surgeons, New-York.
"The bread made by this process is of admirable quality, being light, entirely free from all unpleasant taste and odor, holds its moisture longer than any other baker's bread that I have seen, and I have no doubt it is perfectly wholesome."—[John Torrey, Professor Chemistry, U. S. Assay Office, New-York.
"I have found it of superior quality in all respects. One desideratum attained is entire cleanliness. It is eminently healthful, inasmuch as it contains none of the products or results of fermentation."—[Willard Parker, M. D., Professor Surgery, College of Physicians and Surgeons, New-York.
"The steadiness of the consumption of bread renders it an article peculiarly suitable to be prepared and supplied by a public company; and, since the new process removes all the vicissitudes of manufacture, and the expense of machinery gives a comparative monopoly, the supply of bread is placed at once in the same category with gas, water, &c."—[London Journal of the Society of Arts.

☞ Pamphlets, and all desirable information, on application. Profits from 50 to 100 per cent per annum (or more) on the capital invested, over expenses. The Process may be seen in daily operation, and the Bread tried, at the splendid bakery of Regua & Plumb, Nos. 9 and 11 Hoyt-st., Brooklyn, and at the establishment corner 14th-st. and 3d-av. Samples sent when requested.

These Whales have been obtained at great expense
FROM THE NORTHERN SEAS,
and consist of one old and two young ones, one of the young ones being the offspring of the old one, which at times
CRIES AFTER ITS MOTHER, IS SUCKLED BY HER, AND RIDES ON HER BACK,
the customary method of maternal Whales of carrying their young. They are to be seen
IN A LARGE TANK,
erected expressly for them in these beautiful grounds, which is supplied by a powerful steam-engine with
216,000 GALLONS DAILY OF PURE OCEAN WATER,
from the East River through a thousand feet of iron pipe, lined with cement, and laid expressly for that purpose.
Admission 25 cents; children under 10, 15 cents.
On FRIDAYS, festival days for families, the price is reduced to 15 cents; children under 12, 10 cents.
