D. & H. W. SMITH'S
GOLD MEDAL ORGANS.

Tremolo pipes, and beautiful musical tones in the Melodeon.

Secured the First Premiums over all competitors at State Fairs during the month of October.

We are again prepared to fill orders upon the public much faster than we could at any previous time since the commencement of the manufacture of these instruments, the AMERICAN ORGANS for sale by the Trade and Dealers throughout the country, at manufacturers' prices, varying from $100 to $250 per instrument.

The attention of the public is called to the American Organs, recently improved by large and important improvements, is adapted to all kindred music, and is highly recommended by all who have purchased them.

The American Organs are constructed on the principle of the large Pipe Organ, and to depth and sentiment of tone approach better than any other instrument that are other organs, yet musicians have only to be fully convinced of this fact by the test. It is recorded "Organs" contain simply of the action imparted upon the reflexes as to the manner in which they are blown, and the tone is produced by the Reed, which is the Reed Organ, which is the Reed Organ, which is the Reed Organ
