TWO LIE DEAD IN MORGUE RESULT OF BURGLARY ATTEMPT

Three Bullets Sniff Out Life of Japanese Who Resists Early Morning Intruder

SLAYER ALTHOUGH YOUNG HAS LONG BEEN CRIMINAL

Gun Explodes While Telling Crime To Supposed Partner and Kills Filipino

A bloody murder, the crowning climax of a young and wasted life; and the inevitable hand of Fate laid with deadly intent upon one who, while taking no active part in the crime, is, nevertheless, believed to have assisted in the planning of the same — such were the principal elements of a double tragedy early yesterday morning, the like of which, for bizarre features, has no equal in local police annals.

Otokichi Hoshino, a Japanese fisherman, lies in the morgue, the life shot out of him by a young Hawaiian who, meeting with unexpected resistance while engaged in robbery, shot, and shot to kill.

And keeping him company in the silent morgue is the body of Isidoro Elsinore, a young Filipino, believed to have been a partner in crime of the man who killed the Japanese, and who was accidentally sent to eternity with a bullet from the same gun.

In a cell at the police station is locked up Kapeliela Kacha, a Hawaiian youth of barely twenty summers, and today will be written against his name on the police docket the awful charge of murder.

The Crime

The thumb-nail sketch of the crime and its dramatic denouement:

Early morning. A Japanese man slumbering peacefully. A stealthy step in the room. A cry of alarm. A figure, gun in hand, backing out of the room. A shot. A struggle. Another and still another shot. The dull thud of a falling body. Cries of alarm. The pursuit. Another shot. The getaway. The home-coming of the murderer. The greeting of his sick comrade. The recital of the crime. The explanation of why and how the shots were fired. The shot of Fate. The thing on the bed. The arrest.

Kapeliela Kacha and Isidoro Elsinore shared a room in a shack on Kukui Lane, in the rear of the residence of Dr. K. F. Li. Kacha has always been a bad man and latterly has shown no sign of having mended his ways. He was a member of the gang of reform school boys who two years ago fomented a mutiny at the Waialee institution, threatened Principal Tucker, and escaped to the hills. For this escapade, Kacha served a term in prison.

Robbery is Planned

Following the commission of a series of petty robberies, Kacha and Elsinore planned to rob Hoshino, early yesterday morning. The Japanese was believed to have received a considerable sum of money as his share of a fishing enterprise, and the haul was expected to be a fat one, and well worth the risk entailed.

Then the Filipino fell ill, and Kacha volunteered to do the job himself, promising to return to his lodgings and report to his sick partner, the success or otherwise of his nefarious expedition.

Neither the Filipino nor the Hawaiian thought that they would meet with any resistance. Their carefully laid plan was to enter the room of Hoshino at such an hour when he might be counted upon to be asleep, render him insensible with a crack on the head, and then to remove the money, which they had reason to believe the Japanese carried on his person.

Kacha entered the room of Hoshino, which was on the upper story of a two-story house in the Fujii camp, near River Street, about half-past three o'clock.

Shoots His Victim

Things didn't work out as the would-be robber expected, however, for he stumbled over some object before he had taken many steps in the room, and the noise awakened Hoshino, who cried out in the night. Made desperate with fear, Kacha drew his gun, a service revolver of foreign make, and fired point blank at the Japanese, whom he could see by the light of a lamp which was in the room. The bullet struck Hoshino in the right shoulder, but the latter grappled with the intruder, who fired again, this time splintering the right wrist of the Japanese. Still the wounded man clung to Kacha, who placed the muzzle of his revolver against the heart of his adversary and pulled the trigger. Hoshino fell backward, striking his head against some object and cutting his scalp.

Slayer Flees Scene

Kacha fled from the room, as the neighborhood had been awakened by the three shots, and a hue and cry was raised. At the bottom of the stairs Kacha was confronted by another Japanese named Miyuda, who sought to stop him. The murderer fired a shot at him, the bullet inflicting a superficial wound in his hip.

In the clamor which ensued, Kacha made good his escape. The ambulance bore the body of Hoshino to the morgue, and the police set out on a search for the murderer.

Kacha went straight back to his room in Kukui Lane, and found Elsinore lying in bed awake, and awaiting his return. He started to tell the story of his adventures, and to make the recital more graphic, when it came to describing the shooting of Hoshino pointed the gun at the Filipino. Just how it happened no one knows, but there was a blinding flash, a roar, and Elsinore fell back on the bed with his liver shattered and his life-blood soaking into the thirsty sheets. This was shortly after four o'clock.

Police Arrive

Outside the door of the room a crowd gathered, but only one man dared venture within. He was a Hawaiian named David Kapaona. And while Kacha, every vestige of nerve gone, was sobbing out an explanation of the bloody sight on the bed, the police entered the room and took both men to the station.

Again the ambulance appeared and the Filipino, in whom some trace of life was noticed, was rushed to the emergency hospital. That his hurt was mortal was plain to be seen, and it was not long before he, too, lay stretched on a slab in the morgue.

The gun used was a 38-40 caliber revolver, evidently a service gun of some strange foreign make. It fired a missile like a rifle bullet, quite flat at the end and spirally grooved on the exterior. The same kind of bullet was found in both bodies.

That the bullet was of an extraordinary punishing nature was shown by the wounds inflicted. Hoshino's heart looked as if something had exploded in it, and the liver of the Filipino was a disintegrated mass.

Hoshino leaves a family of six daughters, the oldest of whom is twenty-three and the youngest nine. He also has a young son living.

CONTINUANCE OF MINERAL PRODUCTS COMPANY IS HANGING IN BALANCE

Lack of Interest Shown By Small Attendance At Special Meeting and Some Evidence of Possible Opposition To Reincorporation Appears At Close of Session — Adjournment Is Taken To September 13

Owing to the fact less than sixty per cent of the stock of Mineral Products Company was represented at the special meeting of the stockholders of the company yesterday afternoon no action looking to the incorporation of a new company under the laws of Hawaii and the transfer of the property of the old company, incorporated under the laws of the State of Nevada, was taken. Such action is essential unless the entire project is to be abandoned and the property of the company to go to the creditors or the affairs of the company otherwise wound up and the creditors paid. Which course will be taken remains to be determined and toward the close of the meeting yesterday afternoon the issue appeared to be somewhat in doubt. Another effort to hold a meeting with a sufficient stock representation present is to be made a week from Thursday.

Attendance Is Too Small

Stockholders of the Mineral Products Company comfortably filled the assembly room of the chamber of commerce yesterday afternoon but the attendance was insufficient to undertake the business for which the meeting was called. The law requires that the proposed resolutions transfering the property of the old company to the new one which is to be formed shall be passed by an affirmative vote of sixty per cent of the shares of the company. Not only was there not that percentage present at the meeting but it is by no means certain that if there had been the vote would have been unanimous for there were indications at the close of the meeting that some opposition or objection to the plan may be raised.

Reports First Read

Yesterday's meeting was called to order by President Judd of the company and a committee of shareholders was named to look over the credentials and proxies of the stock represented. While this committee was at work Mr. Judd read the last reports of Robert Anderson, the manager of the company, and the report of Robert D. Pike on the manufacture of basic carbonate of magnesia from the magnesia bearing mineral deposits of the company and his recommendation for the putting in of a semi-commercial plant at a cost of $1320.

The reports read, Mr. Judd informed the meeting that the report of the committee showed that there was represented at the meeting 1,109,737 shares of the company stock and that it was required that the resolutions be passed by a vote of sixty per cent of the stock and that the required shares were not present so that it was evident that the proposed action could not be taken at the time. He advised that a motion be made to adjourn for a week and meantime for each one then present to act as a committee of one to secure as many proxies as possible so as to insure the required representation at the next meeting. Such a motion was made and later amended to Thursday of next week because the Civic Convention will be meeting Monday and Tuesday and the chamber of commerce rooms will not be available Wednesday.

Signs of Trouble Appear

It was before the putting of this motion that indications appeared that there might be some opposition to the plan proposed unless more full information on probable results, in financial returns, from a commercial plant if experiments were successful with the smaller plant. It may be that the project of a new company will go through all right or it may be that at the next meeting there will not be the required sixty per cent present or if there is that the full sixty per cent will not vote in favor of the resolutions. The lack of interest taken in the proposed reorganization yesterday was not encouraging to the plans of the directors.

Only Two Courses Open

In making his announcement of the insufficient attendance President Judd said that there were but two things to do. One was to incorporate under the laws of Hawaii, turn over the property of the company to the new corporation, levy and pay assessments, in short to carry out the proposals mentioned in the call for the meeting, or to abandon the whole Mineral Products Company project, liquidate its affairs or turn the property over to the creditors. Personally he favored the first mentioned plan.

Magnesia carbonate is in demand and the stockholders of the company know that they have it in large quantities seventeen miles from the end of their railroad, said Mr. Judd. It is no secret process that is needed to make it marketable. It remains to get the data as to costs, methods, etc. and to determine how much is required for a plant and how much that plant will produce for the company.

Makes No Excuses

It may be said that the company should have worked this deposit when the railroad reached the point where it could be handled. Personally he had favored doing so but a majority of the directors had not. But it was now too late to consider what might have been or should have been done at that time.

If the property consisted of only manganese or manganese dioxide, after the reports they had received on those minerals on their property, he would favor abandoning the whole project, but owing to the reports on carbonate of magnesia, owing to the recent reports of Mr. Anderson, he favored going ahead under the new incorporation plans. He took occasion to tell how careful Mr. Anderson was, how accurate in all the information he gave out and how consistently reliable. Under those circumstances Mr. Judd felt that the reports of Mr. Anderson should bear weight and his proposals be considered worthy of a trial. There was no similar deposit in the whole country to the large one the company has on its property so far as the directors can learn. None that can be handled so simply and easily.

Before putting the motion Mr. Judd asked if any one of the stockholders had any questions he or she desired to ask and it was then appeared the first signs of possible opposition to the plans of the directors.

Pertinent Questions Asked

Chas. G. Heiser asked what assessments would be necessary and was told what the directors had given to the press, that the plan was for a two per cent assessment each month for five months. Heiser asked whether this would not raise $200,000 and was told it would if all assessments were paid and that all would not be needed if the indebtedness were not to be paid and it seemed not worth while to pay notes when payment was not asked. Heiser then asked about the cost of the proposed magnesia factory and was told that it was impossible to determine that until after the experiments with the semi-commercial plant had secured sufficient data. It had been mentioned that the cost might be $60,000 but manager Anderson had been careful not to make definite statements on such cost without data to go on.

Explains Small Attendance

Mr. Heiser here said that perhaps it was lack of definite information that had reduced the attendance at the meeting to below the required percentage to pass the proposed resolutions. He added that without more definite information there might not be the required sixty per cent at the next meeting and even if there were it was by no means a certainty that the vote would be unanimous or even be the required proportion of total shares of stock.

Continuing Heiser asked if some other proposition might not be tried. Might it not be possible to raise by voluntary assessment the amount needed to put in the semi-commercial magnesia plant? He wanted to know how much would be required to put in such plant and operate the company until the experiments were completed and the necessary data obtained and how long this would take.

Mr. Judd replied that to put in the plant and get required data would probably take about three months, and the total expense in that time would be about $17,900.

It was then Mr. Heiser said that stockholders wanted to know before putting more money into the company how much profits the magnesia plant would show a month. Abandoning the manganese and manganese dioxide projects left only the magnesia project to hang to. Would this net enough to warrant the investment already made, and what would have to be put in in the payment of assessments? Already much money had been lost in experiments, and this was a request to put up more money to try another experiment. Stockholders wanted to know that if such experiment was a success that there would be a satisfactory return and not merely enough to get back the cost of the new factory. With the capital of the company as large as it will be, would returns from this one mineral be sufficient to pay dividends?

Mr. Judd informed Mr. Heiser that the proposed reorganization was the result of mature consideration and the best judgement of the directors, and said that if any stockholder did not like this plan it was for him or her to propose a feasible alternative plan. He asked if he had one, and was informed by Mr. Heiser that he had nothing definite at this time.

Then the motion was put and carried to meet again in the chamber of commerce rooms on Thursday, September 13, and adjournment taken to that date.

In the course of answering Mr. Heiser, Mr. Judd said that the questions Mr. Heiser asked as to maximum possible profits from carbonate of magnesia had been asked relative to manganese and manganese dioxide, and it was the expectation of estimated profits on these that had induced many present stockholders to buy. He asserted that although he himself had entered into the company believing that it was good, he had never advised any one to purchase stock in the company, and when asked for advice had declined to give it pro or con to those who were contemplating buying.

Henry Williams was fined ten dollars and costs by Judge Harry Irwin yesterday for throwing Alexander Kaanaana, an old boatman, into the harbor while he was ferrying him and his friends over to the lighthouse. Williams was steering a zigzag course, and Kaanaana insisted on relieving him. This piqued Williams, and he tossed the old man overboard into the drink.

TWO KILLED WHEN BOILER EXPLODES

Cause of Disaster At Pearl Harbor Not Yet Determined; Possibly Weak Plate

An exploding boiler caused the death of C. W. Weatherwax and G. W. Fuss, at Pearl Harbor drydock yesterday morning.

The accident occurred while getting up steam in a big upright boiler situated at the end of the naval drydock at present in course of construction.

Weatherwax and Fuss had charge of the operation of the boiler, and were standing near by. Their bodies were horribly scalded and mangled by escaping steam and flying pieces of metal. So great was the force of the explosion that fragments of the boiler were hurled a great distance, while another boiler near by was also wrecked.

Had the explosion occurred a few minutes later, when a number of men would have been engaged on the drydock, it is probable that the list of casualties would have been greater.

Cause Not Determined

Neither Capt. George R. Clark, commandant of the Pearl Harbor navy yard, nor Walter F. Dillingham, of the Hawaiian Dredging Company, which employed the men, were able to state the cause of the explosion last night.

Owing to the shattered condition of the boiler it is exceedingly difficult to collect evidence which would determine just what caused the explosion. So far as can be ascertained, it was not due to the common cause of boiler accidents—lack of water. There is evidence that there was sufficient water in the boiler, for the watchman, after the fires in the boiler were started noticed that the water gauge was working and that the water in the gauge was rising. The tubes were not burned out, so the explosion must have been due to other causes. It is thought probable that there was a weak spot in some boiler plate, which let go when steam was applied.

Families Left Fatherless

C. W. Weatherwax, who is a nephew of Charles W. Weatherwax, the well known photographer, resided at Kalihi and leaves a wife and family.

G. W. Fuss resided on West Fifth Avenue, Kaimuki, and leaves a wife and two small children.

Funeral services for the two men will be held this afternoon at the undertaking parlors of H. H. Williams, commencing at three o'clock, and will be under the auspices of the Knights of Pythias. Interment will take place in Nuuanu cemetery.

HAWAII PLANT IS ADVISED TO QUIT

Waste Molasses Cannot Be Turned Into Beverages

Refuse waste molasses may be used for the manufacture of alcohol for other than beverage purposes but cannot be used for distilling into alcoholic beverages. This is what Ralph S. Johnstone, acting collector of internal revenue has been advised from Washington. The decision is under the Food Control Law which prohibits distilling of beverages.

Since there was a distillery on the Big Island which has been making rum from waste molasses the acting collector has informed its management that it must cease so making alcoholic beverages though it can make alcohol for commercial purposes other than sale for beverage purposes.

ENTRY OF MEXICAN SHIP TO AMERICA QUESTIONED

MEXICO CITY, August 31—(Associated Press)—The Department of Communications is investigating whether the Mexican Navigation Company has the right to sail the steamships Cometa and Yucatan to a United States firm. The vessels have been sunk in the Panuco River near Tampico for over two years and it is alleged by the Department of Communications that they were definitely abandoned by the company but that the latter attempted to resume title when the entry of the United States into the war caused tremendous demand for all sorts of vessels and American firms desired to buy the rights to the vessels and raise them.

FOUR AUTOPSIES ARE PERFORMED BY AYER

Four autopsies were performed by Dr. R. G. Ayer yesterday. Those posted were the victims of the shooting affairs early yesterday morning; an old Hawaiian woman named Kama Opuroi, who was run over by a train near Waipahu, and Capt. John Scott, a mate in the service of the Inter-Island Steamship Company, who died on Sunday night from the effects of injuries sustained aboard the steamer Claudine a week or so ago. A cement mixing pan crushed his foot and blood poisoning set in, which resulted in death.

Capt. Richard H. Kimball, who left for the mainland on a recent transport, has been assigned temporarily to the commission on training camp activities in Washington, D. C. Captain Kimball was formerly an officer of the Fourth Cavalry, Schofield Barracks, and was aide to Brig. Gen. John P. Wisser when the latter was commander of the Hawaiian Department.

DUTCH CRUISER ZEELAND IN PORT

Training Ship For Ensigns On Way To Batavia—Sailed From Holland Early In June

The Dutch training cruiser Zeeland arrived in port from San Francisco about noon yesterday, eleven days out from the Bay City. Four days of the voyage down were devoted to target practise, the cruiser being fitted with twelve three and six-inch guns. She also carries four anti-aircraft guns. The Zeeland, a craft of four thousand tons, sailed from Den Helder on June 7 and proceeded leisurely, stopping en route at New York, Bozaire, Curacao, Colon and San Francisco.

The vessel is a training cruiser for ensigns, there being fifteen aboard. She has a complement of three hundred and fifty sailors. She is scheduled to sail for the Nederland East Indies some time next Monday and probably will arrive at Batavia about the first of November.

A boarding visit to the Dutch cruiser Zeeland was made yesterday morning by Lieutenant Harold F. Loomis, representing the commander of the Hawaiian department, Colonel Lucius L. Durfee. After this courtesy call Captain C. Focke, commanding the cruiser, made a call on Colonel Durfee at army headquarters in the Young building.

Colonel Durfee will return the call on board the cruiser tomorrow. The Zeeland, which has come from Holland by way of New York, Panama and San Francisco, will remain here until next Monday. Another round of calls will be made when the Dutch battleship Trompe arrives from the Dutch East Indies tomorrow.

PRICE OF SUGAR IS INCLINED TO SHADE

Shading off in sugar prices that is to be expected in view of the proposed fixing of prices by the food controller through the refineries indicated by the report received by Alexander & Baldwin from its New York representative yesterday. This message said:

"Market still unsettled account of Washington situation. Sellers intimate wood accept 6.89—6.77 for Cubas September, but refineries ideas 6.62. Sales during week small."

If refiners are to reduce their output of cane sugar to a parity of price with beet it would mean a corresponding reduction in the price of raw cane sugar. It is more natural that in the meantime the price should gradually shade down than that the cut should come all at once. If refiners are to get their raws at a lower price than now a month hence, they can well reduce output meantime and cessation of demand would inevitably result in a lowering of price.

NO SAN FRANCISCO MARKETS

Yesterday was observed as Admission Day in California and there were no sessions of the stock markets.

TREASURY DEPARTMENT.

Office of Comptroller of the Currency.
Washington, D. C., August 3, 1917.

WHEREAS, by satisfactory evidence presented to the undersigned, it has been made to appear that "THE ARMY NATIONAL BANK OF SCHOFIELD BARRACKS", located at Schofield Barracks, in the City and County of Honolulu and Territory of Hawaii, has complied with all the provisions of the Statutes of the United States, required to be complied with before an association shall be authorized to commence the business of banking;

NOW, THEREFORE, I, JOHN SKELTON WILLIAMS, Comptroller of the Currency, to hereby certify that "THE ARMY NATIONAL BANK OF SCHOFIELD BARRACKS", located at Schofield Barracks, in the City and County of Honolulu and Territory of Hawaii, is authorized to commence the business of Banking as provided in Section Fifty-one hundred and sixty-nine of the Revised Statutes of the United States.

In testimony whereof, witness my hand and Seal of office this THIRD day of AUGUST, 1917.

(Seal)

JNO. SKELTON WILLIAMS,
Comptroller of the Currency.

IN THE CIRCUIT COURT, FIRST TERRITORY OF HAWAII.—TREASURER'S OFFICE, HONOLULU, OAHU.

In re Dissolution of the Waimea Machine and Automobile Works, Ltd.

Whereas, The Waimea Machine and Automobile Works, Ltd., a corporation established and existing under and by virtue of the laws of the Territory of Hawaii, has, pursuant to law, in such cases made and provided, duly filed in this office a petition for the dissolution of the said corporation, together with a certificate thereto annexed as required by law.

Now, therefore, Notice is hereby given to any and all persons that have been and are now interested in any manner whatsoever in the said corporation, that objections to the granting of the said petition must be filed in this office on or before 12 o'clock noon of September 24, 1917, and that any person or persons desiring to be heard thereon must be in attendance at the office of the undersigned, in the Executive Building, Honolulu, at 12 o'clock noon of said day, to show cause, if any, why said petition should not be granted.

HENRY C. HAPAI,
Acting Treasurer Territory of Hawaii.
Honolulu, July 2, 1917.

PASSENGERS ARRIVED

By steamer Mauna Kea from Hawaii yesterday, September 8—R. McLean, G. Patton, E. Todd, E. Berthlemna, Miss Campbell, Mrs. and Miss Hiseruman, Mrs. Hoogs and daughters (2), H. Meir, E. S. Elmore, S. H. Spencer, Miss Bailey, Miss Madden, Miss Levy, Miss Viears, A. A. Scott, Mrs. Scott, Master Richardson, C. L. Desky, Misses Balding (2), Miss Reid, Susanaga, Masters Low (2), Mr. and Mrs. Helbush, Mr. Rock, Master Kauhane, T. Forbes Jr., H. Kellner, Mrs. Rickey, Mrs. Waldron, Miss Hino, L. Hino, Kazumi, Miss Kikele, Miss Bray, Saul Steinhausser, Miss Kim, Miss Pahk, J. Kauekele, Miss Murray, Miss H. Kauuha, Harrison, C. M. Lewis, M. A. Nicholl, M. Prosser, H. Beatty, A. L. Castle, Miss E. Gibb, Miss Hockley, Otto Rose, Master Campbell, E. C. Nichols, W. F. Young, Master Coleman, Miss Ayau, Miss Bertleman, Miss Watson, Misses Black (2), Mrs. Makainai and children (4), Miss Kahalaikuland, Miss Ahin, Masters Beers (2), Miss Cornell, Mrs. Ah Pu and children (2), Akioka, J. H. Brosn, T. Saikai, L. Wilfong, Miss Akiau, Miss Kamikani, Miss Talse, H. Kinney, G. E. Koone, Edmonton, Mrs. T. Murray, Tashiro, D. J. Davis, M. A. Nicholl Jr., Miss Anderson, H. Roenen, Young Hing, Miss Kauhane, H. Kalau, R. J. Brown.

FROM MAHUKONA—Miss Austin, Mrs. Madden and son, Mrs. Bucholtz, Master Little, W. S. May and children (3), Miss Kamam, Miss Baden, Mrs. Kahookano and infant, Master Rodenhurst, Misses Rodenhurst (4), Miss Wong, D. L. Rosenfledt, Mrs. Lewis and son, Miss Kong, C. Al, Miss Harbottle.

FROM KAWAIHAE—Miss Rickard, Mrs. Silva, Miss Silva, Miss Pritchard, Master Spencer (2), R. H. Smith, Mrs. Lindsay and family, Master Cummings, H. Kauhane.

FROM LAHAINA—Mrs. Huva, Miss Wadsworth, Mr. Wadsworth, Miss Soper, Akoia, Mr. Gomes, Mr. and Mrs. Britou, C. Richardson, C. Baldwin, G. G. Seong and family, V. Richards, W. Beckett, Miss Sato, Miss Simpolda, Miss Tautayo, Miss Wise, Miss Davidson, Misses Freeland (2), Master Freeland, Mrs. Slogett and son, F. J. Cadey, Miss Lindsay, Miss Gregory, Miss Cockett, Mitaoka, Kim Kong, Miss Tolinda, Mrs. Hirashima and children (2), Miss Ahena, J. Tim Ho, L. Mamae, C. Farden, Terakawa, H. Kahi, Misses Martinez (2), R. Silva, Miss Yamoyoshi, R. David Kauhane, Ah You, Mrs. Wadsworth and son.

PURSER T. STRATHAIRN TO LEAVE FOR FRONT

Purser T. Strathairn of the Mauna Kea, will leave for the training camps of England with the second Hawaii contingent of British recruits on the Niagara, sailing about September 18. W. M. Mitchell, superintending landing clerk for the Inter-Island here, probably will succeed Mr. Strathairn. Mr. Mitchell has been purser of the Mauna Kea before, having left the ship about three months and a half ago to accept his present position.

SERVICES FOR LATE CAPTAIN ARE HELD YESTERDAY

Capt. John Scott, first mate of the Claudine, died at his residence, 833 South Queen Street, at four o'clock yesterday morning and was buried in the family plot at Nuuanu cemetery at five o'clock yesterday afternoon. Captain Scott was in the employ of the Oahu Shipping Company for some time, later accepting a position with the Inter Island Steam and Navigation Company, in whose employ he was at the time of his death. It is said his death was the result of an injury received aboard his ship about two weeks ago when a concrete mixing pan fell and crushed his foot, blood poison setting in shortly after. He is survived by a widow.
