NEW SKIRT FOR 1865.
A NEW AND GREAT INVENTION IN
HOOP SKIRTS.
THE DUPLEX ELLIPTIC (OR DOUBLE) STEEL SPRING.
WESTS, BRADLEY & CAREY,
Successors to J. I. & J. O. WEST,
NO. 97 CHAMBERS-ST., NEW-YORK,
are the owners of the Patent and Exclusive Manufacturers of this

J. W. BRADLEY'S
PATENTED "DUPLEX ELLIPTIC" STEEL SPRING SKIRT.

This invention consists of Duplex (or two) Elliptic Steel Springs ingeniously braided tightly and firmly together, edge to edge, making the toughest, most elastic, flexible and durable Spring ever used, enabling the wearer in consequence of its great elasticity and flexibleness to place and fold the skirt when in use as easily and with the same convenience as a silk or muslin dress. It entirely obviates and silences the only objections to Hoop Skirts, viz: the annoyance to the wearer as well as the public, especially in crowded assemblies, carriages, railroad cars, church pews, or in any crowded place from the difficulty of contracting them and occupying a small space; this entirely removes the difficulty, while giving the skirt the usual full and symmetrical form, and is the lightest and most graceful and graceful appearance for the street, opera, promenade or house dress. A lady having enjoyed the pleasure, comfort and great convenience of wearing the Duplex Elliptic Spring Skirt for a single day, will never afterward willingly dispense with the use of them. They are the best quality in every part, by far the lightest, most durable, comfortable and economical Skirt made. Merchants will be supplied as above, and ladies in most first-class retail stores in this city and throughout the different States.

THE AMERICAN HAY AND COTTON PRESS CO. MANUFACTORY,
Corner of Grove and North Third-sts., Jersey City.
No. 113 Wall-st., New-York.
GOVE'S PATENT.

The attention of all parties interested in the pressing or compressing of HAY, COTTON, HEMP, WOOL, RAGS, HOPS, or any other article required to be baled for Transportation, Storage or Consumption, is respectfully solicited, to the PORTABLE or STATIONARY PRESSES, manufactured by this Company, under the superintendence of the Patentee, Mr. JOHN H. GOVE.

This Press is very simple in its construction, requiring but ordinary intelligence to work it, and can be operated by any known power, such as Steam, Water, Horse, or Hand. In using horse-power, but one horse is required, the Press being so mechanically constructed on a well-known principle that the *power increases in a greater ratio than the increasing resistance.*

The advantages of this Press over all others are as follows, viz:

1st. It can press 20 per cent more material in a given space.
2d. It can do the work in 50 per cent less time.
3d. It requires 50 per cent less driving power.
4th. It turns out the best shaped bale for handling or rolling.
5th. The Press will last a lifetime, the working parts being built of the best of iron, and not liable to get out of order.

Thoroughly work on this machine will press in one operation (after once filling the box of the No. 1 Press) a bale of Hay of 450 lbs. weight in ☞ Two Minutes.

Four men and one horse can bale 12 tons of Hay a day.

Four men without the aid of a horse, or any power except that contained in the Press, can turn out a bale of Hay 27 inches square by 36 inches long, weighing 400 lbs., or 20¾ lbs. to the cubic foot.

No toggle joints, screws, cog-wheels, heaters or rollers used in this Press.

The attention of Cotton factors and planters, Wool and Hemp raisers, is especially called to this Press, destined as it is to work a complete revolution in the new slow, clumsy and expensive method of baling.

The Company will dispose of Town, County or State rights (reserving to themselves only the right to manufacture) on reasonable terms.

Mr. N. D. FISHER is the authorized Traveling Agent for the Company in the Eastern and Middle States.

For further particulars send for circulars.
