THE NEW BOARD OF EDUCATION.

Elements Entering Into the Contest.

The Minneapolis end of the GLOBE wishes to add a word to the general discussion relative to the election of a school board, and to urge the adoption of the oft-repeated yet important suggestion that the matter be considered as entirely non-political. The intimation of a nomination of the members by delegates selected by each party convention, upon an entirely impartial basis, seems hardly practicable, and THE GLOBE believes that better results will accrue if the nominations are made separately and in the usual manner. There being but one sentiment upon the question of having the board composed of the most representative and liberal men that the city affords, each party will, undoubtedly, make the best nominations possible, knowing, as they do, that upon these nominations depend, to a certain extent, the strength of the remainder of the ticket. The brightest jewel in the crown of honor and fame which Minneapolis wears, is her public school system. The school buildings are not only among the finest in the city, but rank in architectural beauty and scientific and practical construction, among the finest in the United States. The very best teachers are employed, and it is a subject of common remark that each grade ranks a degree higher than the public schools of Massachusetts and other educational centres. This it will not be denied is largely due to the individual efforts of the gentlemen who have for years past comprised the boards of education, and more than all to the perfect administrative superintendency under which they have been recently placed. That just as there are several important financial measures pending, and as new territory and property is being acquired, it is to be regretted that the late legislative enactments necessitate the election of an entire new board of managers. Yet such is the case, and Minneapolis should accept the situation by using every effort to see that the school matters are placed in the hands of men who will not cast a shadow over the splendid record already made. It is a duty that every man (and woman) owes to the fair name of the city, their own prosperity and to that of future generations. The principal regret, however, which Minneapolis has to offer, is the shameless fact beyond all dispute that the new election has been seized upon by a small clique as an opportunity for personal revenge and of displacing superintendent Tousley. THE GLOBE urges the claims of no men beyond the very best men, for the positions, but does object to the entering in of private and personal jealousies in the matter. A superintendent of schools from the very nature of his office, cannot administer justice so that it will accomplish the greatest good to the greatest number without making enemies. That principals of different schools cannot be transferred from one building to another, or that children may not study what they please and when they please, without reference to grade, at the every whim of one or two capitalists and prominent citizens, should be no cause for the election of a board of education that would remove an acknowledged good superintendent of schools. It should rather be urged as an important reason for his retention. The management of the Athenæum library, also, does not and should not be allowed to enter into a question so vital in its importance. These statements are made not from any fear that individual spite will rule the day, but to show that such elements are quietly at work, and to give the people a chance to forever stamp them with condemnation and to bury them so deep as never again to have the audacity to appear in a contest where the entire people are interested. Let the importance of the matter be understood, and the voters of Minneapolis are to be trusted for the result. Let the school interests of Minneapolis be protected as you would protect your honor or your virtue.

As per previous call, the prohibitionists held a nominating convention last evening, a large number of persons present. Col. Spooner was called to the chair. O. C. Merriman, C. McCreeve and D. W. Getchell were appointed the ward committee. As high as two hundred and fifty votes were cast on some of the ballots.

Police Instructions.

Mayor DeLaittre has forwarded the following letter to Chief of Police Munger, with instructions that it be read at roll call:

MAYOR'S OFFICE,
MINNEAPOLIS, MINN., March 15, 1878.

A. S. Munger, Chief of Police:

In view of the approaching election, a few words in regard to the duty of the members of the police force, special police, and watchmen in the employ of the city, may not be inappropriate.

I wish it distinctly understood it is not my desire to in any way interfere with or abridge any man's right to express his preference for any candidate he pleases, by his vote at the ballot-box—for I hold this to be a sacred right that should in no way be obstructed.

This, to my mind, is the extent to which each officer should allow himself to take an active part in the election—for their own discretion and good sense should make it apparent that all tax-payers, of both parties, pay them their salaries, and they are the servants of all the people.

Hence you will please read this at the roll-call, and caution all not to discuss political affairs on the streets, or take any active part in the election, beyond the depositing of their vote.

Good order must be maintained throughout the city, and on election day the force will be required to do double duty, and you will see that at each polling place an officer is stationed; and if any specials are required, they will be appointed in due time.

Very respectfully yours,
JOHN DELAITTRE, Mayor.

Hudson River Steamer Magenta—Several Passengers Fatally and Others Seriously Scalded—Speculations as to the Cause.

POUGHKEEPSIE, March 23.—The steamer Magenta blew up opposite Scarborough this morning. Alfred Reynolds, Richard Lane and two unknown men were killed and five others badly scalded.

NEW YORK, March 23.—The steamer Magenta, on board of which was the fatal explosion this morning, left Haverstraw ot 20 minutes of 7 o'clock, landed at Sing Sing, took aboard a large number of passengers and started on the way to New York at 20 minutes passed 7. She steered out into the river a distance of two miles when the passengers were startled by a terrible explosion. A scene of the wildest terror followed, and when the steam cleared away there was seen lying in the forward cabin, near the stove, directly in front of the engineer's room, the bodies of a dozen men. The steam on the floor still created a light vapor and the surrounding woodwork was dripping from its nearness to the exploded pipe. Two were dead and eight were badly and two fatally scalded. The Alexis was lying at Rockland lake, and seeing the Magento enveloped in smoke, started off at once and in a short time had come up to her. The wounded were at once transferred to her and the dead to the Thomas P. May, which had just come up, and by the latter conveyed to Sing Sing.

Exactly how the accident occurred is not yet known. The spot where it happened was between the main and the upper deck, well forward. The steam capstan, which was the cause of the accident, was forward of the engine, and measured about twelve feet in circumference. It is surmised that a bolt started and was blown out. It is also said that the Magenta was running at a great speed across the flats, to get ahead of the opposition boat. Albert Ruhnels and Mr. Wright, of Sing Sing, were killed outright. Mr. Law, of Sing Sing, is not expected to recover. Wm. Taylor, a waterman, was severely scalded. A party of five from Pleasant Hill, were all more or less scalded, and one boy of twelve is supposed to have been blown overboard.
