VOTE IN THE STATE.

Morton's Plurality Will Be About 143,000.

Democratic Slump in This City Remains the Feature.

Republican Sweep More Remarkable Than Cleveland's in '82.

The plurality of Mr. Morton for Governor of New York State is about 143,000.

This is in accord with the estimates given in last night's extra editions of "The Evening World," which were not changed materially by the late night and early morning returns.

The feature of the vote was the Democratic slump in this city, Hill receiving a plurality of only 2,700, where even Flower had 59,502 in 1891.

Pressing this phenomenal result closely, however, was the reversal in Kings County, which gave Morton a plurality of 16,080.

Tammanyite Who Prayed for Rain.

"And next day it snowed."

The rest of the State helped on the Republican sweep with tremendous figures, only Chemung, Queens, Richmond, Rockland and Schoharie Counties giving pluralities for Hill.

Even Albany County, which gave Flower 4,227 plurality, reverted to the Morton column by 1,000 majority, while Erie, which gave Flower 1,280 plurality in 1891, turned up with a 13,000 plurality for Morton.

Though the figures are less, the Republican sweep of the State is in its way more remarkable even than the Democratic sweep of 190,000 plurality which elected Cleveland over Folger in 1882.

The other Republican State candidates, Saxton for Lieutenant-Governor and Haight for Judge of the Court of Appeals, ran well with their tickets, as shown in the following table:

OFFICER DUNLAP HELD.

Charged with Illegally Voting by Lawyer Hotchkiss.

Frank P. Dunlap, an officer in the City Court, was held in $500 bail in Harlem Court this morning charged by Samuel Hotchkiss, a lawyer, of 22 East One Hundred and Twentieth street, with illegal voting.

Dunlap registered and voted from 159 East One Hundred and Twenty-second street, where he claims to have had a room for the last six months. Lawyer Hotchkiss says that Dunlap did not live at that address.

Whole Family Helped

Mrs. H. K. Johnson.

"My husband was troubled with **Rheumatism** so that he could hardly lift his head to his head, and also had severe pains in his stomach after eating. Four bottles of Hood's Sarsaparilla completely cured him. My mother was all run down and Hood's Sarsaparilla built her up and she gained 15 pounds. I think Hood's Sarsaparilla has been given appetite, weight and strength to the medicine. Hood's Sarsaparilla cured me of **Erysipelas**, which I have had for 15 years and which has now entirely driven out of my system."

Hood's Sarsaparilla Cures

GAIN FIVE CONGRESSMEN.

The Vote of this City Evenly Divided in the Ten Districts.

The vote for Congressmen in this city was evenly divided, there being five Democrats and five Republicans elected in the ten districts. The six Republican Congressmen elected in the First, Second, Third, Fourth, Fifth and Sixth Districts in Kings and adjoining counties, however, throws the victory on the Republican side by a large majority. Last year every Congressman elected in the sixteen districts was a Democrat. The following table shows the vote in the city:

Rough on the Band.

(From the Dundee News.)

A local band was one day playing at Dumferline when an old weaver came up and asked the bandmaster what that was they were playing.

"That is 'The Death of Nelson,'" solemnly replied the bandmaster.

"Ay, man," remarked the weaver, "ye hae gi'en him an awful death."

The Puritan Way.

(From the Cincinnati Tribune.)

The Puritans had, it is said, A most grim way. In fact, their lifelong motto was "Dis Get Gay."

Better use too much than too little Pearline

Beware of imitations.

PRAISE FOR THE COUNTIES.

Steckler's Organization Did Noble Work in the Electies.

Their Prophecies Regarding the Result Remarkably Fulfilled.

The Sticklers are being overwhelmed with congratulations to-day. The work done by the Independent County Organization in the district south of Fourteenth street, whereby a Tammany majority of 41,000 in 1892 was completely wiped out and the majority swung in favor of Col. Strong and the Republican ticket, commands admiration. As a political prophet Charles Steckler takes first rank.

He showed a surprisingly wonderful knowledge of the situation. He predicted in "The Evening World" that Grant would not carry five Assembly Districts, and that the districts below Fourteenth street would not give the Democratic candidate a plurality of 10,000. He asserted that Strong would be elected by 50,000 plurality.

The Sticklers have been fighting Tammany tooth and nail for the past four years, almost single handed. Last Winter, with Julius Harburger, Ernest Harvier and others, they organized the Independent County Organization, and on Dec. 14, 1893, formally opened the anti-Tammany campaign with a rousing meeting at Tammany Hall.

They asked no place on the tickets put in the field by the Republicans and State Democracy but simply fought for purer and better government. They concentrated their efforts in the districts below Fourteenth street and with astonishing results.

An "Evening World" reporter saw Charles Steckler this morning, and the victorious leader of the Independent County Organization said:

"The 'World' and 'Evening World' have certainly made a gallant fight for the people. I predict that within thirty days after Jan. 1 the Legislature will pass a law wiping out of existence every Tammany office-holder in the city of New York, and the people will then reap the beneficial result of this election.

"The day of the boss in politics in this city is at an end, and now that the people now their power they will not be slow in exercising it.

"Another result of the election will be the amending of our ballot system. Because of its imperfections, thousands and thousands of voters were lost to the cause of reform yesterday. We want a secret ballot, but not a cumbersome one.

"After Jan. 1 the steamers leaving this port for foreign shores should do a rushing business. There will hardly be berths enough to carry away the thieving gang wiped out of power yesterday."

Mr. Steckler added that Col. Strong was the first candidate for Mayor who ever visited the lower districts. In every district he visited he visited there were large Republican gains. The Sticklers telegraphed him yesterday that he could hope for the best possible results below Fourteenth street.

HIT AN INNOCENT GIRL.

Rodenberg Fired Two Pistol Shots to Frighten Annoying Boys.

Philip Roden berg, a watchmaker, of 1997 Second avenue, was arraigned in Harlem Police Court this morning, charged with felonious assault.

Yesterday Rodenberg allowed the boys in the neighborhood to store in his cellar all the boxes and barrels they could get to be used to build bonfires. At 8 o'clock some of the youngsters called to get the stuff, but Rodenberg refused to give it up. The boys then began annoying him until he fired two pistol-shots to frighten them.

One of the bullets glanced off from the sidewalk and hit Katie Bayer, thirteen years old, of 1995 Second avenue, causing a slight wound in the right leg.

Her parents refused to press the complaint in court this morning, and Rodenberg was discharged.

TO SPLIT THE AIR.

It sounds almost sacrilegious for any foreign inventive genius to lay amending hands on the locomotive, so thoroughly English has it been in its inception, design and development, says the London Telegraph. Yet it would seem the French engineers are presuming to improve on Stephenson's iron horse, and in quite an elementary matter, too, that occurred to everybody who has thought of the resistance which the air offers to bodies passing through it at high velocity as curious, to say the least, that the designers of the locomotive have paid practically no attention to the subject—treated it, in fact, as a negligible quantity. Negligible it is not. Every form of resistance increases at an enormous ratio with velocity. In liquids and gases it varies with the square of the speed, but, as a general rule, the French engineers are right in asserting that to double the velocity will increase the atmospheric resistance at least six fold. We have only to think what this means with a train running at, say, fifty miles an hour and meeting a wind blowing in the opposite direction of the same vel
