Proposals.

TREASURY DEPARTMENT, OFFICE LIGHT-HOUSE BOARD, WASHINGTON CITY, June 25, 1862.
PROPOSALS for BUILDING and EQUIPPING TWO FIRST-CLASS and THREE SECOND-CLASS LIGHT-VESSELS.
Separate sealed proposals will be received at this office until 12 m., on SATURDAY, the 26th of August, 1862, for building and equipping two first-class Light-Vessels of the following dimensions:
Length from after side of stem-post to the fore side of main stem, 90 feet; breadth of beam, moulded, 25 feet 6 inches; depth of hold from top of timber strake to top of beam, 11 feet; tonnage about 225.
The Board will also receive proposals until 12 m., on MONDAY, the 28th of July, for building and equipping three second-class Light-Vessels of the following dimensions:
Length between perpendiculars, 81 feet 6 inches; breadth of beam moulded, 21 feet 6 inches; depth of hold from top of timber strake to top of beam, 10 feet 6 inches; tonnage about 150.
The white oak to be of the best sea-coast timber, and the yellow pine of the finest grain untapped Southern timber. The printed specifications (copies of which the vessels are to be constructed, and which will with the drawings and plans, be attached to and form a part of the contracts) can be had on application to the Light-House Board, or to the Light-House Inspector at Portland, Boston, New-York, or Philadelphia, at which places also the plans and drawings may be seen and examined.
The Board reserves the right to reject any proposal, or to refuse to receive any vessel not built to strict conformity to the terms of the contract; and no contract will be considered binding until it shall have been approved by the Hon. Secretary of the Treasury. No proposal will be received or considered, unless from persons engaged in ship building, and each offer must be accompanied by the signatures of two responsible persons as sureties for the faithful fulfilment of the contract.
Each vessel must be distinctly specified, with the sum for which the bidder proposes to build and equip her according to the drawings and specifications, and a copy of the printed specification must be inclosed by each bidder, as evidence that these terms are understood by the bidder.
A drawing of the vessel contracted for will be furnished to the contractor, to which new will be required to adhere strictly in the end the mold not brought up or taken out and the same examined by the superintending officer, who will be assigned to the duty by this Board, with the approval of the Secretary of the Treasury, and who will be required to see that the work executed and the materials used are in strict conformity to the terms and specifications of the contract, and who must certify to the same in writing before the vessel will be received and payments such signed to be made.
Persons making proposals to build any of these light-vessels may suggest any change or alteration by which the cost will be lessened, without using inferior materials, and in making such suggestions the precise character of the change or alteration will be named, with the amount saved thereby. The proposals for each vessel will state the time required to complete the vessel and deliver it to the agent of the Board at such place as may be agreed upon, the same to be named in the bid. All proposals must be sealed and indorsed "*Proposals for building Light-Vessels*," and then inclosed in another envelope and addressed to the secretary of the Light-House Board, Washington, D. C.
No bid will be considered if it does not conform to the requirements of this advertisement.
Any person submitting a proposal may be present and witness the opening of the bids at the time and place hereinbefore specified.
By order of the Light-House Board.
jy 10 3w eod W. B. SHUBRICK, Chairman.

PROPOSALS FOR STEAM MACHINERY FOR THE UNITED STATES NAVY.—The Navy Department will, until the 29th day of July, receive sealed proposals for the construction of steam machinery for vessels to be propelled by two screws acting independently of each other.
There will be, for each vessel, two pairs of engines of the same construction and detail as those built for the U. S. S. screw gunboats, with the exception of the length of stroke, which will be 24 inches, instead of 18 inches, the diameter of the cylinder remaining 30 inches as before. The valves will be Wedgwood's slide. These, and some trifling modifications in detail, are all the engines will vary from the specifications of those of the gunboats above referred to.
Each pair of engines will be entirely distinct, and operate its shaft independently of the other. The screws will be of brass, 14 feet pitch, and not less than 10 feet diameter; they will be sustained from the counter of the vessel by a brass hanger, and the shaft will revolve in a brass pipe connecting the hanger with the hull.
The boilers will be of the vertical water-tube type, with the tubes above the furnaces. The grate surface will be about 3 square feet, and the heating surface not less than 7,000 square feet. The specifications for the gunboat boilers are to apply as these, so far as quality and kind of workmanship, thickness of metal, etc., are concerned; all appearances to be the same, regard being had to the increased dimensions of the boilers.
Two blowers of the largest size, with suitable blowing engines, will be required.
The machinery is to be erected in the vessels at the different navy-yards of Kittery, Maine; Charlestown, Massachusetts; New-York and Philadelphia. The proposals will state the name or names of the navy-yards at which the parties intend to furnish the machinery; the names of the parties in full and of their sureties; the gross sum for which they propose to furnish the machinery in the vessels complete and ready for steaming, with a pro rata amount of duplicate pieces, tools, instruments etc., stipulated in the gunboat specifications, and the time from date of contract in which they will guarantee to complete the work.
The proposals are to be indorsed "Proposals for Steam Machinery of Vessels with Two Screws," to distinguish them from other business letters. The contract will embrace the usual conditions, and payments will be made in the usual manner as the work progresses.
The Department reserves the right to reject any or all of the proposals that may be made under this advertisement if, in its opinion, the public interest requires.
Any parties preferring to make propositions based on other kinds of machinery than above described, but of not less power, they will receive consideration.
