SHIPPING INTELLIGENCE.

ARRIVED AT HONOLULU.

Am. ship Fidelia, Locke, from Tacoma, Apr. 25. Cargo of lumber to Hackfeld & Co.

Am. ship Lutzen, Park, from New York, Jan. 28. General merchandise to C. Brewer & Co.

Haw. ss. Kinau, Weeks, from Hilo, Pacific, Apr. 15. Passengers and merchandise to C. Brewer & Co.

Am. s.s. A. J. West, Davis, from Aberdeen, Apr. 1 s.s. 45 M feet rubber, 2.5 M laths to Lewers & Cooke.

Br. ship M. E. Watson, Wilson, from Liverpool, Jan. 6 h. Cargo of general merchandise to H. Hackfeld & Co.

Schr. Aloha, from Kona ports.

Stmr. Upolu, Dalton, from Hawaii ports.

Stmr. Kilauea Hou, Bennett, from Hilo and way ports. Kukaiau sugar, 3,900 bags.

P. M. S. S. Nippon Maru, Allen, from San Francisco in 6 days, 17 hours. Passengers and merchandise to H. Hackfeld & Co.

Am. schr. G. W. Watson, Pattersen, 22 days from Port Townsend, with lumber.

Schr. Kankeaouli, from Hawaii.

Schr. Lady, from Koolau.

Thursday, May 3.

Am. sch. J. W. Weatherwax, Sorensen, Tacoma, April 5: Lumber to Cotton Bros.

Am. sp. Agenor, Colby, Newcastle, February 8: Cargo of coal to order.

Am. bgt. Harriet G., Wayland, San Francisco April 13: General merchandise to P. U. & S. Co.

Br. sp. Hariech Castle, Evans, Liverpool, January 1: General merchandise to T. H. Davies & Co.

Am. sch. Jno. A. Campbell, Smith, Tacoma, April 3: Lumber to Lewers & Cooke.

Str. Waialeale, Mosher, from Kauai: 3,000 sacks sugar.

Str. Lehua, Dower, from Maui: 1,900 bags sugar.

Sch. Alice Kimball, ——, Maui ports.

SAILED FROM HONOLULU.

Am. bk. Sonoma, Mattson, for the Sound in ballast.

Schr. Blanche & Ella, for Kauai.

Schr. Golden Gate, for Maui.

Stmr. Jas. Makee, Tullett, for Kauai.

Stmr. Mikahala, Pederson, for Kauai.

Stmr. Mokolii, Bennett, for Molokai.

Stmr. Ke Au Hou, Mosher, for Kauai.

Stmr. W. G. Hall, Thompson, for Kauai.

Schr. Kaiulani, for Oahu ports.

Schr. Luka, for Hawaii.

T. K. K. Nippon Maru, Allen, for the Orient.

Thursday, May 3.

Am. bk. Mohican, Kelly, for San Francisco.

Str. Kauai, Bruhn, for Kauai ports.

Str. Nihau, Thompson, for Kapaa.

Str. J. A. Cummins, Searle, for Oahu ports.

Arrived.

From San Francisco, per bark Andrew Welch, May 1.—W. H. Dimond, Mrs. C. M. Roberts, W. Roberts, Miss N. Hufschmidt.

From San Francisco, per T. K. K. Nippon Maru, May 2—Mrs. L. M. Besler and three children, T. Bowden, M. Crane, Mrs. C. Dreier, E. de Lacey, L. K. Kentwell, Dr. H. V. Murray, F. G. Prescott, B. J. Pullman, A. Schierholz, Mrs. T. J. Sunny and son and W. C. Gregg. Through—T. Harada, N. Hozumi, Thos. Ingils, Nesbit, J. J. Breaneman, W. T. Aldrich, Frances Grey, Mrs. J. W. Heard and five children, Mrs. Robert M. McWade, Mrs. W. C. S. Smith, T. Shilsawa, Y. Tanuma, Mr. Smith, W. O. Rowe, M. J. Stratford, Miss Emille Townsend, John Webster, Robt. M. McWade.

From Maui, per str. Lehua, May 3.—O. Hanneberg, R. W. Shingle, J. Dias.

Departed.

For Kauai, per stmr. Mikahala, May 1st.—Mrs. Zabriski, W. A. Kinney, ... Swanzy, E. Ryan, L. W. Thompson, Lady Heiron, ... L. W ght, Mr. Johnson, Mrs. Pierson, Geo. Smith, J. Goebfelder, Miss A. Danford.

For Kauai, per stmr. W. G. Hall, May 1st.—G. N. Wilcox, C. H. Robertson, Mrs. J. H. Cummings and 2 children, Mrs. J. B. Cooke'ey, Mrs. Lindsay and child Talbot Ware, Lieut. Hattie Elliott, W. Smith, Harry Chapman, C. Blake, Con Chuck and 24 on deck.

NOTES.

The schooner Aloha and the bark Edward May cleared at San Francisco for Honolulu with merchandise on April 24.

The Babcock, St. Frances and E. B. Sutton leave for New York in the order named. They will all get away by the 15th inst.

The Waialeale, from Kauai yesterday morning, brought 3,000 bags of sugar. She reports 149,400 sacks ready for shipment when she left.

Max Olroy, one of the oldest purser of the Inter-Island Company has left their employ. Louis Reynolds has also left the steamboat business to accept a position up town. Both men were very popular and obliging and will be greatly missed by the friends made by them during their service on the steamers.

Something novel in the shipping line appeared yesterday afternoon when the Japanese bark Taukishima arrived from Hakodate. There have been Japanese steamers and men-of-war here, but a sailing vessel flying the Mikado's flag is not often seen on this coast. The Taukishima was originally intended for a naval training ship for the Japanese Government, but the plans were altered and she was turned over to private parties and rigged out as a bark. The vessel has auxiliary steam power. She brings a general cargo of Japanese freight, and upon arrival was ordered into quarantine but released after a few hours.—S. F. Chronicle.

The steamer Nihau left last evening for Kapaa with a lot of machinery for the Makee Sugar Company that was brought here in the Fort George. Four large boilers were taken on the deck and other heavy parts were stowed in the hold. The machinery as it is taken from the Fort George is stored on the beach along Queen street for about a block Ewa of the Fishmarket wharf. Some of the pieces are monsters and require the most careful handling. The Fort George is being discharged by "Goody" Morse, Captain Morse's young son, who is his father's first mate.

IN HASTE IS DANGER

Opening of Chinatown Grave Matter.

DR. WOOD EXPLAINS DELAY

Will Take No Chances of Recurrence of Plague -- Precautions Against it.

A great many uncomplimentary things are being said by persons financially interested in Chinatown and other burnt district property, concerning the Board of Health and the special Committee on Soil. President Wood came out very strongly in his explanation of the delay of the soil report and other matters relating to the plague, at the last meeting of the Board of Health and his remarks were to the point and full of interest.

The disposition of the infected districts is now the question of the most importance from the standpoint of the health and safety of the city. Although the quarantine is pau and things are settling back to their original status, there is still a very material danger in a possible recurrence of the plague through a too speedy re-inhabitance of Chinatown and other localities where the bubonic disease has occurred. Dr. Wood is earnest in his efforts to keep the plague down and is energetic in all measures to discourage risks in any way.

When the subject of the examination of the soil of the burnt districts came up at the last Board meeting, Dr. Wood said:

Making Serum.

I have some reports of Dr. Hoffman on soil analyses. They are not complete, but show the work as it is being done.

Here is one upon the topic of making Haffkine's prophylactic. Being an experiment to determine whether by following the direction of Haffkine the serum can be manufactured in Hawaii as successfully as in Washington. The process is to develop plague bacilli in sterilized boulloa, sometimes using a little oil and heating to a temperature which has been found to absolutely kill the bacilli. Thus we have the bacilli but they are dead bacilli, and have left merely the toxine or poison produced by the bacilli.

Knowing the quantity of toxine which, injected into a man, will produce death, we inject simply enough to cause the system of the one inoculated to generate an antitoxine. This antitoxine having begun to be manufactured by the human system, it will continue for a considerable period, say six months, so that we have produced exactly the same result as in the case of a person who has had the plague and recovered from it, and is therefore immune from another attack as long as his system continues to generate the antitoxine.

Here is a report of Dr. Hoffman on Japanese feed stuffs. Without reading the report, the following are about the conclusions arrived at as a result of the investigation.

Bacilli and Foodstuffs.

Experiments were made to see how long bacilli would live in various forms of Japanese feeds after being introduced. In a general way, it was found that the preserved foodstuffs with an acid reaction would not culture the bacilli, and bacilli introduced were soon killed, showing that there could be no bacilli in the preserved foodstuffs, and if any bacilli should enter they would be killed. Other articles of food were found to carry the bacilli about as long as other ordinarily called innocent articles, such as dried fish, etc.

Subject of Soil.

In talking with Dr. Hoffman about the matter of specimens of soil from burnt districts, a day or two ago, he said that there were the same bacilli found in these specimens of soils that were found in all soils; some of these bacilli stained like the plague bacilli, but did not act like them.

There has been a great deal of discussion, I believe, as to why the committee on soils has not brought in his report, and more or less insinuation that some influence was being brought to bear on the board. I think, however, that any one who will consider the subject will appreciate the very difficult task the committee have before them, and the great responsibility which rests on them in the matter. The process of determining the character of the bacilli found in the soil is a long and tedious one. With a given quantity of soil, culture must be made as above explained, to see if any bacilli are to be found. When bacilli are found they must be separated and a new culture made to determine their nature. Bacilli may appear which have the polar stain of the plague bacillus. These must be isolated and a new culture made, and this process repeated each time, isolating with the platinum needle until a pure culture is obtained. When obtained these bacilli which appear to resemble the plague bacillus, in small numbers, may develop, when cultured in large numbers, to be something else. At any time in this process it may develop that the germs are not plague, in which case you must commence at the beginning again.

[illegible] a culture can be made on a susceptible animal—like the rat—and then we have to wait for the rat to die. He may live longer than the regular time, but having died, it is necessary to make a culture from the bacilli in his spleen or elsewhere and inoculate another animal with it. If he lives, and a third rat dies from the culture of the second one, you may be reasonably certain that you have the plague bacillus isolated, it being presumed that the rat has the other symptoms common to the plague.

But if the rat does not die, it does not prove that there is no plague bacilli present in the soil, for it is known that after a time the bacillus ceases to be virulent and aggressive, or in the experiments something may destroy the virulence of the germ.

Then, too, because no plague bacilli were found in the samples tested, does not by any means show that there are not millions of bacilli swarming in the soil. The objection to opening up the infected district is not to people walking through it. I think that it is absolutely safe for any one to walk through it. The chance of finding bacilli on the surface of the soil is nil. The danger comes in turning up the soil, in building and in digging cesspools. It is not on the surface you would look for the bacilli, but in cesspools and rat holes.

Theory of Recurrence.

The theory of the recurrence of plague is that the rats infected by plague die in their holes, and other rats passing over the ground become infected and die. In time the rats will leave or die. It is here the danger comes in. So long as the ground is barren, no one lives there and no foodstuffs are brought into the district, the rats are not going to come back there. There is nothing for them to live on, and the bacilli which still exist in the soil will have opportunity to become extinct, or at least not as aggressive and vicious as they appear in their worst form.

The history of the recurrence of plague is not so often that it is misunderstood from another country so that it is to the same locality in which it was supposed to have been stamped out.

Some Remarks not.

[illegible]

Committee Not Ready.

The soil committee is not yet ready to report. The committee realizes its responsibility and wants to make sure before making a report. The plague is back in Osaka after a period of ninety days. I am stating these things for the benefit of the public, and I hope they will reach the public, and especially those interested in the opening up of the burned district.

Bolte Asks Questions.

Mr. C. Bolte—I would like to be privileged to ask two questions. I want to state that I approve heartily of the work of the committee and of the actions of the Board of Health, but many of my friends are after me, and for them I appear before you to ask a question or two. The first one is: Can not the soil be sterilized by means of sulphuric acid, or some of the other methods?

Dr. Wood—There is no way of sterilizing the soil in a thorough manner. You cannot sterilize the bottom of a cesspool nor the windings of a rat hole, and there are the most dangerous places.

Mr. C. Bolte—By plowing after sterilization you would fill up the rat holes. You can plow two feet deep if necessary. The cost of sterilizing and plowing would be less than the income from the land for one month. Rats will not stay where no people are. We burned the livery stables because we found they harbored rats. The bacilli will die if there are no rats to stir up the soil. Does any one know if a rat goes more than two feet under the soil?

Dr. Wood—I don't know.

Geo. W. Smith—Experiments are now being conducted.

Can't Build Yet.

Mr. Bolte—I do not criticise the Board of Health. I am doing all I can among my friends to show them that the Board of Health is doing the right thing, but we might as well be frank about it—they are saying uncomplimentary things about the Board and the Committee on Soil.

Dr. Wood—I would like to have the community understand that the Board of Health are simply trying to find out whether there is danger to the public health in opening Chinatown up. The extension of the fire limits has nothing to do with it.

Mr. Bolte—I am glad you spoke of the fire limits, for that was a rather delicate point which I wished to raise. With regard to the cesspools in Chinatown, there can be no cesspools there, as by the time buildings could be put up there there will be sewerage, and they will be compelled to connect with the sewers. If the experiment might be tried with part of the district to see how it might work, my friends would be satisfied.

Dr. Wood—As to the extension of the fire limits or as to influence of some sort or other being brought to bear on the Board to postpone the opening of Chinatown until the new Legislature could meet and extend the fire limits, which may be some time next August or September, I believe that the Government would be very glad if it could be done. I believe that the Cabinet and that every member of this Board would like to see the fire limits extended over Chinatown before that district is again opened up. I know that personally, as an individual, the president of this board would like to see that come to pass. I do not want to see any more fire-traps in the district. But, nevertheless, this Board will not allow that to weigh with them in the determination of the question as to the infection of the soil of the burned district.

Mr. Bolte—Could not some means be found to prevent the erection of fire-traps in the burned district?

Dr. Wood—I think the way to deal with you property owners who put up such buildings would be to have a mass or indignation meeting and make you take them down.

Mr. Bolte—I own no property in Chinatown.

Mr. Geo. W. Smith—The Committee on soils will be able to report in a few days, it is expected.

S. S. HORDA LIBEL SUIT.

Brought Against Brewer & Co. for Collection of Freight Charges.

"E. H. Svendsen, master of the S. S. Horda, libellant, against 8,973 packages of machinery and material, and O. B. Stillman, defendants," is the title of a suit in admiralty in the Second Circuit Court, which was brought yesterday afternoon by Alexander & Baldwin, agents of the steamer. The papers were filed late in the afternoon and the libel will issue this morning.

The action grows out of the refusal of Messrs. Brewer & Co. to pay libellant $1,470, alleged to be due for cargo charges and which is withheld because of breakages in the machinery and material in question which the Horda discharged on the wharf at Kaunakakai, Molokai. O. B. Stillman is one of the firm of Brewer & Co., at Boston, Mass.

The S. D. Carleton will tow to Kahului to load sugar. She will first take about 300 tons of sugar as stiffening.

IN THE CIRCUIT COURT, FIRST CIRCUIT OF THE HAWAIIAN ISLANDS.

In the Matter of the Heirship of Myron J. Rose, of Honolulu, Oahu, Deceased.

On reading and filing the petition and accounts of F. A. Schaefer, executor of the will of said deceased, wherein it asks to be allowed fees, and asks that the same may be examined and allowed, and that a final order may be made of distribution of the property remaining in his hands to the persons therein entitled, and discharging him from all further responsibility as such executor, it is ordered that Friday, the 8th day of June, A. D. 1900 at 10 o'clock a. m., at the courtroom of the said court, at Honolulu, Island of Oahu, be and the same hereby is appointed as the time and place for hearing said petition and accounts, and that all persons interested may then and there appear and show cause, if any they have, why the same should not be granted, and may present evidence as to who are entitled to the said property.

Dated at Honolulu this 16th day of April, 1900.

By the Court:

HENRY SMITH,
Clerk.

2169—3F April 20-27-May 4.

IN THE CIRCUIT COURT, FIRST CIRCUIT OF THE HAWAIIAN ISLANDS.—IN PROBATE.—AT CHAMBERS.

In the Matter of the Guardianship of Margaret A. Robertson, an Insane Person.

Upon reading and filing the petition of Eliza M. Cassidy, of Honolulu, Oahu, alleging that Margaret A. Robertson is a person of unsound mind, temporarily residing at Stockton, California, U. S. A., but having property, both real and personal, in Honolulu aforesaid; that it is proper that a guardian should be appointed, and praying that John Cassidy be appointed guardian of the person and estate of said insane person, it is hereby ordered that Monday, the 21st day of May, 1900, at 10 o'clock a. m., in the Judiciary building, Honolulu, Oahu, is appointed the time and place for hearing said petition, when and where all persons interested may appear and show cause, if any they have, why said petition should not be granted.

Honolulu, H. I., April 20, 1900.

By the Court:

P. D. KELLETT, JR.,
Clerk.

A. W. CARTER,
Attorney for Petitioner.

2170-3t. Ap. 22 27; May, 1, 4, 8, 11, 15, 18.

NOTICE TO CREDITORS.

THE UNDERSIGNED HAVING been appointed executor of the last will and testament of Catharine Morgan, late of Honolulu, deceased, hereby gives notice to all persons having claims against the estate of said deceased to present the same duly authenticated and with proper vouchers, if any exist, and whether secured by mortgage or otherwise, to the undersigned, at his office on Queen street, Honolulu, within six months from date or they will be forever barred.

JAMES F. MORGAN,
Executor of the Will of Catharine Morgan, Deceased.

Honolulu, April 3d, 1900.

2165—10t-6, 10, 13, 16, 20, 24, 27, 1, 4, 8.
