"10 TO 3" WALL STREET

Features of the Trading, Hour by Hour

10 TO 11.

News of market interest over the week end was colorless and price movements of stocks this morning were very much mixed. At the same time it was evident that financial sentiment continued very cheerful. Reluctance of traders to make new market commitments on the long side was due mostly to the fact that prices have had a sustained upward movement which has somewhat weakened the technical position. These traders believe that a reaction is necessary before the advance can be resumed.

Part of the present optimism is due to the belief that there will be important railroad developments during the present week. These expected developments have no relation to the statements of earnings which will begin to appear and which will make a very favorable comparison with those of September. It is stated that there will be an important announcement from Washington of a character that cannot help but strengthen confidence of investors in railway securities.

The strongest group of stocks in early trading were the coppers. The price of the metal has been advanced more than a half-cent a pound in the last month. This has been of tremendous importance to the large producers. A further advance is expected to be made this week. And a leading copper interest stated this morning that surplus stocks have been so much reduced it will not be long before the larger companies begin to make preparations for the resumption of production.

Anaconda Copper went up more than a point to a new high for the year, and proportionate strength was displayed by other of the leading coppers.

There was further strong buying of the leading public utility shares in spite of the recent pronounced rise American Telephone has had. It was able to touch a new high for the year with a net gain of two points.

Railroad shares were irregular in motors, oils and equipments gains were about evenly divided with losses.

11 TO 12.

The market continued to have a very two-sided appearance in the second hour. In fact, all markets were more or less apathetic.

With the exception of demand sterling all the principal foreign exchange rates were lower. German marks failed to be favorably influenced by the announcement of Chancellor Wirth that Germany will meet the next indemnity installment of 500,000,000 marks. It is the opinion of Wall Street that this can only be done by the sale of marks and the purchase of other exchanges.

Cotton was firm, but trading was comparatively quiet. Wheat and grain failed to develop material change. Money renewed at 5 per cent. Bonds were firm.

12 TO 1.

The market still refused to develop a definite trend during the noon hour. Bears increased the pressure of their offerings but in the main these were quite easily absorbed.

A few specialties were down a point or so, but the rails continued firm, and there was a continuation of the excellent buying in the copper shares.

American Ice worked up to a new high record and department store stocks were strong under leadership of Macy's, Gimbel's and Stores.

As opposed to the firmness of United States Steel Crucible sold off about a point, and sugar shares developed heaviness. Motors were irregular, but the oils worked up to new high points for the day.

1 TO 2.

Crucible—certain of the equipments and several of the motor shares—continued to be sold by the professional element as the session progressed, and, while recessions of a point or more became more general in the speculative leaders, the list as a whole displayed a larger degree of firmness. The market seemed to be duplicating its performance on most days of last week; that is accumulation of stocks made its appearance on every reaction.

Money continued to rule at 5 per cent., but time loans are being arranged at the same figure, and the money situation, analyzed from a broad viewpoint, is much in favor of holders of securities.

2 TO 3.

Although the short interest in the last hour made a vigorous attempt to check the advance, and had the advantage of a rise in the rate for call money to 5 1-2 per cent., the market with the exception of a few specialties, worked up into new high ground under the leadership of United States Steel.

Rails were subjected to profit taking by holders who purchased at the initiation of the recent rise, but in the main this profit taking was quite well absorbed, and most price changes were upward.

American Telephone and most of the other public utility stocks were also involved in profit taking. They maintained a good tone. Coppers closed at or near the highest of the day. Cotton closed with a net gain of slightly more than $1 a bale. Wheat advanced slightly more than a cent a bushel.

NEVER GUARANTEED SAFETY OF PHILIPPINES

Rumor That Britain Had Done So is Denied.

WASHINGTON, Nov. 16.—An emphatic denial was made to-day by high British sources that Great Britain had informed the United States that she is willing to guarantee the safety of the Philippines in the event that the American programme for limitation of armament is finally adopted.

It was stated that such a proposal had not been under discussion.

Wall St. Gossip

The weekly condition statement of the Bank of Germany, issued this morning, shows the familiar increase in circulation. This item now stands at 95,186,100,000 marks, a new high record and an increase of 2,576,200,000 marks over a week ago. The total issue of Treasury bills is listed at 103,725,700,000 marks, also a new high record, and an increase of $5,586,100,000 marks during the past week. It is readily apparent that German printing presses continue to turn out marks as fast as they are able.

When American Telephone sold at 119½ this morning it was at the highest figure since 1917, and showed a gain of more than 27 points over the low mark of 1920. Investment brokers report that the demand for these shares has come from all over the country. It seems to be due not only to the ease in money rates but to a better appreciation of the improved position of the company. In 1920 the company earned 11.70 per cent on $442,825,400 stock. It is expected that this year the company will show 12 per cent, or slightly better earned on $534,974,500 stock.

There has been much speculative selling of Mexican Petroleum on the theory that directors will be forced to reduce the common dividend when they meet next month. But this opinion is now being revised. Current strength of the shares is due in no small part to the endeavor of the large short interest to cover a part of their commitments.

It was announced by the National City Company that the $20,000,000 Consolidated Gas Company one year 7per cent notes offered at 100⅞, and interest, yielding 6.08 per cent had been over-subscribed shortly after the opening of the subscription books.

The annual meeting of the International Paper Company will be held shortly. The stock to-day sold at 58, a new high for the present upward movement. Control of the company has been lodged with Boston interests. But the financial district now hears the report that Western interests now have a working control and present buying of the stock is said to be of a competitive character.

Speyer & Co. were overwhelmed with applications for participations in the Missouri, Kansas and Texas Railway Underwriting Syndicate, which they are forming in conjunction with J. & W. Seligman & Co., Hallgarten & Co., and the Equitable Trust Company. The syndicate is for $18,400,000, the amount of the assessment provided for by the plan of reorganization on the preferred and common shares of the Missouri, Kansas & Texas Railway Company. On account of the very large oversubscription allotments will have to be very much reduced.

KIN OF DICKENS ASKS $100,000 HEART BALM

Wealthy Importer Named by Friend of Geraldine Farrar.

Miss Virginia Lee Dickens, who says she is a descendant of the novelist and is known among theatrical people as a friend of Miss Geraldine Farrar, started suit for $100,000 to-day through Benjamin Shalleck against Thomas K. Gibbons, Vice President of Riker, Spiegelman & Co., No. 113 Chambers Street, importers.

Miss Dickens, who is twenty years old and very pretty, says that Mr. Gibbons laid siege to her heart by promising to take her to Arabia to live after they were married. He talked of camel rides by moonlight and incense burners outside their tent and all that sort of thing, she said, until last July 9 she promised to be his. Then, according to her complaint, he went and married another girl.

WORKER JAILED FOR SMOKING IN FACTORY

Court Says Brodsky Endangered Lives of Others.

Isidor Brodsky, forty-three years old of No. 1270 42d Street, Brooklyn, was to-day sent to jail without the option of a fine for three days for smoking a cigarette.

Brodsky was employed in a wood working factory in the basement of No. 116 West 21st Street, and the floor, it is claimed, was covered with shavings. Magistrate W. Bruce Cobb, who sentenced him in the Municipal Term Court, declared that he was endangering the lives of others.

Prices realized on Swift & Company sales of carcass beef in New York City for week ending Saturday, Nov. 19, on shipments sold out, ranged from 9.00 cents to 19.00 cents per pound and averaged 12.29 cents per pound.—Advt.

CHERRY HILL BOYS GIVE FOCH MEDAL

One of the most highly appreciated souvenirs of his visit to New York which Marshal Foch took away with him last night was a gold medal presented to him yesterday at St. Patrick's Cathedral by Capt. Stanley Saulnier, of the Columbus Volunteers, an organization of World War veterans from Cherry Hill, who were recruited by and trained under the direction of the Sisters of Christian Doctrine, Mother Superior Marguerite, in Cherry Street.

The Cherry Hill boys won rare distinction in the fighting in France and as a mark of honor three squads of them, in uniform, were the guards of the Marshal at the Sathedray.

The medal is inscribed "World War Veterans of the Columbus Volunteers to the greatest soldier of the age, Ferdinand Foch, Marshal of France." It was in a plush box of Lorraine blue lined with champagne colored satin, the colors being reminiscent of the fields of service of the Cherry Hill boys in the Lorraine and Champagne sectors.

Acquitted of Murder He Is Alleged to Have Confessed.

Rosario Arcigiagno of Bridgeport, Conn., was acquitted to-day by a jury before Judge Crain of the charge of murdering Rosario Peruso of No. 102 Oliver Street by shooting on Oct. 23, 1915. Arcigiagno was serving a term in a Connecticut prison for assault when acquaintances informed the New York authorities he had told of killing Peruso. He was brought here last August, when his sentence was expired. Judge Crain held there was no corroboration of the confession.

Three Fined for Cruelty to Animals.

Fines of $10 each were imposed by Magistrate Simpson in Essex Market Court to-day on two peddlers and a chicken dealer charged with cruelty to animals. Joseph Kahn, of No. 63 East 98th Street, was alleged to have had live rabbits and young goats hanging by their legs on his wagon. Mike Rizzo, of No. 184 East 11th Street, was alleged to have locked the wings of chickens to keep them from running about. John Ladato, of No. 57 Goerck Street, failed to provide food and water for a wagon-load of chickens.
