have attended the efforts of the management in their control of the operations of the Company.

The condition of the Company on the 31st of May, 1869, in respect to its stock and bonds, is as follows:

Amount of Common Stock	$10,590,161 61
Amount of Preferred Stock	16,639,097 42
Amount of Bonds	17,290,400 00
Total of Stock and Bonds	$44,539,659 03

Three payments of the 10 per cent Equipment bonds, issued Sept. 1, 1866, have already been made as they matured, in the respective amounts of $275,000 every six months; and two more of such payments, amounting together to $550,000, will accrue and be paid in November and May of the current fiscal year, ending with the 31st of May next. No new issues of bonds have been made to replace the amount of these maturing bonds, nor for any other purpose; but in view of these payments, which will materially decrease the funded debt, and of the large expenditures during the year for additional equipment and permanent improvements before referred to, the Board of Directors authorized, on the 26th of May last, the issue and sale of 15,000 shares of the preferred stock of the company—as an increase of its capital—to be consummated by the delivery of the stock on the 1st of July, 1869. At the date of the last Report there was outstanding of Chicago and Milwaukee Railway stock $153,400, and of Detroit and Madison Railroad stock $10,200, not owned by this Company. These amounts have, during the year, been reduced to $41,600, and to $8,214 respectively, by exchanges for the preferred and common stocks of this Company; the balance still outstanding of $49,304, is mostly in small amounts, and may be exchanged on presentation, at the option of the Company, at any time. The Company retains its interests in the Winona and St. Peter and the La Crosse, Trempeleau and Prescott Railroads; the latter is still incomplete and not in operation, and the business of the former, which is increasing and encouraging, is conducted under a separate organization, and is not included in this report. Nearly 6,000 tons of rails have been ordered, and are being laid down in place of the lighter iron of the Iowa Division, and further renewals will be made on this and other portions of the road from time to time, to maintain the efficiency of the property in all its departments. The rolling stock and entire property are in better condition, generally, than at any former period, and the effective capacity of the road has steadily enlarged with the growth of business upon it.

BANKING AND FINANCIAL.

THE KANSAS PACIFIC RAILWAY LOAN.—Secured by a Land Grant of Three Millions of Acres in Kansas and Colorado, a FIRST MORTGAGE upon the proposed extension of the great Kansas Pacific Railway from Sheridan, Kansas, to Denver, Colorado, and a mortgage upon the road now in successful operation for 437 miles, and *earning more than enough to pay the interest on this new loan.* This loan runs 30 years; pays 7 per cent; principal and interest PAYABLE IN GOLD. There is no better investment in the market. For maps, pamphlets, and circulars, address DABNEY, MORGAN & Co., No. 53 Exchange-place, and M. K. JESUP & Co., No. 12 Pine-st., N. Y.

FIRST MORTGAGE SIX PER CENT GOLD BONDS OF THE ST. LOUIS AND ST. JOSEPH RAILROAD OF MISSOURI—Principal and interest payable in coin at the Farmers' Loan and Trust Company, New-York.—We are now closing out the balance of this most desirable security, at the low price of 87½ and accrued interest in currency. The bonds are limited to less than $14,000 per mile, and secured by a mortgage on the entire property of the Company, thus making the same one of the safest and most profitable securities for investment now in the market.

TURNER BROTHERS Bankers, New-York.

FIRST MORTGAGE LAND GRANT BONDS OF LAKE SUPERIOR AND MISSISSIPPI RAILROAD COMPANY, 7 per cent gold interest, free of United States taxes.—We recommend these bonds as a safe and profitable investment, producing nearly 10 per cent per annum in currency and in exchange for five-twenty bonds, yielding an increase of 45 per cent in net annual income. Present price 96 and interest. Full particulars furnished by JAY COOKE & Co.

THE MARKETS.

MOLASSES—There is some inquiry from both refiners and the trade, but as a rule the operations are light, buyers finding prices too high to leave much of a margin for profit on reproduction and resales. With comparative light stock, however, holders are confident at full former figures.
