Stocks

Wall Street, March 20.
[By The Associated Press]

The many additional advances registered in stocks were accompanied by another large volume of business, in which signs of a reawakening of public interest were not wholly lacking. The fact that one stock—United States Steel—contributed over 20 per cent of the total operations detracted in a measure from the impressiveness of the rise.

More than half of the overturn occurred before midday, the market thereafter settling down to a moderate pace, with intermittent realizing. Traders showed increasing caution later on the possibility of unlooked-for developments from Washington.

The higher trend was inaugurated at the outset, most of the speculative favorites showing initial gains of 1 to 2 points. Rails, which remained under the conflicting influences created by the Supreme Court decision affirming the Adamson law, were less active and strong, though recording gains of 1 to 2 points.

Among the more striking features of the session were Bethlehem Steel issues at gross gains of 9½ to 10¾ points, the new stock touching 139¾ and the old 146. United States Steel rose to its best price so far this year, making an extreme gain of 2½ to 117, at which quotation it closed on free absorption of large lots.

Other strong industrials were Sloss-Sheffield Steel, Crucible Steel, Lackawanna Steel, Gulf States Steel, Republic Iron and Colorado Fuel, at extreme gains of 2 to 6 points, with 2 to 4 for equipments, an average of 3 for oils and 2 to 4 for sugars, leathers, Industrial Alcohol and International Agricultural Chemical preferred. Metals were less prominent than usual, that group being featured by International Nickel at a gain of 4¾ points to 46⅝.

Shippings augmented recent advances, Marine preferred rising 5⅞ to 93⅝, with 2 to 4 for Marine common, Atlantic, Gulf and West Indies and United Fruit.

All classes of bonds were strong, with marked gains in St. Louis & San Francisco issues. United States bonds were unchanged on call.

Curb Market

Note.—The Tribune assumes no responsibility for the accuracy or authenticity of curb market quotations. The New York Curb Association produces no official quotation list. Quotations are reported by individuals over whom the association has no control. Any one can make prices on the curb and get them printed in the daily lists, even without the formality of first submitting the shares to the Curb Association for its approval. Some securities are regularly listed—that is, they are approved for trading by the Curb Association, and it is required that information concerning them will be filed from time to time with the secretary. Such information is open to public inspection. Some other securities, like the Standard Oil subsidiaries, are "admitted to quotation" without a regular listing. A greater number are unlisted. No one has any authority over them. Unlisted stocks are marked thus (*). They are principally mining stocks, and most of them are "prospects," but there is nothing to distinguish "prospects" from "operating properties" in the unlisted group. There are a few listed mining stocks, and among these "prospects" are distinguished by the abbreviation "a pros." after the name. With this notice duly given, The Tribune prints all quotations without further responsibility. Transactions and prices Tuesday were reported as follows:
