GARBAGE CONTRACTORS SUE CITY OFFICIALS FOR $300,000 IN DAMAGES

Borough President Van Name and William G. Willcox Accused of Conspiracy.

Suit for $300,000 damages was begun in the Supreme Court to-day by Gaffney, Gahagan & Van Etten against Borough President Calvin D. Van Name of Richmond, William G. Willcox, President of the Board of Education, and other wealthy members of the Staten Island Vigilance Committee, who have been active in the anti-garbage fight. Gaffney and his associates, under the name of the Metropolitan By-Products Company, Inc., have a contract with the city for the erection and operation of the new garbage disposal plant on Staten Island.

The claim for more than a quarter of a million dollars in damages is based, according to Lewis & Kelsey, attorneys for the contractors, upon the actual monetary loss that has accrued on account of the delay in fulfilling their contract with the city. This delay, it is alleged, was caused by the defendants.

"We want it distinctly understood," said Mr. Kelsey to-day, "that this action is not a bluff. Under the law each person who has been a party to causing this damage is personally liable for the full amount.

"We charge there has been a conspiracy to maliciously interfere with the rights of our clients.

"All this opposition has been created on a wrongful basis. We have guaranteed the Staten Islanders the plant to be erected will not be offensive, but they are too stubborn to listen."

Among the other defendants named are Edward P. Doyle, Roger Doyle, William Wirt Mills, E. C. Bridgman, William J. McDermott, Robert T. Cone, Louis Hugot, Dr. Louis A. Dreyfus, E. W. Brown, A. F. Merrell, G. W. Cole and A. S. Prall.

COULDN'T WASH BOY HOBO WHITE, HE WAS SO BLACK

Comes to Spend Week-End in Berth on Twentieth Century Limited's Bumpers.

Passengers alighting from the Twentieth Century Limited at the Grand Central Terminal this morning were startled when a mud-plastered figure which moved like a human being, but looked more like a landslide, stepped out from between the baggage car and the first Pullman and shuffled down the platform.

"Halt!" shouted Special Officer Daxon.

The command was unnecessary, because a thousand-mile journey on the bumpers is not the best preparation for a foot race. Daxon grabbed the boy and demanded his name. The mud about the upper part of the figure parted in a good-natured grin and a boyish voice replied:

"Vincent Scott. I live at No. 3752 Roads Avenue, Chicago, and I am on my way to spend the week-end with relatives in Plainfield, N. J."

"You'll get life for this," said Detective McCoy, who had come on the scene.

"I—I don't care how long I get if I only get something to eat," said Vincent. "Golly, I could eat a brick without gravy!"

McCoy promised him a good breakfast, but first escorted Vincent to a washroom and with the help of a couple of porters proceeded to launder him. All hands scraped and scrubbed for some time, but Vincent's appearance didn't improve very much.

"No use," announced the perspiring McCoy. "That black will never come off."

"Sure it won't!" chuckled Vincent. "It's mah natchal color."

After the boy had been fed Magistrate Breen ordered that he be detained for a couple of days until he could rest up.

NECK MASSAGE.

The skin on the neck should be smooth and white, and the well-proportioned neck should be neither thin nor fat—in fact rather slender than too plump.

PAULINE FURLONG

Holding the head and chin well up aids greatly in keeping the neck in good condition, and also gives it the appearance of being an inch or more longer than it really is.

While every woman is not born with a beautiful neck, its contour can be much improved through intelligent treatment. The head and chin exercises which have been shown this week will remove superfluous fat from the flabby neck and build up the muscles of the thin one, until they are firm and shapely. Shrunken neck muscles, which cause the scrawny appearance of the neck, may be remedied and developed within a few months of starting the head exercises.

Where the neck appears flat in the front and shows thick layers of fat at the sides, which is a common disfigurement, massage is the best method of evenly distributing the fat.

Any pure cold cream freely rubbed into the neck with the tips of the fingers in small, firm, circular movements will increase the circulation, whiten and improve the shape and outline of the neck. If the neck muscles appear well developed and the throat seems too thick, do not practise the head exercises, but depend entirely on massage to improve its contour and color.

High, tight collars should be avoided by the woman who values the appearance of her neck, throat and chin.

Sponging the neck with diluted lemon juice or peroxide of hydrogen will bleach it and remove stains and lines caused by the high tight collar. It is also effective in taking off tan and sunburn. Equal parts peroxide and witch hazel is another good bleach, and a mixture of glycerine, one ounce, rose water one ounce, carbolic acid five drops and five drops tincture of benzoin is recommended as a valuable neck whitener.

To improve the appearance of the neck which is too oily and continually perspiring, use the following: Rose water two gills, ammonia five drops.

Do not sleep with the head on a high pillow if you would improve the contour of the neck and chin.

Letters From Readers.

SPRING TONIC.—ETHEL T. writes: "Please tell me how to take sulphur and cream of tartar for a spring tonic. I am sure my blood is very bad, for I have pimples and blackheads and am very thin."

Do not take these things, as they will do you no good. Probably you are anemic and certainly your circulation is not good. Why not try the hygienic method to improve the complexion and health? Live in the open, breathe deeply and bathe daily. Choose wholesome, easily digested foods and drink much water and you will not need a tonic.

ROLLING.—MRS. FRANK M. writes: "I have been doing the rolling exercise and others for some months and have taken many inches off of my hips. While I feel fine I am told that rolling is injurious. Is this true?"

Since you have practised the rolling for months, obtained results and feel fine, I think that answers your question. The only danger would be to the breast and not the hips. If possible hold the closed fists on the chest at the armpits to protect the breast. Certainly the exercise could not injure you in any way.

WEIGHS 224 POUNDS.—E. A. W. writes: "Since last summer I have been reading your articles, but cannot diet. I eat a great many cakes and pies and three large meals every day. What kind of baths are best for me? I seldom perspire and know that if I could do so I would lose weight. I would like to know if massage or osteopath treatment would be good for me. I have a weak, fatty heart and feel so discouraged."

If you really have a weak heart you must not take hot, Turkish nor very cold baths. Massage nor any other kind of treatment will do you no good whatever if you do not attempt to curb your appetite. It is the only way for you to reduce your weight. Especially is this true since you are not robust enough to exercise until you are in a perspiration. Why not try the diet and omit all of the fattening foods for a few weeks? You will be so pleased with the results that you will never eat three hearty meals a day of starches and heavy foods again. You will not even have a desire for food, which, of course, makes it easier for you to go without so much.

WANTS MEASUREMENTS.—L. O. B. writes: "Have lost the copy of the paper containing the measuring chart. Please tell me how near I am to being perfect. Height, 5 feet 4 inches; weight, 127½ pounds."

The average height for woman is 5 feet 4 to 5 feet 5 inches. For your height the correct weight should be 125, several pounds more or less, according to your bones. Bust, 36; waist, 27; hips, 38; thighs, 22; calf, 13½; ankle, 8.

LOWERED VITALITY.—MRS. E. K. writes: "Kindly let me know what is good for nervousness. My heart is always nearly jumping out of my body, it seems. I have pains in the back of my neck and get very weak after eating. When I read I get pains in the top of my head. Is boiled rice good to eat or is too heavy?"

You should see a physician and have him make an examination. Your questions are medical ones, and I am not a doctor. Probably your eyes need attention also. Boiled rice is a wholesome and nourishing food and good for thin persons.

WIDOW AND CHILD WIN $25,000 FOR AUTO DEATH

White Plains Law Librarian Was Killed When Brewery Truck Ran Down Touring Car.

A verdict for $25,000 was returned yesterday by a jury in the Supreme Court at White Plains for the death of Harry R. Koster, page to the Board of Supervisors and County Court Law Librarian.

Mr. Koster was killed in an automobile accident last January. Mrs. Margaret M. Koster, his wife, sued, as administratrix, for herself and her infant son.

Koster, with a party of friends, was riding on Mamaroneck Avenue when a truck, owned by the Westchester Brewing Company, tried to cross the thoroughfare and struck the touring car. It tore off a rear wheel, and the machine turned bottom up with the occupants under it.

Mr. Koster was pinned down in the wreckage and so badly injured that he never regained consciousness. He died in a few hours in the White Plains Hospital.

ITEMS FOR INVESTORS.

Crucible Steel Company has declared the regular quarterly dividend of 1¾ per cent. on preferred and an extra ¼ of 1 per cent. to apply on back dividends on preferred stock. This leaves a balance of 24¼ per cent. unpaid. Dividends are payable June 30. Books close June 19.

SLEEP WALKER LOSES LEG.

Samuel Gordon Falls Three Stories Through Window Pane.

His left leg so nearly severed in a fall through a third-story window that that Dr. Kramer of Lebanon Hospital completed the amputation with a small pair of scissors, Samuel Gordon, a tailor, thirty-nine years old, of No. 1390 Franklin Avenue, the Bronx, is dying in the hospital from loss of blood.

In a sleep-walking trance Gordon fell through the window at 2 o'clock this morning. Dr. Kramer found the window sash had practically amputated Gordon's leg, which hung only by a shred. The small operation was performed on the spot before taking the unconscious man to the hospital. Gordon's left wrist was also badly cut and he suffered internal injuries in the fall.

Newsies Get Auto Ride and Dinner.

Thursday night was a big night for Greeley Square newsboys. They had an automobile ride to Coney Island and a real hotel dinner. Both were paid for by Charles Barrett, general manager of the Hudson and Manhattan Railroad Company, in recognition of their aid in preventing congestion at the entrances to the Thirty-third Street tube station.

An Unusual Watch

The *Lifetime* (Registered) Series

of the La Forge & Valentine Watches

Guaranteed for the Lifetime of the Owner

A NEW AND UNIQUE IDEA

Your Reliable Companion for Life

This is the first time, anywhere, that a watch has been offered for sale with a *Lifetime* guaranty. The movement of the watch is especially constructed for *R. H. Macy & Co.* It has 23 jewels, is adjusted to temperature and all positions, and is as nearly a perfect piece of watch machinery as it is possible to produce. Nothing has been overlooked that would affect the time-keeping or enduring quality of this watch; and, yet, nothing has been put into it that would make it expensive, without adding to its serviceability. The case of a *Lifetime* watch is heavy 14 kt. solid gold, containing an inscription on the inside cap; a facsimile of which is shown at the bottom of this advertisement, above the Macy signature.

When you buy a Lifetime watch of R. H. Macy & Co. you are not buying a watch in the ordinary sense of the word. You are buying correct time-service for the rest of your life.

Let us consider fifty years as the estimated length of time a *Lifetime* watch will be used.

This service will cost a little less than one-half cent a day.

That is what we mean by a *Lifetime* watch.

The first cost is the only cost of this time-service. Never again must you pay for a broken crystal, a broken mainspring, for having the watch cleaned, or anything else, for that matter. Absolutely everything that may happen to a watch (except the loss of it) is covered by *R. H. Macy & Co.'s* guaranty that this watch will give the owner satisfactory service during his whole *Lifetime* and never cost anything for keeping it in order.

This extraordinary proposition is the result of many years' experience with La Forge & Valentine watches, during which time R. H. Macy & Co. have made customers into friends, and friends into customers, by selling them La Forge & Valentine watches.

This *Lifetime* series of the La Forge & Valentine watches is built for long life, and not for extreme style; the appearance of the watch is refined and modest, and it is, in every sense, a "well-dressed" watch, fit to be the *Lifetime* companion of a gentleman who is careful of his associates.

"Punctuality is the politeness of kings," but to the ordinary mortal, whose time is valuable and whose appointments must be kept promptly, punctuality is much more than politeness. It is a necessity; and to him, the faithful, unceasing service of a Lifetime watch will be most acceptable.

When you wish to make a gift to a dear friend, or, possibly, to your son on Graduation Day, there is a nice sentiment in the idea that the watch he receives will be carried all his life and will never cost anything for repairs.

If this watch is dropped and broken, instead of taking it to a jewelry store, and paying a price which corresponds with the expensive location of such an establishment *R. H. Macy & Co.* will make the necessary repairs, without charge, because the watch has been guaranteed for the *Lifetime* of the owner.

Every good watch should be cleaned at least once in two years. This costs anywhere from $2 to $5, but a *Lifetime* watch will be cleaned regularly, without charge.

And most important of all is the fact that, when you look at the face of your Lifetime watch, you may be assured of its truthfulness, without certification from a church steeple, a jeweler's window, or the railroad station clock.

With each watch is delivered a complete set of instructions for the common-sense care of a fine watch, which, if followed, will help to make the watch more accurate, for even the finest machinery will give better service with careful, intelligent handling than it will without that attention.

Every *Lifetime* watch is timed and regulated for 30 days, and a complete record is kept of the individual performance of each watch before it is offered for sale. By this means we are enabled to assure each purchaser that his watch will keep accurate time.

When a *Lifetime* watch is sold, the owner's signature is registered in our *Lifetime* Record Book, and, to have repairs made without charge, it is necessary for the owner to bring his watch to us, or else send it to us with an order over his signature.

The price of this watch is a very moderate one for such a high-grade time-piece, even *without* our *Lifetime* guaranty, for, while it has all the good qualities which are
