And Save Overburdened Taxpayers From the Direct Tax

(Continued From Page One.)

appropriation to the interest of $1,500,000 at 5 per cent.

CONSERVATION COMMISSION WILL BE UNDER FIRE.

The Governor will find the Conservation Commission next in the regular order, and he is respectfully requested to inquire:

Why the salary of the chief clerk (Mr. Dodge, a Republican leader of this County) has been raised from $2,000 to $2,500?

Why was the appropriation for game protection in this department increased from $10,000 to $104,000?

Why was the salary of the Superintendent of Fisheries increased from $2,000 to $2,500?

What is the urgent demanding a new $2,500 one or most of a direct tax year?

Why the appropriation of $6,000 for printing copies of the game laws? Any hunter can get the game laws on asking for them, so why the general distribution every year?

What is the necessity for establishing a game farm in Long Island this year at an expense of $5,000?

What is the meaning of the appropriation of $10,000 for "travelling expenses, pamphlets and sending out trees?"

What is the inside of the appropriation of $10,000 for "studying plans for flood prevention in water storage areas?"

Isn't the appropriation of $2,000 for "a survey of shores of land formed by the Shinnecock Dam" an opening wedge for unloading on the State a lot of land now encumbered by a profitless mill?

Is it necessary to spend $1,000 this direct tax year on walks and grading in public parks?

Why should the State pay $12,000 for assessments against State property for local improvements in up-State communities? This assessment is not made in New York City.

Why an appropriation of $16,000 for printing copies of various "proceedings" at a cost of from $2 to $10 a copy? Do the Commissioners read the newspaper accounts of the libel trial at Syracuse?

Having satisfied himself of the possibility of lopping off $77,300 from the sums asked for by the Conservation Commission, the Governor will next turn, in regular order, to the State Banking Department.

The Governor is requested to ask the representative of that department:

Why he wants $6,900 for steel filing cases in a direct tax year?

The Governor is requested to inquire into the claims of Syracuse for $5,221 and Lockport for $3,127 for the State's share of paving of streets adjoining State property?

STRANGE THINGS IN STATE ENGINEER'S DEPARTMENT.

The Governor is asked to carefully inspect a list of minor items winding up the Supply Bill providing for the payment of "gunshot" men, dictograph operators and others employed by John A. Hennessy and William Sulzer.

The State Engineer's office is next in line. The Governor is respectfully requested to ask the State Engineer:

Is not the item of $33,000 for "surveys and expenses of laborers and engineers" nothing but a cloak for getting $5,000 for political jobs?

What was the necessity for the law appropriating $45,000 for a Bureau of Standards in the State Engineer's office?

Why was the salary of the new chief clerk raised from the old figure of $2,600 to $4,200?

Why is there a demand in a direct tax year of $1,500 additional for office expenses?

If the sum of $82,100 is worth while, the Governor may well spend a little time asking the State Engineer if it cannot be saved.

PATRONAGE IN PUBLIC WORKS?

Next on the list is the Superintendent of Public Works, and the Governor is respectfully requested to ask that official:

Why he wants $940,000 for repairs to the old canals? Isn't this $200,000 in excess of possible requirements and isn't this $300,000 designed for unrestricted patronage? This is a big question and will stand a lot of probing.

Why he wants a supply bill item of $330,000 for lock-tending and repairs? **Just a bare question will open up this subject.**

Why the **Supply Bill** carries an appropriation of **$3,000** for removing ice blockades in the Hudson River between now and Oct. 1? **What kind of ice are we going to have in the Hudson River this summer?**

A matter of **$633,000** in the Superintendent of Public Works' office.

EXTRAVAGANCE IN PUBLIC HIGHWAYS.

And then we come to the Highways, and here the Governor is confronted by an interesting situation. He is respectfully requested to ascertain:

Why there is a general appropriation of **$250,000** for **salaries** in the Highways Department when the money to pay such salaries out of the bond issue revenue, as the law provides, is available? There can be but one answer to this question.

Why an appropriation of $100,000 for "lease on State lands in the Adirondacks?" Is not this an open invitation to the counters to levy $10,000 additional takes against the State?

A little total of $520,000 might be saved in the items mentioned above.

The State Architect follows in regular order and the Governor is respectfully asked to find:

Why the salary of the Secretary to the State Architect has been boosted from $2,200 to $4,000?

Next the Governor is requested to send for the proper authorities and ascertain the meaning of a new item for "valuations and assessments" of $10,000 and a new item of $9,000 for "assessments on State property in the forest preserves." What is behind these two appropriations?

The Superintendent of Public Buildings said when he took office in January that there were too many sinecures in his office and he intended to reduce the staff. **The Governor is earnestly requested to inquire, therefore, why the Superintendent of Buildings has increased his payroll from $141,875 to $155,550, a jump of $13,675.**

CONSTRUCTION BILL A WHALE OF EXTRAVAGANCE.

This disposes of the General Appropriations and Supply Bills and we come now to the Construction Bill, which is a whale. The Governor is respectfully requested to find out for the taxpayers:

Why $752,000 should be appropriated for grade crossings when the money cannot be used until 1917?

Why the need of a new $5,000 printing press for the Educational Department?

What is the need of $25,000 for a kindergarten building for the Institute for Deaf Mutes at Malone?

Why should the State build a $300,000 drill hall for Cornell University, of which sum $150,000 is appropriated in this a direct tax year? What is the pull behind this?

Why should the State pay the Alfred Agricultural School $11,123 for "equipment" in this a direct tax year? Doesn't this appropriation disguise a plan to turn back to the school—a State supported institution—$11,123 in fees which should go to the State?

Why should the Cornell School of Agriculture get $35,000 for conduits and underground steam connections this direct tax year when the request for the same amount for the same purposes was withdrawn last year?

Isn't the appropriation of $200,000 for new buildings for the Long Island Agricultural School $30,000 in excess of the statutory limit put on the cost of these buildings?

Why an appropriation of $35,000 for a new building at the Delhi school when the buildings already appropriated for have not been started?

Why provide $85,000 for furniture and equipment of the Syracuse Forestry School when the buildings have just been started?

Isn't the item of $18,716 for heating the Syracuse school in excess of the statutory limit?

What urgent necessity is there in this direct tax year for moving the grand stand and high house across the race track at the State Fair Grounds in Syracuse at an expense of $70,000?

Why in this direct tax year should the State spend $155,000 on new armories at Buffalo, Yonkers and Rochester?

What is meant by "repairs and equipment" in the item appropriating $85,000 for those purposes in six State prisons and the Matteawan asylum? This is a very broad appropriation.

Is not the appropriation of $150,000 for "miscellaneous repairs, improvements, emergencies and equipment" for the State hospitals fully $100,000 in excess of requirements based on past experience?

The attention of the Governor is called to the fact that hundreds of thousands of dollars are appropriated in the Construction Bill for power houses, boiler houses, ice houses, mortuaries, cold storage plants, quarters for employees and heating plants in the overcrowded insane hospitals, **while ONLY $10,000 IS APPROPRIATED FOR ADDITIONAL ACCOMMODATIONS FOR INMATES.** This situation demands a thorough investigation.

JUST A FEW SCATTERING APPROPRIATIONS.

The State charitable institutions in eighteen separate items ask for approximately $83,350 for "repairs and equipment." The Governor is respectfully and urgently requested to go into these items and find out what "repairs and equipment" mean.

The Governor is requested to ascertain why the Village of Albion, after holding up the State for $25,000 for a sewer system last year, now stands with outstretched hat begging for $900 "to connect the sewer system with the Western House of Refuge."

The Governor is asked to pay particular attention to an item appropriating $25,000 for additional land for the Elmira Reformatory. This looks a purpose to unload a farm on the State. The farm has been rejected in the past.

The attention of the Governor is called to the fact that the last Legislature killed the bill now before him, appropriating $15,000 for additional land for the Training School for Girls at Hudson and $10,000 for fixing up the buildings on said land.

Approximately $270,000 is appropriated in the Supply Bill for new buildings, a decorative bridge and other improvements for the comfort of attendants and employees at Newark, Syracuse and Letchworth Village, all overcrowded institutions, but not one cent is appropriated for ADDITIONAL ACCOMMODATIONS FOR INMATES. There is room for investigation here.

The attention of the Governor is called to an appropriation of $16,000 for boilers, engines, a storehouse and a bakery at the Yorktown school for bad boys. There isn't an inmate in the institution as yet.

Last but not least comes consideration of the special bills. The first to be taken up is that appropriating $3,600,000 for work on the Barge Canal. The Governor is respectfully requested to look into The Evening World's disclosure that there is already obligation over $18,000,000 for this purpose, about twice as much as could possibly be expended.

The Governor is respectfully requested to veto the bill appropriating $10,000 for the improvement of Otter Creek and the Chenango River. This improvement is designed solely to benefit the City of Utica and should be paid for by the City of Utica.

The attention of the Governor is respectfully called to bills appropriating a total of $175,000 for bridges at Lyons, Fort Leyden, Rome, Lyons Falls, Seneca Falls, Yonkers, Fort Miner, Minetto, Whitesboro and Oneida. These are all "pork barrel" bills and should be vetoed without hesitation. The bridges are local improvements and should be paid for by the counties and towns in which they are located.

The Governor is requested to pay close attention to the bill appropriating $10,000 for pontoons, light barges, &c., on the Barge Canal. The Governor is respectfully called upon to remember that these items will not be necessary until the canal is ready for operation, and the canal will not be completed for three years.

The Governor is respectfully informed that no State purpose whatever is served by the improvement of Canandaigua Lake for "the payment of which $15,000 has been appropriated in a special bill. It is a local improvement and the bill should be vetoed.

An appropriation of $8,000 for a school building at Great Meadow Prison should be investigated. The Governor is respectfully requested to ascertain if this school should not be built by the school district, as all other schools are.

The Governor as a lawyer should readily understand what is behind an appropriation of $25,000 for a Commission on Law Reports. The obviously, if this bill will, of course, appeal to him.

AN IDEAL TEACHER.

(From the Richmond Times Dispatch.)

Kind Old Lady—And so you are really your kind of your teacher?

Little Johnny—Yessum. You see, she's so good-natured she can't tell half the times she's sick, and so deaf she never knows whether I spell a word

FRECKLE-FACE

Sun and Wind Bring Out Ugly Spots. How to Remove Easily.

Here's a chance, Miss Freckle-Face, to try a remedy for freckles with the guarantee of a reliable dealer that it will not cost you a penny unless it removes the freckles—while if it does give you a clear complexion the expense is trifling.

Simply get an ounce of othine—double strength—from any druggist and a few applications should show you how easy it is to rid yourself of the homely freckles and get a beautiful complexion. Hardly is more than one ounce needed for the worst case.

Be sure to ask the druggist for the double strength othine, as this is the prescription sold under guarantee of money back if it fails to remove freckles.—Advt.
