Stocks Rise, Then React Toward Close

Profit Taking Effaces Early Gains as Some Stocks Reach Year's High Mark; Position of Exchanges

With the Conference on the Limitation of Armament scheduled to open to-morrow, the European exchanges were nervous and unsettled. Sterling closed fractionally lower, and the central and eastern European exchanges which have been approaching worthlessness, were easier. Belgian, French and Italian currencies were likewise quoted in dollars on a slightly less favorable basis.

Despite the collapse in marks to the lowest level in history at the beginning of the week, the fluctuations in the exchange market generally were within a fairly narrow range. Highly sensitive to outside factors, the exchanges will perhaps be more directly affected by the events that take place at Washington than any of the other financial markets. If out of the conference should come agreements which will reduce the expenditures of European countries for things martial, the exchanges should reflect the tonic which will make the balancing of budgets more feasible.

The approach of the holiday to-day was reflected in the stock market in a slight contraction in activity which expanded markedly on Wednesday and also in a culmination of profit taking orders in the last hour. There was a disposition on the part of professional speculators to even accounts.

Although the selling toward the close effaced the larger share of the gains earlier in the day, the market tone was firm and steady. Many individual stocks made new high marks for the year before the reaction.

In the bond market there was further evidence that the wild rally of last week had been checked, yet the underlying strong position of investment issues was still apparent. Dealings, however, were on a reduced scale.

At the commodity exchanges prices tended lower. In the absence of constructive news wheat quotations, which have recently been conspicuously firm, reacted 1¾ cents a bushel. Cotton, after losing 1 cent a pound on Wednesday, was quoted 33 to 59 points, or hundredths of a cent, lower. The ginning figures, which indicate that the crop may reach 7,500,000 bales, instead of 1,000,000 less, as predicted, caused the reaction.

Further improvement in the basic credit position was revealed by the current weekly Federal Reserve Bank statements.

Money and Credit

Call money rates developed an easier tendency on the floor of the Stock Exchange, in contrast to the tendency on the preceding day, when the rate closed at 6 per cent. The renewal rate was 5½ per cent, but by the close the rate had dropped to 5 per cent.

Four to six months	5¼@5½	8@8½

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $743,700,000; balances, $65,200,000.

Silver—London, 39d; New York, domestic bar, 99¼c; foreign, 68; Mexican dollars, 52¾c.

The Dollar in Foreign Exchange

Foreign exchange rates lacked a definite trend in yesterday's quiet trading, and movements were believed to reflect transactions connected with future German reparations payments.

German marks sagged to .36 of a cent against .40½ yesterday on absence of support from buyers who had previously sold for a decline. Swiss francs were in sharp demand for a time and got back to the 19-cent level, but closed slightly lower. Norwegian crowns were also strong, and other Scandinavian currencies were firm, Danish crowns recovering sharply.

Sterling lost an eighth of a cent at $3.94⅝ for cables, and French and Belgian francs ruled easier. Rumanian leu weakened again.

Changes in other parts of the list were small, South American rates turning slightly firmer.
