It is full of valuable popular information on almost every point that concerns the physical and social well-being of men, women and children, set forth with profuse pictorial illustrations, and in a style of constant freshness and vivacity. One often finds relief from the husky mengerness of stately learned pundits in its sparkling columns, which are always in panoramic motion, never in inspid stationary stereotype. We regard this wide-awake JOURNAL as a valuable means of family education, imparting to young readers a store of practical knowledge which will often be of more service than that which they obtain from the schoolmaster.—[N. Y. Tribune.

Machinery.

ATWOOD'S
PATENT DRILLING MACHINE,
PILE-DRIVER,
AND
HYDRAULIC SAND PUMP.
PRACTICAL TESTS having fully demonstrated the superiority of this machine over all others for the purpose of sinking Oil Wells, the undersigned is now prepared to receive orders for the same.
This machinery comprises everything requisite for the boring of oil wells, excepting the STEAM ENGINE and CAST-IRON DRIVING-PIPE, (but will be furnished, if desired, at a reasonable price), and dispenses with the use of the Derrick Rope, Bull-wheel and other cumbrous and expensive fixtures now in use, and is so arranged, being constructed on wheels and portable, that it can be easily removed for the purpose of sinking wells in different localities.
THE DETRITUS is removed from the well by our Patent Hydraulic process, and does not require the removal of the drill from the boring. This process not only removes all the detritus in from 5 to 10 minutes, but likewise effectually clears out and opens all the small oil veins that are so often entirely closed up by the old process of sand pumping.
WITH THIS MACHINE and a practical engineer, a well can be sunk from 400 to 600 feet within a period of from 15 to 30 days after the soil pipe has been driven.
Arrangements are being made for the construction and delivery of these machines at New-York, Norwich, Newburgh, N. Y., and Pittsburgh, Pa.
