SNOW PERIL SEEN AS REMOVAL BIDS ARE TURNED DOWN

Rejected by Craig, Who Says Some Seeking Work "Fell Down" on Job.

Efforts of the committee headed by Fire Chief Kenlon to insure the city against being caught unprepared against another heavy snowfall apparently have come to naught. The only thing accomplished was that some $400,000 worth of special equipment for snow removal below 14th Street has been ordered.

That the city will be at the mercy of the first big snowfall, just as it was in previous years, was made clear today when Deputy Street Cleaning Commissioner Eschman complained that all of the seven bids received for clearing the streets of snow had been thrown out by Comptroller Craig. It was pointed out that the special equipment cannot be available before Dec. 15 and may not be ready before late next month.

An appeal to truck owners to place their trucks at the city's disposal in an emergency has resulted in only 600 owners pledging aid, it was stated.

Comptroller Craig admitted that the bids had been thrown out. He said one of the bidders had "fallen down" on a contract last year, while the others had failed to show experience.

The Comptroller suggested that Street Cleaning Commissioner MacStay readvertise for bids. He declared the matter of removing snow was largely a question of administration. Any competent man could handle the job, he said.

The twelve day snow blockade last winter cost the city $5,500,000, and it was estimated by the Merchants' Association that the cost to business was $60,000,000.

Let the "EASY" Save Your Laundry Bills

Like everything else your laundry bills have been increasing. The total amount of money you spent last year to keep the family clothes clean will buy an "EASY" and at the same time will double the life of your clothing.

Instead of the two human hands of your laundress, moving up and down in the soapy water, the "EASY" has two vacuum cups, making 60 strokes per minute, and taking a new position on each downward stroke, forcing the hot soapy water through the mesh of the garments by air *pressure* and *suction*, and creating a vigorous water force which dirt cannot resist. The "EASY" will wash the daintiest laces, silks and fabrics or the heavier blankets and woolens, leaving them soft and fluffy and without the slightest injury, wear or tear. There is no friction, rubbing or jerking—no dragging, and the clothes are as carefully cleansed as your expert laundress could cleanse them.

The "EASY" is made of solid copper, brass, aluminum and steel. It is durable and sanitary, simple in construction, easy to understand and operate. Its large round copper tank provides greater capacity than other washers and it has no corners or crevices to collect dirt—is adjustable to large or small washings; equipped with an electric swinging wringer, and a gas heater, if desired. All mechanism, including motor, is suspended from metal chasis under the round copper tank and is out of the way.

Ask any dealer on the following list for a free demonstration of your next week's washing in your own home—without obligation.
