Local Intelligence.

THURSDAY, JULY 18, 1872.

HOTEL ARRIVALS.

Equinox House.

[illegible]

Taftsville House.

[illegible]

MANCHESTER.

—Bradley & Blackmer desire to call attention to their new advertisement.

Rev. L. A. Austin supplied the pulpit at the Congregational Church last Sabbath morning.

—The attention of our readers is directed to the different items of correspondence on the second page, some of which are of general interest.

—Our beautiful drives, shady sidewalks and pleasant croquet grounds are fully appreciated at this season by visitors from the cities of which we have not a few.

—Some of the guests at the Equinox House entertained their friends with a series of fine tableaux at the Music Hall on Monday evening. Considering the circumstances, the shortness of time &c., the projectors of the entertainment deserve great credit.

—We think the Editor of the Rutland *Courier* is decidedly wrong as regards the musical success of the late jubilee. In a musical and artistic sense it was a far greater success than its smaller predecessor, though it has been a failure financially. J. R. S.

—We learn that Miss Mary Burnham has accepted the position of preceptress of the Rutland High School. Miss Burnham has been connected with the Union School at Montpelier for some years and has gained an enviable reputation as one of the best teachers in the State.

—A dozen of our young people banished dull care by a moonlight drive to West Arlington on Monday evening, calling for supper at friend Bartlett's on their return. They evidently had a jolly good time and plenty of moonshine.

—Mr. Wm. McCammon, of Albany, manufacturer of one of the best pianos in use is stopping at Vanderlips Hotel. One of his pianos is in use at Vanderlips and several others are in this vicinity. Parties intending to purchase will do well to call and see or address him, as they can save agent's commission and secure a fine instrument by so doing.

—A very large number of our subscribers are in arrears for the present year's subscription, and some for last year's also. We need the money and must have it, and if our friends will send it in at once it will save the trouble and expense of collecting. If sent by mail a receipt will be returned. We would not make this demand but it takes money to run a newspaper as well as any other business.

—A correspondent of the last *Banner* says the Atlantic B. B. C. agreed to play the Muffers at Bondville on the 6th, engaging dinner for ten and then did not put in an appearance. We are requested to state that the Atlantics sent word to the Muffers that they would play them on the 4th, with the request that they order dinner for ten, and word was sent back that the Muffers would not play them on the 4th but would on the 6th. The Atlantics immediately sent word that they could not go on the 6th, about which there is nothing very ungentlemanly.

—We learn that the following gentlemen have been appointed County Committee in behalf of the Greeley Republicans; though by whom appointed or by what authority we are not informed: R. T. Hard, Arlington; Lyman Rogers, South Shaftsbury; Dexter Batchelder, Peru; William Root, East Rupert; T. H. Hall, Pownal. We are credibly informed that one or two of the above are for Grant but then mistakes will happen. A mass State convention will be held at Burlington, July 24th, to nominate candidates for State officers. The Democratic State convention is called at the same place the same day, and there will be some funny hand shaking, for instance Hiram Atkins and Dave Nicholson.

—One of our lady friends recently received the following epistle from a young fellow who seems to have an itching desire to correspond with some one. As the young lady who received it declines the proposed honor any other young lady can have the opportunity by sending their address, with stamp enclosed, to this office. The letter is given spelling and all:

HUDSON, July 10th, 1872.

Dear Friend:

I want to correspond with somebody and so I will with you If you will the way I found out your name was by Ruth Sylse for she says she youst to know you my mother died too years ago to-day my Father hiers Ruth to keep house for him. Ruth is a good girl as long as this is the first letter I do not know what to wright. please will you Correspond with me. my age is sixteen my father belongs to the Baptise church. I live in Berlin but I have my male come to Hudson I go there every day to work this summer in the shoe shop I make my two dollars a day this forenoon Ruth and I picked about half a bushel of Cherries this is about all I have to say this time please excuse all bad wrighting and mistakes this is truly yours in Faith Hope and charity.

—The following complimentary notice we clip from the *Rochester Daily Union*: "Those who visit Mt. Hope Cemetery find among the recently erected monuments one upon the lot of our fellow citizen Col. James Brackett which attracts especial attention for its symmetry, beauty of style and finish. The base and dome of the work is made of Vermont marble, with four pillars of Scotch granite. In the recess stands a figure of Hope cut in white Vermont Marble. The work is somewhat elaborate, but there is a symmetry and proportion about it that strikes the eye with pleasure. This very fine piece of work was executed under a contract by W. H. Fullerton, at Factory Point, near Manchester, Vt. He is extensively engaged in the manufacture of marble work there, and has facilities unsurpassed for the production of monumental, cemetery and other work. This monument to which we refer is we believe the first he has put up in our cemetery, but we are quite sure it will not be the last—so generally does it meet the approbation of those who have examined it. Those who desire to confer with Mr. Fullerton may address him at Manchester, Vt.

FACTORY POINT.

—The repairs on the Baptist church are rapidly approaching completion.

—Messrs. O. C. Waterhouse & Co. have a nice boat on the knitting mill pond. T. Perkins made it.

—The firm of Clemons & Grover has dissolved, Mr. Grover having bought out his partner. He will continue the business at the old stand.

DARTMOUTH.

—Mr. Geo. W. Lawrence of Watertown, has been drilling an Artesian well for J. E. McNaughton, and, commencing in a hard lime and flint rock at the surface, he has struck a large vein of pure cold water at the depth of 38 ft. Mr. Lawrence's experience in Artesian wells will account in some measure for his luck in striking valuable veins of water, and his valuable machine for drilling gives ample assurance that he need not strike twice to supply pure and lasting water to any one and in almost any place desired.

—The new house of Silas Reed is rapidly approaching completion under the hand of Mr. Pond.

DORSET.

—Dorset had an hour of warm excitement on Monday noon of this week over the burning of Norman Sykes' barn. It seems that a lad thought to have a good time by setting fire to a pile of buckwheat straw, and not taking sufficiently into consideration that barns would burn as well as straw, especially on a dry summer day, he presently had a much larger bonfire than he could manage. As Mr. Sykes' buildings stand on a conspicuous summit half a mile north of the village, the smoke and flames were noticed by some men in the fields, and the church bell called others out of the shops and houses, so that a considerable force was rallied to the scene of conflagration and of duty. There was no chance to save the barn, with but the contents of a score or two of waterpails, but there was hope for the house which was already on fire, and happily it was saved by prompt and effective exertions. Some injury was doubtless done to the furniture, all of which was hurriedly removed, and much blood was uncomfortably if not dangerously heated in fighting fire an hour when the mercury must have been well up among the nineties. The loss of the barn is severe to the owner, who will hardly be able to replace it, though so soon to be needed for the crops of the season. In this connection the practical suggestion will probably be pardoned if not heeded, that in a community which has no fire engine, every man should have at hand a portable pump or fire extinguisher, and every boy should learn the proper use of matches, and the suitable time and place for bonfires.

EAST WALLINGFORD.

—The new bridge will be a reality soon, as Mr. Gibson has the stone work well under way and the carpenters are ready to follow him.

—A Greeley & Brown club is to be organized here soon and there are plenty of good republicans to join it.

—Cheese is worth 10 cts. per pound; butter 17 to 20 cts.; Potatoes 15 cts. and wool 58, 60 and 62 cents per pound.

FAIRFAX.

—Farmers are busy haying. Hay sells readily at $17 per ton.

—O'Briens four shows exhibited on the 5d inst. The show was a swindle on a large scale.

—The officers of the law deprived a vender of liquor of six gallons of the ardent on July 3d; said vender was an auxiliary of O'Briens four shows.

—Rinaldo Laflin raised a barn last week said to be the largest in town, size 50x80.

—A Greeley club, has been formed in town of 50 members. Turnips will be high in consequence.

READING.

Centennial celebration will be the order of the day for the 28th day of August next. Felchville will be the center of attraction. Strong committees are appointed and every thing is to be done to make it a day never to be forgotten by those who participate.

PERU.

—Farmers are all very busy cutting their hay and help is scarce. The crop will be a good one.

—Mr. Charles Barnard and wife of Illinois, former residents of this place, are on a brief visit to their old home.

—A little son of Mr. Charles Hapgood of Boston was run over by a wagon containing two persons Saturday evening. The wheels passed over his limbs but fortunately no harm more than a slight bruise resulted.

CHESTER.

—Either you, Mr. Editor, are under great obligations or I owe apology for allowing the proceedings here on the 4th unreported for the JOURNAL of last week. Chester charged and Stanley on'd. The charge was not exhorbitant, however, and Stanley didn't get on too much. As accuracy is what you desire, I will state that there were just 2737 people present which included the 37 young ladies mounted on the cart car. This was told to me by a policeman who made the arrests. Every body said we had a good square celebration. The Londonderry and Grafton bands furnished first rate music. The orator, Rev. A. B. Flanders made a soul stirring address, and Mrs. E. D. J. Noble read the declaration of course perfectly. Some however, are disposed to question the taste of having the old document publicly read by a lady on such an occasion as this.

BRATTLEBORO.

—A large company of Gypsies are encamped just across the river from us.

—Mrs. Brigham's lectures are finished; but more lecture of the same sort are in prospect.

—The Episcopal Convention came off Tuesday, Wednesday and Thursday of last week.

—The bell of the Congregational church is to be changed, the new one not proving good.

—The second year of the Good Samaritan Society closed a week ago. Its membership now numbers 1,500.

—It is reported that J. Estey & Co., have promised $5,000 towards the establishment of a school for the education of loved women at Raleigh, N. C.

—The Brattleboro House has changed hands again. Mr. Evans selling to Mr. Morey formerly of the Chicopee House, Chicopee Mass.

—Jumping from grave to gay, I must mention the very pleasant time that guests enjoyed at the dance and supper given at the Brooks House the 20th ult.

—Sunday, the 23d ult., fifteen children were baptised in the Universalist church, being the day set apart for the consecration of children in that church. Beautiful flowers decorated the house abundantly.

—The annual fireman's muster went off well on the 29th ult. The West Brattleboro Engine Co. went to Montpelier on the 4th and took the prize.

—The Convention of Congregational ministers I must mention although so late in the day, as being truly a pleasant, profitable time for us, whatever the visitors thought regarding their own profit.

—This correspondent has been unusually dilatory of late for good or bad reasons, as different minds might consider, nevertheless I beg forgiveness and hope to do better. We have all flourished despite the "awful" hot weather and severe thunder showers.

—Mr. Matteson of the Baptist society has returned from a four week's vacation While gone he preached the annual sermon at Madison University, Hamilton, N. Y., before the society of Religious Inquiry, and did well according to report. Dr. Hutchins of Brooklyn N. Y., preached at the Baptist Church two Sabbaths.

—We have had a Greeley meeting; 37 guns fired and 75 persons present at the meeting. But I believe you don't allow your correspondents to be personal, and I am afraid I might not speak fairly.

—Up to the last of this week strawberries have been for sale, although a luxury. The *Phoenix* says we have consumed 15,000 quarts of these berries, selling at the average price of 25 cents a box. Fully one-half were raised here, one man having a crop of 2500 quarts. Doesn't this show our exquisite taste as well as thrift?

ARLINGTON.

—Our farmers are generally engaged in haying. The crop promises on the whole to be better than last year; still some of the interval meadows will cut short as they were badly killed out last winter. Other crops look finely and promise a good yield.

—The annual Episcopal convention of the diocese of Vermont met at St. Michaels church, Brattleboro, on Wednesday and Thursday of last week. The Rt. Rev. W. H. A. Bissell presiding. Thomas H. Canfield, Secretary and Victor Atwood, Treasurer were reelected to their several offices. Most of the parishes in the State were represented and there was quite a number of the reverend clergy from other states also present. The following persons were elected the standing committee for the year: Rev. Dr. Swett, Harmon Canfield, Rev. E. R. Atwill, H. B. Smith, Rev. N. F. Putnam, G. B. Ellis.

EAST ARLINGTON.

—Among the new enterprises which have started up in our midst and which need only moderate encouragement to make them successful is that of N. E. Powers, manufacturer of shirts. Mr. Powers has been connected with the business in other places for years and thoroughly understands every part of it. He furnishes a really fine article as regards style, fit and quality.

NORTH BENNINGTON.

—The pic-nic of the Baptist Church of Rutland which came off at the grounds of Hon. T. W. Park, on Thursday of last week was a success though most of the participants got thoroughly drenched by the shower of that day. But the weather was warm and no harm resulted.

—Mrs. Potter, wife of Benajah Potter, residing with her daughter, Mrs. Fuller at Paper Mill village, committed suicide on Monday by cutting her throat with a razor. She was thrown from a carriage three years ago striking on her head since which time she has been slightly deranged. She leaves a large circle of friends.

BENNINGTON.

—We don't hear much about celebrating the coming 16th of August. Remember Molly Stark!

—H. W. Putnam, Esq., has recently added a rich coat of paint to his elegant residence.

—S. M. Bowles is making decidedly unique and elegant stencil plates. See advertisement in another column.

—Nathaniel Locke, Esq., 'Petroleum's' father, of the Toledo, (Ohio) *Blade*, paid the publishers and editor of the *Banner* a visit a few days since. Mr. Locke formerly lived in this place.

—Another large company of Swedes passed through town last Friday for the purpose of laboring on the Bennington & Glastenbury Railroad.

—S. M. Bowles has written a second serial for the Montpelier *Argus*, which that paper says is a very interesting story. Really Mr. Bowles is becoming noted for literary fame. He is engaged at writing for quite a number of story papers.

—Many of our farmers are now busy engaged in haying. We join with many others in saying: "Grass was never better."

—W. G. T. Wright, who has so long been an efficient accountant and book keeper for the Putnam Manufacturing Co., has resigned his position, and H. Stoughton Tracy now fills the place made vacant by his resignation.

—Frank Bowles, Esq., who was formerly a resident of this place, and for some time has been residing in Boston, has attended the Boston Jubilee, and of course pronounced it a grand affair.

—The thunder and lightning last week during the heavy showers, were very terrific and severe. One man and team (Benj. Townsend) was quite severely injured by the lightning in the western part of the town.

—Pleasurable parties enjoy a ride to Woodford every day, to see what progress is made in the construction of the Glastenbury railroad. They always report favorably.

—Mrs. J. H. Evans of Mt. Holly, N. J. arrived at this place yesterday. She will visit her friends for a short season, and then return home with her husband who has been making these parts his favorite resort since the first of June.

—A preliminary meeting for forming a Greeley and Brown club was held on Saturday evening. The meeting was addressed by A. P. Childs, Col. E. O. Cole, J. B. Parmenter of the Troy *Press*, Maj. A. B. Valentine and others. There is a warm time coming.

—It is rumored that the *Free Press* has been bought up by the Greeleyites and will come out this week on that side. We suspected as much though we are surprised that some of those who came out so strong against the sale of the *Banner* should be among the purchasers. But it makes all the difference in the world whose ox is gored.

WOODFORD.

—Good hay weather.

—Early peas are now abundant.

—S. P. Brown has dug good sized new potatoes from his garden this season.

—No celebration here the 4th, consequently there were no injuries received.

—There will be an abundance of fruit in this section this season, and we presume in many others.

—Lyman Bowles has sold his personal property in this place to Geo. E. Page of Fitzwilliam, N. H.

—A ton of grass more to the acre will be produced, than last year. The click of the mowing machines are heard nowadays.

—Celebrated musicians from Hoosick Falls, N. Y., will have charge of the instrumental feature of the Grand picnic on Tuesday, next.

—Quite large parties from Bennington and New York occasionally visit A. Fox, Esq., our popular landlord about noon so as to partake of his excellent dinners. We speak from experience.

—Rhetorical exercises were held in the school in district No. 1, on Friday afternoon last. These exercises are becoming very interesting, instructive and important. There were a good number of visitors present.

—S. P. Brown has a flower which he cultivated from a common weed found on the mountain, he says. We saw it a few days since and it is a floral beauty. Mr. Brown has a fine variety of flowers in his garden, and a beautiful maple grove which will be occupied Tuesday 23d inst.

—A grand pic nic is announced for Tuesday July 23d. Last winter the announcement was made that it would be held July 4th, but the management deemed it the better way to postpone it a couple of weeks or so, as various articles are to be received from New York, to add to the day's enjoyment, which could not be obtained at the earlier date.

—Grant & Wilson! The names harmonize well! There are quite a number of Greeley men in this town, but their votes will have but little effect. There was talk a few days since of raising a Greeley and Brown flag, but before it could flap in the breeze of course it was laid in the dust. A flag to the honor of Grant & Wilson would almost look majestic floating in the breeze. Raise it up boys! Again let us say Grant & Wilson! It makes a ticket which embodies much of national and political distinction.

—Large excavations are being made in the banks and hills by the roadside, on the line of the Bennington & Glastenbury Railroad, to supply dirt for constructing the same. There is plenty of it with millions of hard heads which is one great advantage. The proprietors of the road propose giving a free ride on the completion of the road, which they maintain will be in about thirty days, but we will double the time and then be on the safe side.

—Strawberries were never known to be so plenty as they are this season. Parties from this and adjoining towns frequently repair to the summit of some high mountain, and have magnificent and sightly views of distant scenery, and a jolly romantic time and return home well laden with the lucious fruit. Indeed these hot days to be in the pure cool breezes of the mountains and inhale God's pure air is a luxury.

SPECIAL NOTICES.

The Teeth as Advertising Medium.

Every time a lady who uses fragrant Sozodont opens her mouth, she advertises the article. The state of her teeth is a certificate of its excellence. No spot darkens their surface, no impurity clings to them, the cushions in which they are set are rosy, and the breath that swells through them is sweet as the breeze of June.

Spalding's Glue, always ready to use.

Castoria.

Castoria—a substitute for Castor Oil—a family physic which is pleasant to take and does not distress or gripe, but is sure to operate when all other remedies have failed. It is purely vegetable preparation, containing neither Minerals, Morphine nor Alcohol, the result of fifteen years experimenting by Doctor Samuel Pitcher. It is perfectly harmless and far more effective than Pills, Narcotic Syrups or Castor Oil. By soothing the system it produces natural sleep, and is particularly adapted to crying or teething children. It kills Worms, cures Stomach Ache, Constipation, Flatulency and Derangement of the Liver. No family can afford to be without this article. It costs but 35 cents—ask your druggist to get it for you, and he will always keep it. 7-4

Spalding's Glue; stickiest thing out; ready.

$100 Reward.

I will forfeit one hundred dollars or a full cased Sewing Machine to any Sewing Machine that will do the variety of work which can be done on the Grover & Baker Sewing Machine by use of regular attachments.

Carriages from the Equinox House to meet all Trains. Extra Carriages may be ordered by Telegraph. It is better to Telegraph in all cases, when convenient. 34tf26-4m1

FOUND AT LAST,

The only reliable

SEWING MACHINE

in the market.

THE LARGEST. THE SIMPLEST.

THE DAVIS

VERTICAL FEED, SHUTTLE

SEWING MACHINE

THE CHEAPEST, THE BEST.

Possesses all the desirable qualities of the Standard Machines in the market. In its *Capacity*—being the *Largest* Family Machine made. In its *Simplicity*—being composed of but *Thirteen Working Parts*. In its *Adaptability to a wide range of work*. In its *Ease of Operation*—running light and quiet, and being easily comprehended. In its *Superior Construction and Beauty of Style and Finish*.

But its PRINCIPAL FEATURE is its

VERTICAL FEED,

which is the most practical and desirable device for that purpose possessed by any machine, giving THE DAVIS the preference, and which the manufacturers claim makes it

SUPERIOR TO ALL OTHER MACHINES.

A moment's glance at this novel combination for a FEED, will convince the reader of its superiority, for the following reasons:

1st. The presser foot is always raised from the fabric when the feed takes place, thereby imparting no resistance to seams of ridges while feeding.

2d. The needle being in the fabric and moving with the VERTICAL FEED-BAR with its full pressure on the goods—at the time the feed takes place, renders it sure, sicure and uniform in length.

3d. The needle being in the goods at the time the feed takes place, renders it impossible to fail one piece while the other is stretched.

4th. The VERTICAL FEED-BAR being behind the needle renders it capable of sewing elastic goods makes a smooth and durable seam with stitch alike on both sides—thus enabling the sewing of any number of thicknesses without basting, and operating with equal facility on the heaviest as well as the lightest fabrics.

The SHOE TRADE, and others engaged in executing scroll work, braiding, etc., will appreciate the value of this feed at once, as the stitches are always the same length in turning curves, long or short, in either direction, while all other machines lengthen the stitch in turning the goods one way, and shorten in turning the other.

In addition to the foregoing invaluable and indispensable features, which are peculiar to this machine alone, we urge the following additional points which this machine possesses and which are essential in any machine worthy of a place in the family or manufactory.

1st. SIMPLICITY.—It has no under works to be looked after or to get out of order, is composed of a less number of working parts than any other Shuttle Machine; is easier and quicker learned; and is so simple in construction that it can be used efficiently by any one with facility.

2d. DURABILITY.—Its working parts are made of the best imported steel; each point of friction being case-hardened.

3d. ECONOMY.—It is the largest machine manufactured that is adapted to family service; its 2½ inch arm enables it to do a greater variety of sewing, from the lightest calicoes, through all grades of fabrics to harness leather, and does it so well that the same machine may be used either in manufacturing or family sewing with equal facility.

4th. PLEASANTABLENESS AND ECONOMY.—It runs at a high rate of speed, which, combined with its peculiar feed, enables the operator to turn the work at any angle while the machine is in full motion, without changing the tension or length of stitch.

The machine will be shown with great pleasure whether you desire to purchase or not. Please call and examine.

SOLD ON INSTALLMENTS.
