WALL STREET

WEDNESDAY, April 12.

Two strong speculative pools supplied the stock market with the greater part of its activity to-day. American Smelters and Amalgamated Copper were the most spirited stocks on the list and each made new high records. Thomas W. Lawson's warning to "Get ready to catch the pieces" seemed to be regarded in Wall street as a tip to buy Amalgamated, and the buying was both eager and extensive. At the outset this buying was mostly professional, getting its inspiration undoubtedly from Standard Oil sources. As the business of the day unfolded, however, there was evidence of outside trading. The small speculators who hang around brokers' offices and watch for "good things" apparently concluded that the copper boom was here to stay for a while and orders to buy 100 and 200 shares of Amalgamated multiplied rapidly during the afternoon. The price reached 88.

American Smelting and Refining shares crossed 119 on inside buying. According to Stock Exchange gossip the Guggenheims and their friends are accumulating this stock because of their faith in its prospective earning power. The activity and recent strength of Smelters has made it a favorite with the individual speculators as well as with the professional traders. A large number of quick turns were made to-day on the three point rise, and brokers who bought this stock for customers early in the forenoon were busy in the afternoon selling it for realization of profits. National Lead was also active and strong in sympathy with Smelters.

The loaning rate for Union Pacific, common and preferred, has advanced to 3 per cent. There is an uncommonly heavy borrowing demand for this stock, and the room traders insist that the short interest is steadily increasing. On the other hand, new bull points on Union Pacific were plentiful to-day. A determined coterie of brokers bought this stock at 132 for a rise, and the entire Harriman following bubbled over with mysterious intimations that developments of great interest were pending. Some of the tipsters still cling to the notion that an important deal between the Union Pacific and New York Central is under consideration. Whatever may be the cause, Union Pacific is breaking all records for concentrated activity in the stock market. Within three months about 11,000,000 shares of this stock have been sold in the Stock Exchange. This means that the entire common stock of the company has been sold out nine times, and during this period of activity the price has gone up from 113 to 137 7-8. The Union Pacific trading to-day was in particularly large chunks. In the first hour lots of 3,000 and 5,000 shares changed hands with wonderful rapidity and the price advanced fractionally meanwhile. Some of the biggest houses in the street were persistent buyers of Union Pacific. The head of a brokerage house that has handled a great deal of Union Pacific was asked who was buying the stock, and he replied: "Go and ask J. P. Morgan & Co. or James J. Hill. They can tell you as much about this Union Pacific movement as anybody else." In the last hour there was a whirlwind of buying of Union Pacific. Large blocks of this stock changed hands, and the price advanced while the trading was most active.

There was a lull in the speculative movement of Illinois Central. Opening at its high record price of 168 this stock sold off quickly on the free offerings of the profit takers. The Harriman pool gave the stock very little support. New York Central lost about a point and a half, and Vanderbilt brokers gave most of their attention to Union Pacific and the steel stocks. The announcement of a proposed increase in the capital stock of the "Big Four" railroad operated as a bull point on that stock.

On the curb Northern Securities was fairly active and firm at about 169. The retirement of E. H. Harriman from the board of directors apparently has no effect on the market. By permission of the United States Supreme Court the distribution of Northern Securities assets may begin on the 17th of this month. After such distribution this company will cease to be of interest in Wall street. The Great Northern and the Northern Pacific railroads will be restored to individual owners and the payment of dividends will be resumed presumably on a larger scale than heretofore. Curb brokers are dealing in American Can shares, both common and preferred, quite heavily. These shares have manifested a decidedly bullish tendency of late.

The total sales of stocks were 1,198,600 shares and of bonds $2,874,000.

The Closing Quotations.

STOCKS DULL IN THE LONDON MARKET.

LONDON, April 12.—Money was more plentiful in the market to-day, and the demand was normal. Discounts were inclined to ease in sympathy with money. Bills were taken more freely, though Paris checks were closely watched.

On the Stock Exchange, trading was inactive largely owing to the absence of support, while awaiting events in the Far East. Consols were quietly steady, but closed easier. The Exchequer bond issue was in moderate investment demand, which maintained first-class securities.

Americans were dull. They opened below parity and the movements were irregular on Wall street manipulation. The feature was a sharp rise in Illinois Central. New York, Ontario and Western was strong in the afternoon. Prices eventually became irregular and closed easy.

War stocks were quiet. Japanese were disposed to harden. Imperial Japanese Government 4s of 1904 were quoted at 101 1-4. Paris supported Internationals.

MAY LEADS IN THE WHEAT DEALINGS.

New York's opening prices in the wheat market to-day were: Wheat—May, 107 1-4; July, 92 1-8; September, 86 1-2.

Chicago's opening prices were: Wheat—May, 115 1-4; July, 87 1-4 to 87 3-8; September, 82 1-4 to 82 3-8. Corn—May, 48 1-2 to 48 3-8; July, 48 1-4; September, 48 1-8 to 48 1-4.

May was the feature of the market.

New York's closing prices were: Wheat—May, 108 3-4 asked; July, 92 bid; September, 86 3-8 asked. Corn—May, 53 5-8 asked; July, 53 5-8.

Chicago's closing prices were: Wheat—May, 115 1-2 bid; July, 87 1-4 to 87 3-8; September, 82 1-4. Corn—April, 48 1-8; May, 48 5-8 asked; July, 48 1-4 asked; September, 48 1-4.

COTTON MARKET STEADY BUT TRADING DULL.

Light rains all through the South checked selling in the Cotton Market to-day and gave it a steady tone at the start, which was its only feature, business continuing narrow, while price changes were few. As the session advanced the market continued quiet at an advance of about 1 to 3 points.

The opening prices were: April, 7.50 bid; May, 7.60 to 7.61; July, 7.55 to 7.56; August, 7.58 to 7.60; September, 7.64 to 7.66; October, 7.70 to 7.71; January, 7.81 to 7.84.

The late prices were: May, 7.58; June, 7.47; July, 50; October, 7.66.

The Morning After

a heavy and rich meal will be unattended by discomfort or sickness if, before going to bed, you will take
