

Two Great Machines.

CLARK'S RIGHT LAP PLOW
and Seeder Combined.

THIS IS THE WONDERFUL RIGHT LAP.

Read what others say about it:

Arlington, Oregon,
Shurte Bros: In regard to the "Right Lap" I bought of you last spring would say that it has exceeded my expectations in the way it does the work. It not only plows the ground, but leaves it in better shape for a crop than the ordinary plow. I find that I can plow ground at half the cost of plowing with ordinary plow and by actual test find that the crop is from one-third to one-half better. I consider it one of the best tools on my ranch. Very respectfully,
CLAY C. CLARK.

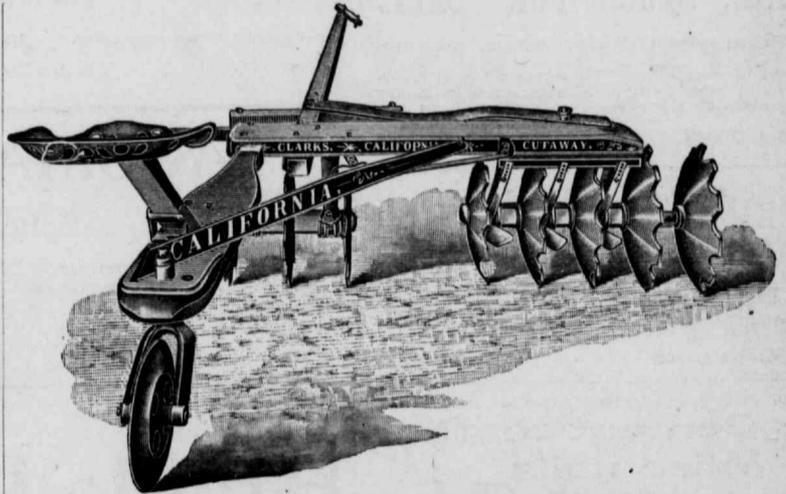

Cleveland, Wash., Oct. 9, 1897.
Shurte Bros: In regard to the "Right Lap" I bought of you last season, would say that it is a "daisy." It gets right

down and turns the ground over equal to any plow that I ever used. I can do twice the work with it that I can with a plow and find that the ground I put in with it equaled at least one-third more than that put in in the ordinary method. Money could not buy my machine if I could not get another. Very respectfully,
WM. NOBLET.

Alice, Oregon, Jan. 15, 1898.
Mitchell, Lewis & Staver Co., Portland, Or.
Dear Sirs: In regard to the "Right Lap" I bought of your agent at La Grande, will say, I consider it a Master Machine. Seeded 140 acres with it which produced well. Yours truly,
PETER McDONALD.

MITCHELL, LEWIS & STAVAR CO.,

CALIFORNIA CUTAWAY
Orchard Plow

Plows close to the tree without driving horses in branches.

Letter

from a

Practical

Orchardist:

First and Taylor Sts.

Roseburg, Oregon, Feb. 2, 1898.
Gentlemen: Referring to the California Senior Cutaway Orchard Plow, have tried it in my orchard and find that it is exactly what I want and decidedly the best tool have ever owned or seen used. Have been trying for years to get a tool to do the work that this machine does. Have recently invested in three different kinds of machines, all experiments with me, in the hope that they would prove satisfactory, but they were sad disappointments, inasmuch as it was impossible to get up under the trees without driving the horses into the branches. The California Senior, however, accomplishes every result that could be desired of a tool specially constructed for orchard work, and I give it my most hearty recommendation and bespeak for it a very large sale in the orchards of the Northwest as soon as its value becomes known, as I believe no orchardist can afford to do without it. Yours truly,
A. W. STANTON.
