Industrial List Shows Firmness: Rails Are Heavy

Weakness in Northern Pacific and Great Northern Preferred; Market Sentiment Cheered by News From Chicago

Speculative stocks continued yesterday under the influence of the news from Chicago, and, as Wall Street viewed the proceedings with more or less satisfaction, since the developments in that quarter pointed to the elimination of radical candidates for the nomination, the market displayed general strength, although there was some degree of irregularity.

Stocks started out with a vigorous exhibition of strength on buying which came over the wires from the West. This caused further covering by shorts who have been retiring their contracts since the middle of the week, and imparted a tone of pronounced strength to a number of the speculative favorites, notably Baldwin Locomotive and Crucible Steel. In the closing hour of the brief session, however, the movement lost its momentum and trading slowed down, with prices eased off. Baldwin Locomotive lost all of its early gain, but Crucible held well and closed at an advance of more than 6 points net.

The one unfavorable development in the market was the pronounced weakness of Great Northern preferred and Northern Pacific, both of these standard dividend-paying rails dropping more than 2 points on selling that bore all the earmarks of liquidation. The turn-over in the former exceeded 5,000 shares and in the latter more than 4,000 shares, heavy trading for these issues, especially in a two-hour session. The selling seemed to be based upon a belief that the two roads might have to follow the example set by the Chicago & Northwestern and cut their dividends.

The Federal Reserve Bank of New York improved its position slightly last week, increasing its ratio of reserves to note and deposit liabilities from 40.1 per cent to 40.6 per cent. The bank reported an increase in rediscounts of member banks but a decrease in rediscounts of banks in other districts sufficient to more than offset it. There was a small increase in gold. The New York Clearing House banks increased surplus reserved $9,531,510, while loans and discounts contracted $15,264,000.

The Dollar in Foreign Exchange

Sterling exchange gained more than four cents to the pound during the last week, but continental exchanges, measured in terms of the dollar, were easier. The increase in the gold holdings of the Bank of England led to the belief that Britain was preparing for further gold shipments to this country in anticipation of the maturity of the Anglo-French loan of $500,000,000 on October 15 next.

The statement of the Chancellor of the Exchequer this half of England's share of the loan had already been brought back in the open market added fresh strength to sterling exchange, though it merely officially confirmed what was already known by well informed observers on both sides of the water. Anglo-French bonds were strong all through the week, and bond men said that agents acted for J. P. Morgan & Co., fiscal agents for Great Britain and France, were ready to buy all the bonds that were offered.

It is generally believed in banking circles here that France will meeet its share of the maturit by getting a new loan in London, and its efforts to get this accommodation will be facilitated by the fact that the Anglo-French operation is a joint and several obligation, making each country responsible for the full $500,000,000.

The Indian and Chinese exchanges were weak during the last week, partly as a result of the curtailment of exports.

If you calculate the cost of the dollar in terms of foreign money at current exchange values—that is, if you were buying a dollar with pounds, marks or francs—its value at the close of last week, as compared with a year ago, follows:

	Yesterday.	Year aog.
In English money	$1.20	$1.05
In French money	2.36	1.21
In Dutch money	1.07	1.01
In Swiss money	1.16	1.01

Qualify for Bequests

The complete list of financial institutions which have qualified to accept bequests as members of the New York Community Trust Association was made public yesterday as follows:

Equitable Trust Compan, Columbia Trust Company, New York Trust Company, U. S. Mortgage & Trust Company, Metropolitan Trust Company, Manufacturers Trust, Franklin Trust, Kings County Trust, Mercantile Trust, Fidelity Trust, American Exchange National Bank, Hamilton Trust, Hudson Trust, Commercial Trust, Harriman National Bank, Irving National Bank, Bank of America, and Title Guarantee Trust.

The New York' Community Trust plan is modeled on that of the Cleveland Foundation, as conceived and developed by Judge Frederick H. Goff, president of the Cleveland Trust Company. The purpose of the association is the welfare of New York through bequests from wealthy individuals.

London Money Market

LONDON, June 12.—Bar silver 50¼d per ounce; bar gold 104s 2d. Money 4½ per cent. Discount rates: short bills 6⅝@6 9-16 per cent; three months bills 6⅝@6 11-16 per cent. Gold premium at Lisbon $140.
