Acceptances	5,815,400.41
	$176,866,982.76

State of New York, County of New York, ss: Edwin S. Marston, one of the managing officers, and Charles A. Peabody and Henry R. Taylor, two of the directors of The Farmers Loan and Trust Company, a corporation of the State of New York, being severally duly sworn, each upon his oath states:

That he makes this affidavit for the purpose of complying with the requirements of Sections 9 and 10 of an Act of the General Assembly of the State of Illinois, entitled, "An Act to Provide for and Regulate the Administration of Trusts by Trust Companies."

That the foregoing report of the said The Farmers Loan and Trust Company, on December 31st, 1920, and exhibits accompanying the same, are true and correct in all respects to the best of his knowledge and belief.

EDWIN S. MARSTON,
CHARLES A. PEABODY,
HENRY R. TAYLOR.

Subscribed and sworn to before me, this 7th day of January, 1921.

[SEAL.] R. H. KNOX, Notary Public.

Reserve Discounts and Loans Drop 122 Millions

Smaller Reductions in Deposits and Borrowings Shown in Reports From 832 Banks

From The Tribune's Washington Bureau

WASHINGTON, Feb. 20.—Aggregate reductions of about 122 millions in loans and discounts and of 148 millions in total loans and investments, accompanied by smaller reductions in deposits and in borrowings from the Federal Reserve banks, are indicated in the Federal Reserve Board's consolidated statement of condition of February 11 of 832 member banks in leading cities.

All classes of loans and discounts show substantial decreases for the week; loans secured by government obligations, by 14 millions; loans secured by stocks and bonds, by 21 millions, and other loans mainly of a commercial character, by 87 millions. For member banks in New York City corresponding reductions of 3, 19 and 40 millions are shown. As against an increase of 5 millions in Victory notes, the banks show reductions of 9 millions in United States bonds and of 14 millions in Treasury certificates, total certificates holdings of 205 millions on February 11 constituting a low record since the termination of the war. Holdings of corporate securities declined by 9 millions, the greater part in New York City.

Accommodation of the reporting banks at the Federal Reserve banks shows a decline for the week from 3,900 to 1,873 millions, or from 11.7 to 11.6 per cent of their total loans and investments. For the New York City members a reduction of accommodation at the local reserve bank from 861 to 833 millions and a decline in the ratio of accommodation from 16 to 15.7 per cent are noted.

Government deposits fell off 41 millions at all reporting banks and about 20 millions at New York City banks; net demand deposits show a total decline of 22 millions and a larger decline of 48 millions in New York City, while time deposits show a total reduction of 6 millions, as against a gain of 2 millions at the New York City banks.

Reserve balances of all reporting banks declined by 12 millions (15 millions in New York City), and cash in vault by 19 millions (5 millions in New York City). Since December 24 vault cash of the reporting institutions has fallen off by 42 millions, or by about 12 per cent.

Little Hope of Reducing Taxation Burden on British Industry Seen

Chamberlain's Plea of Need of Funds to Meet Debt Redemption Disappointing to Business Men; Budget Not Too High, Belief

By Hartley Withers
Editor The Economist

Special Cable to The Tribune

Copyright, 1921, New York Tribune Inc.

LONDON, Feb. 20.—There was nothing new or startling in the speech of King George opening Parliament. Reference to restoration of peace in Europe, expressing hope for the successful conclusion of the Russian trade agreement, a reduction of government expenditures and complete freedom of the coal trade from government control foreshadows a bill to protect the key industries.

There may be measures also dealing with unfair abnormal competition, regulating the liquor traffic, organization of the transport industry and, if possible, reformation of the House of Lords as well as other measures having no bearing on the financial world.

The House of Commons started work on the unemployment problem with a debate which shed little or no light on the subject. The general opinion is growing that maintenance of the unemployed by the state is dangerous, demoralizing and liable to abuse. It is felt that each industry should maintain its unemployed with possibly a contribution from the state. An attempt to debate the question of public economy was suppressed by the Speaker of the House as out of order. No doubt this caused little loss, as the public is sick of the endlessly repeated hot air on the subject and is determined to obtain practical results, which the government, much alarmed by the recent elections, will try hard to produce.

Sees Little Tax Relief

J. Austen Chamberlain, Chancellor of the Exchequer, answering a deputation of representing industrialists who maintain that the burden on industry will be excessive in spite of abolition of the excess profits duty, held out no hope for a reduction of the income tax and reminded his hearers that the pre-war budget of £200,000,000—representing at the present value of money £500,000,000—had been increased by the war debt service of £325,000,000 and war pensions of £125,000,000, making a total of £950,000,000 in the aggregate.

In view of this amount a reduction in income taxes would be impossible, the Chancellor contended. With regard to the rate of debt redemption, which the deputation thought could be reduced, Mr. Chamberlain observed that a certain amount of redemption was inevitable because certain securities issued during and after the close of the war carried the privilege of being presented for tax payments.

His view was that since the government was unable to borrow funds in the present high rate money market it would be obliged to redeem a certain amount of the debts. It seems probable that the contention of business men against taxation for the purpose of debt redemption is based on misapprehension of its economic effects.

Different From Other Taxes

Sir Josiah Stamp, the leading authority here on taxation problems, maintained in a recent lecture that the effect of taxation for debt redemption service is different from other taxation. Taxes for interest on the home debt are only transfers of buying power, although they may produce some dislocation and friction, he contended.

Such taxation transfers saving power and may conceivably increase it, although if too severe it runs the danger of checking production, he said. Sir Josiah also somewhat contradicted the outcry about the nation's being taxed beyond its capacity, maintaining that we might be able to just stand a budget of £1,550,000,000 if £300,000,000 of this were for redemption of the home debt.

If this high authority is correct in his argument, the government's proposed budget of £950,000,000 seems to leave considerable margin for capital purposes, although the £950,000,000 mentioned apparently does not include any provision for debt redemption, which Mr. Chamberlain presumably will provide from arrears and from the sale of war assets.

Taxes continue to come in surprising well, and the financial position of the country is gradually improving.

Industrial Outlook More Hopeful

The industrial outlook is still bud, but even here glimmers of hope are seen, with factories occasionally restarting on increased orders booked in some lines.

There is apparently no change in the Continental situation, but favorable reports are heard of a strong undertone of German industry, with the possibility of a rapid recovery once the indemnity question is settled on a reasonable basis.

There is some possibility of this happening, too, but not so much because of a more reasonable attitude among the Allies as because of a fear of the industrial consequences if German industry is too greatly stimulated to efficiency and economy by the need of producing export goods and so cutting out Allied producers in the home and neutral markets.

Contraction of the circulation of the Bank of England and treasury notes continues.

The export credits scheme seems to have been temporarily shelved, if not entirely dropped.
