Issued Every Week  
Eighteenth Year

SEATTLE AND SPOKANE, WASHINGTON, APRIL 24, 1902

Subscription One Dollar a Year  
Worth Two Gold Dollars

## ***BUCKING FATE***

There never was a better time to convert an old "hollow-bowl" separator—and it makes little difference if it be a new one—into scrap and replace it with a De Laval machine.

That's what every big and growing creameryman has done and is now doing the moment he happens to acquire a plant containing anything else than an "Alpha" machine.

The man is simply bucking fate—swimming against the tide—who tries to get along without a De Laval machine. He may live through it for a time longer, but why continue under such a handicap.

It isn't a question of cost—a new De Laval machine will pay for itself twice over this very year, beyond the best that can be accomplished with any other separator now in use.

A De Laval catalogue may be had for the asking.
