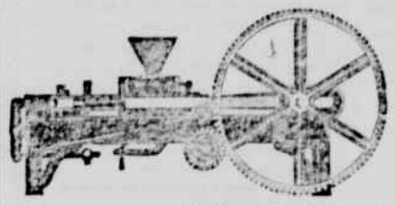
ADAMANTINE BRICK PRESS.



OFFICE OF THE ADAMANTINE BRICK PRESS COMPANY, No. 175 BROADWAY, NEW-YORK.

WE PRESENT to the public the first and only BRICK MACHINE ever invented, which makes a PERFECT PRESSED BRICK from pure clay, without a crack or check, and so simple in its construction as to recommend it to general use, as a substitute for any and all brick machines known to the country.

It makes Brick smooth, perfect, and uniform in size and quality; cheaper than common mud brick can be made, and superior to any Philadelphia pressed brick ever offered in market.

The Machines are made with from one to eight molds, and will cost from $700 to $1,500. Two-horse power will run two molds, and five-horse power will run eight molds.

One mold will turn out 7,000 bricks in 12 hours, and eight molds 50,000.

The brick thus made are impervious to moisture, and consequently secure from the action of frost.

They are ready for burning when discharged from the machine—require no handling or drying—and may be immediately subjected to any degree of heat.

By this process of manufacture, the air and moisture are expelled from the clay by means of perforators, which enter the mold when filled, and are suddenly withdrawn as the brick receives its final pressure; consequently, EVERY BRICK BURNS PERFECTLY, WITHOUT CRACKING, CHECKING or WARPING, and EVERY BRICK is PERFECT WHEN IT COMES FROM THE KILN.

The Machine is now in operation in Jersey City, where it can be seen.

It is only necessary for practical business men to see the Machine in operation, and examine its product, to be convinced that it is destined to work an entire revolution in the manufacture of Brick.

We offer for SALE, Rights of States, Counties, Cities, and Towns, upon reasonable terms. Machines furnished to order.

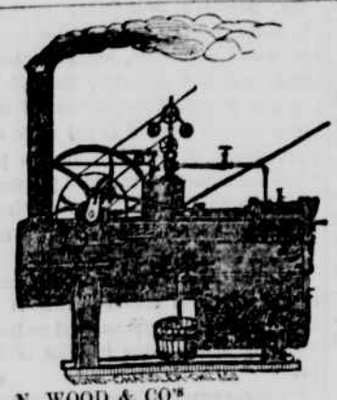
C. L. CORNISH, Treasurer.
J. M. WHITCOMB, Secretary.



A. N. WOOD & CO'S CELEBRATED PORTABLE STEAM ENGINE.

The above cut represents our Engine as seen without wheels. For farming purposes we build them on wheels that a pair of horses can easily move about from one stack of grain to another, with especial reference to threshing, &c. We make the building of these Engines a specialty—consequently can afford them cheaper, and as a matter of course, of better quality than when they are built in connection with other machinery. We warrant them to work as we represent or the pay will be refunded.

Should parties wish to inquire in this city about our work, we would refer them to Wm. Porter & Sons, No. 271 Pearl-st., who are using one of 6-horse power daily. We intend to keep a variety of sizes on hand that we can ship one of any size prompt. For further information, address

A. N. WOOD & Co., Eaton, Madison Co., N. Y.
