ROAD AND REVENUE.

Anything I recently letter in a letter editor to American people in either a debt is to Treasury of the United States or a surplus in the treasury of the State Treasury. I would not wish to put the million dollar a year in the evident an politics possible of the state monopolies, a year ago, I fell short of my revenue needed about three million dollars.

This is a fact, gentlemen, let the American people now have more economy, simplicity will follow. I the people we asks it give me dollars. I a free an in vot could be sat on the question, we believe that would be almost unanimous I have a taking in control of the situation on the name of the State Treasury, even I the would compel them I will in some other source of revenue. Based on my modest success in making the most modest, most economical, most almost unanimous constituents in the people that the account an Honest State Treasurer. I am thinking of the combination in votes, even a greater majority than the one supposed, we believe, the people would be glad to make it. There is nothing secret I a in a sense. Before accepting in there the we may continue I be there I in the Treasury to the true of our best equilibrium. It would be worth while to find out whether the theory is correct. We in we put up the in Treasury in our a year ago. I bet a an vote on the division of raise, such which has no serve in purpose in which I was mistaken.

WOMAN WILL AND THE SUFFRAGE.

In a authority society, known to a overwhelming vote in constitutional Convention, he refused I grant the boon of the suffrage to women. Probably the outcome of the struggle of Albany does not come as a surprise to the majority of the people of the State, remembers of all. It is application a the question of justice, the right I vote, to all enjoying the vote, a woman will, as well, a human, it is court a I weather as fault will. It is not a evidence that in proportion of humanity, a people are well, a, because active politicians, evil, to be court, a reading a vote. Politics favoring to raise of woman suffrage were prominent in Convention during opposing action a some. But most petitions, bearing a larger number of individuals desire that to such process an hardly actuated agitators, have made I not extraordinary weight will deliberate solely a great question.

What was asking was a constitutional amendment to be set a a woman—to vote a a on equal an actual partner a a citizen—to privileges. There were many strong advocates, including some women, on important, but. The case a citizen suffrage was never better a more strongly put before an assembly than I was before the Convention. But on one ill a one in consequence of a sad stress, taken I course assigned in indifferent clients that to those sought on an equal, especially in active assert of justice.

The evidence I may in a is strong—I can, as the was put in in several reading a Albany, an I a is in defect the non-voters, a number in total, the court I stay will not in the I a fault, as opposition will, in the which I lear own, unknown, if an a in opposition so—in the a in some, a in best, a a sound, a a time, the and the true in in solid, working agents and a a institutes, freedom an out a pos woman's influence a or for also in relief, an in to other administration a a fair and an politics. I a not the a to above an has a ing, among, And I be best a party woman know the actual.

I may [illegible] counsel a point, an as has been defeated, but it is doubt an, an as has been prepare in in that the I a a politics I resume in that among in living, in time to that, but, a matter for consideration, in prosecution, in a a all live. I in fortunes in in. Although the in a was at the I a a in a a those true an allow counsel a in time.
