"10 TO 3" WALL STREET

Features of the Trading, Hour by Hour

10 TO 11.

The new week brought no change in speculative sentiment in Wall Street. If anything, pessimism was even more marked. All markets were weak. Stocks dropped from one to more than three points. The break in sterling exchange was more or less sensational. During the first hour it sold at $3.79 1-2, a drop of 4 5-8 cents compared with the close of Saturday. Cotton was down from 12 to 20 points. During the first hour of business wheat declined from 1 to 1 1-2 cents.

Weakness of the stock market was given added significance by reason of the fact that pressure of liquidation and short sales was not pronounced at any time. In fact, trading was comparatively dull. Transactions during the first hour totalled only 170,000 shares. But it seemed at times that stocks were being pressed for sale as fast as the market could absorb them without precipitating a serious break.

Reflection of current pessimism was found in talk of further steel price reductions, in predictions of numerous additional industrial dividend cuts, in disquieting reports of the loan position of financial institutions situated in Western and Southern agricultural communities, and the bear position was further fortified by the continuance of a 7 1-2 per cent. renewal rate for call money.

Greatest weakness was shown by the sugar group of shares. An unfavorable influence working in this group was a further drop in the price of both refined and raw sugar. Also, cables stated that another important Cuban bank, with sixty branches throughout the island, probably would be forced to suspend payments to-day. American Sugar Refining during the first hour dropped four points, to the lowest price in a generation, and other leading sugar shares were off from one to more than two points.

Action of United States Steel plainly suggested that it was being liquidated. It sold down more than a point compared with the close of Saturday. Other steel shares registered proportionate declines. On the other hand equipments were notably firm, and although it was generally expected that the Chandler Motors Company would reduce its dividend from 10 to 6 per cent. at to-day's meeting, that issue went down only a point, and in the remainder of the motor group changes were fairly evenly divided between gains and losses. Coppers were irregular and rails were fractionally lower, apparently in sympathy with the weakness of steels and miscellaneous industrials.

11 TO 12.

There was no special change in the character of the trading during the second hour. Bears derived further encouragement from the fact that stocks failed to develop rallying power, and increased short sales forced several issues in the miscellaneous industrial list to new lows for the day. Corn Products sold down a point. Chemical shares turned distinctly weak, and steel, sugar and food shares continued to hover around their earlier low marks. Rails continued to move within a fractional range, but with a lower tendency. Government and corporation bonds were generaly lower. The loss in Liberty Loan issues averaged about 10 points.

12 TO 1.

Price movements during the third hour were meaningless. It was announced that the Chandler Motor Company had reduced the dividend from a 10 to a 6 per cent. annual basis, but inasmuch as such action was in line with general expectations the reduction was without market effect. An official estimate of earnings of the International Mercantile Marine Company for 1920, which showed a large decrease in net income compared with the previous year, likewise was without effect.

Practically all groups of stock were dull and fluctuated within narrow fractions of the low prices of the day. Equipments failed to maintain their steady tone and receded about a point from the high prices of the morning.

1 TO 2.

The market developed an easier tendency during the fourth hour, which was directly attributable to the market weakness of foreign exchange. Demand sterling dropped to $3.78 3-4, a decline of nearly seven cents compared with the close of Saturday. Also, time money rates displayed a slightly harder tendency. Certain bankers are disinclined to renew maturing loans at 7 per cent. These factors caused most of the market leaders to sell into new low ground for the day, and at to-day's bottom figures quite a number of stocks were at the lows of the last ten years or more.

2 TO 3.

The market was called upon to withstand further unfavorable reports during the last hour. For instance, Chicago despatches stated that orders for a referendum vote had been sent out to 250,000 maintenance of way employees, asking if they would accept a wage cut or strike. Demand sterling extended its decline to a full 7 cents to the pound, and there were insistent reports that a further cut is impending in the price of Mid-Continent crude oil because of the fact that production has reached record proportions.

Leading railroad stocks extended their losses from 1 to more than 2 points. Mexican Petroleum and General Asphalt fell rather sharply. U. S. Rubber sold at 61 1-2 for a loss of 2 1-2 points compared with the close of Saturday, and the leading steel shares extended their declines to from 1 to more than 2 points.

Sugar shares worked into new low ground, and chemical, motor, copper, tobacco, food and equipments issues all made new lows for the day. It seemed to be the consensus of opinion among best posted brokers that selling was pretty evenly divided between short selling and liquidating sales. The tone at the close was weak.

FOREIGN EXCHANGE OPENING.
