

DISBROW

A Tribute of Appreciation

Combined Churn and Worker.

SOME SAY IT DOES ALL WE CLAIM. • OTHERS SAY WE DON'T CLAIM ENOUGH.

We use Rollers

To work the butter in the Disbrow. We use a peculiar shaped roller. Yes, we have a patent on that shaped roller. Our competitors wish we didn't have. We are not forced to resort to paddles. We don't have to use the side of the churn to work butter against. Did you ever see a butterworker that was a success, without rollers in it? We never did.

The Disbrow will work all the butter it will churn. When you use a Disbrow you don't need to take out part of the butter while you work the rest. That's what you do when you use other kinds

of combined machines. Would you like to know more about the Disbrow? Drop us a postal card.
