PINEAPPLE SUCCESS.

Reports received by the promotion committee indicate that the pineapple juice enterprise is the biggest thing that the local pineapple growers have yet taken up. "It insures the permanency of the pineapple industry here," said Secretary H. P. Wood, who has just returned from an extended trip to various mainland centers. Seldom has any new product had a quicker success than this pineapple juice, and the indications are that the local plantations will not be able to supply the American market.

FEDERAL BUILDING SITE.

The federal building site problem is once more "in the air." The purchase of the Mahuka site, with the additional plan of adding to it by acquiring the whole of the Fort street frontage adjoining the site, has had the effect of tying up the whole proposition. In view of the plans upon which the officials in Washington insist, the government is now practically without a site for a building in Honolulu. The officials will not go ahead with a building on the Mahuka site as already acquired, and they can not get the additions to it which they want, under any present act of congress.

In view of this deadlock there is some discussion of plans to turn to other sites. The Irwin site is supposed to be still available, and is favored in Washington. Much of the strength of the opposition to it here, like the anti-prohibition strength, was due to an impression which was abroad that there had been efforts to work for it in Washington over the heads of the local community. It appears now to be an accepted political principal that the way to kill local support of any proposition is to try to have Washington act before the people here are heard from, and the Irwin site suffered from the workings of this rule.

Another proposed site is the block Waikiki of the Stangenwald building, which it is said can be had for $250,000. However, there is no particular activity here in favor of any site. It is up to Washington. The only people very busy here just now are those who think they see an effort to get about half a million dollar's worth of real property from them under an appropriation of only $350,000 for a federal site.

NEW WATERFRONT STREET.

The extension of Bishop street to the waterfront is to be taken up by a committee of the chamber of commerce. The directors have discussed the matter of applying money for the extension of the street, and efforts will be made to have the work forced through. One of the principle questions passed up to Superintendent of Public Works Marston Campbell in connection with the proposed extension is that of whether the street shall be a straight line, or shall be turned so as to avoid the necessity of condemning buildings now occupying the land which will be needed if the street is to be straight. At the last meeting of the trustees of the chamber of commerce a committee was asked to take the matter up, with a view to seeing if there were funds available to extend the street. The opening of this street to the waterfront would have quite an important effect on local traffic, as it would provide a new avenue for business between the waterfront and the business center.

QUARANTINE WATER SUPPLY.

A water system, to cost something like $10,000 is to be established on Quarantine Island. The contract has been awarded to the Honolulu Construction and Draying Company and work will begin in a few days.

Water will be carried from the city in a pipe beneath the Iwilei channel. At Mauliola it will enter the Quarantine Island system, which consists of pipes leading into all the buildings and over the island.

The soil on the island is rich, and with an adequate amount of moisture it will be an easy matter to cover the entire unoccupied spaces with green grass and beautiful flowers, making of the island a most pleasing sight from the harbor, as well as far more attractive to occupants.

HAWAII MILL CROP.

The Hawaii Herald of Thursday said: The Hawaii Mill Company has finished grinding and is now cleaning up after the season's run. The output for the season was 2300 tons, or about 350 tons short of Manager W. H. Campbell's estimate. The cane looked good all through the season but would not produce the sugar for some reason which is hard to explain. This is the second year that this has happened at Piihonua. The prospect for a larger crop for the coming year is very good.

NEW ROCK CRUSHER.

J. J. Belser, of the Honolulu Construction and Draying Company, who returned by the Wilhelmina from the Coast, purchased a mammoth rock-crushing plant which will be installed at the quarry of his company in Kamoiliili. The plant cost in the neighborhood of $30,000. The machinery includes two crushers, one turning out any size of rock and the other making sand. The combined machinery will turn out for delivery a total of 900 yards rock and sand per day.

Fire Insurance in the United States.

At the recent forty-ninth annual meeting of the National Board of Fire Underwriters in New York, the following table showing the underwriting results in the United States for the year 1909 was submitted, viz:

Premiums, fire, marine and inland	$271,760,361	
Losses paid, fire, marine and inland		$131,184,351
Increase in liabilities during the year (outstanding losses unearned, premiums and all other claims)		18,520,586
Expenses		104,628,486
Profit (6 41-100 per cent. of prems.)		17,426,938
Total	$271,760,361	$271,760,361

The result for 1909 resulted therefore in a profit of 6.41 per cent. on premiums received, while the ten year table of underwriting results shows a loss to the companies of 2.8 per cent. for the period of 1900 to 1909 inclusive.

LOOKS BAD FOR ANY CONSOLIDATION PLAN

Business Interests Receive the Suggestion Coldly and Call It Impractical.

YOUNG HOTEL [illegible] FINE SHOT-HOOK [illegible]

[illegible]

ONLY EIGHTEEN DAYS MORE TO REMAIN IN ACTIVE SERVICE

[illegible] Ohio, September 4, 1848, though he easily passes for at least ten years younger than he is. He enlisted when sixteen in the Fifty-fourth Ohio Infantry Veteran Volunteers, and served during the remainder of the Civil War in Sherman's army through the battles of Resaca, Dallas, Kennesaw Mountain, Atlanta, the pursuit of Hood, the march to the sea, the storming of Fort McAllister, the walkover of the Carolinas, the Bentonville struggle, the surrender of Johnston, and the grand review at Washington.

A year after the close of the war he entered the U. S. Naval Academy, remaining in the naval service ever since. He has traveled the world in twenty of every type. He was in Honolulu in 1873 as an officer of the sailing sloop-of-war Portsmouth, at the time of the death of Lunalilo. Three years later he was here in the Lackawanna in the Essex in 1887, and aboard a mail steamship in 1890.

At the battle of Manila he was executive officer and was on the bridge with Admiral Dewey aboard the Olympia, being promoted for eminent and conspicuous conduct in battle.

KITT EXONERATED IN MONGOLIA CASE

Captain of Liner Not Blamed for Stranding Off Shimodzu in July.

Capt. E. P. Kitt, commander of the Mongolia of the Pacific Mail line, was exonerated of all blame for the stranding of the vessel off Shimodzu, Japan, last July, the exoneration coming from the United States marine inspectors on August 11. Captain Kitt is still holding his position, and will probably continue to do so. The inspectors made a thorough investigation of the accident, and when all the evidence was heard were of the opinion that Kitt managed the liner remarkably well in the circumstances. He came in on the bridge yesterday.

Thus far Kitt has been designated as acting commander, and R. P. Schwerin, general manager of the Pacific Mail, will settle finally the skipper's status upon Schwerin's arrival at San Francisco after he has completed the tour of inspection which was begun some time ago.

Captain Morton, who was given leave of absence during two voyages of the Mongolia, may return to his position when the liner gets back to San Francisco. If he does, Kitt may be given some other command.

The Mongolia was not placed in a drydock at San Francisco, as an inspection made by professional divers at Yokohama proved that no injury had been done to the hull.

Kitt was in high spirits yesterday, for he had been relieved of considerable mental strain, due to the fact that he did not know before the investigation what his fate would be.

The Spanish ambassador to France declares that the report that King Alfonso is showing signs of mental weakness is a vicious invention of the clerical press.

HAWAII GUILTY OF RACE SUICIDE

Deaths Increased 61 Last Year While Births Fell Off by 600.

Is race suicide to hold Hawaii back from taking her proper place in the Union? Some figures made public by Governor Frear yesterday are rather startling and certainly suggest that it might be well for Colonel Roosevelt to drop the political game in New York for a time and come out to the Islands to enunciate once more and more emphatically his views on the matter of perpetuating the species.

The Governor's figures show that last year, on an estimated basis of 190,000 population in Hawaii, deaths increased sixty-one over the previous year while births fell off no less than 600. The only comforting figure is that of marriages, which increased 311. Governor Frear, on the ground of the last figure, expresses the hope that this year may make a better showing as regards the ratio between deaths and births.

On the basis of 190,000 population, which is larger than any other estimates that have been made, the ratio of deaths is 14.42 per thousand, the total number of deaths during the year being 2912. Births numbered 4302, a ratio of 22.6 per thousand. It may be seen that the number of births was considerably greater than the number of deaths, but the significant point is that births fell off 600 while deaths increased by 61.

PICKED MAUI TEAM LEADS WASEDAS IN SECOND GAME

WAILUKU, August 18.—At the end of the third inning of the second game between the Waseda baseball team and the picked Maui nine which is on here this afternoon, the Maui team had scored one run to the Wasedas nothing. The visitors leave here tomorrow to return to Honolulu.

[illegible] HAS A CUP TO DONATE

[illegible]

A DISINTERESTED SUGGESTION.

"What did you say to the policeman who arrested you for speeding?" inquired the friend.

"I told him I was going after a doctor," replied Mr. Chuggins.

"Did he believe you?"

"I don't think so. He said that if I didn't want to pay a fine I'd better change my mind and go after a lawyer."

The Idaho primary law is held unconstitutional.
