Farm Products' Buying Power Is Unchanged

Price Increases in April Offset by Corresponding Rise in Other Commodities

WASHINGTON, May 27.—The purchasing power of farm crops for April was unchanged, as compared with March, while the prices of crops and livestock at the farm improved slightly over March 15 to April 15, the Department of Agriculture announced to-day. The unchanged condition was attributed to a corresponding increase in the wholesale price of all commodities, excluding farm products and food.

The index number representing the farm price of crops from March 15 to April 15 was 115, as compared with 110 for the preceding month and with a low of 97 in December. The farm price of livestock was 115, as compared with 113 for the preceding month, and with a low of 91 in December. The index number for crops and livestock combined was 115, as compared with 114 the preceding month, and with a low of 94 in December. The purchasing power of these products, as related to the wholesale price of all commodities, excluding farm products and food, was 69 on April 15, as compared with 67 on March 15, and was the highest point since the beginning of 1921.

Stock Prices Again Rise in Uneven Trade

Activity Mainly in a Limited Number of Stocks Bearing Stamp of Approval of Professional Traders

Maintenance of the advancing trend in the stock market yesterday disclosed little divergence in motives from the forward movement during the preceding full trading session. Activity was again noted in a limited number of stocks in which speculation for the rise was for the moment emphasized. Other issues were strong, but the degree of their appreciation was less important and they lacked the buoyancy of stocks bearing the stamp of the professional traders' approval. Interest, as measured by the price averages, was pretty well distributed between railroad and industrial shares.

Decision of the bankers' conference at Paris that Germany must comply with the terms of the reparation ultimatum expiring May 31 before a loan flotation would be feasible drew attention to the foreign exchanges. The German leaders have already testified to the impossibility of accepting these terms, as being not economically feasible and as representing an encroachment on national authority. International bankers here have felt that there was a measure of evasion in the assumption of this position by Germany and, with such information as is to hand on this side, have been inclined to regard the terms of the ultimatum as sound. The Paris meeting has now apparently indorsed this viewpoint and it is believed that its action may have an important influence in Germany. Acquiescence in the demand of the conference might very well mean assurance of a loan which will be sufficient to restore Germany at least to a more balanced state than at present exists.

The European exchanges as a group revealed seemingly no response to the news, the market continuing narrow and fluctuations unimportant. It was, perhaps, significant that an advance in mahks was conspicuous, not because it extended far, but because it stood as the greatest proportionate change in the list of quotations.

Cotton prices moved up strongly, holding gains of from 5 to 19 points in the face of realizing sales as trading progressed. The advance was based on expectations that the impending government report would indicate deterioration in the crop prospects. Trading in wheat was largely concerned with a further narrowing of the premium of the May option over the new crop months. The latter were firm, finishing practically unchanged while the May contract sold off 2 cents.

The Dollar in Foreign Exchange

Changes were small in quiet trading in foreign exchange yesterday, rates on Europe moving to slightly higher levels. Cable rates on London closed the week at $4.45, a sixteenth of a cent below the previous week's closing.

If you calculate the cost of the dollar in terms of foreign money or currency exchange value—that is, if you were buying a dollar with pounds, marks or francs—its value yesterday, compared with last week and the corresponding date a year ago, follows:

	Yesterday.	Week ago.	Year ago.
In English	$1.09	$1.09	$1.25
In French	2.10	2.13	2.30
In Dutch	1.03	1.04	1.15
In Swiss	1.01	1.00	1.09
In Italian	2.65	3.68	3.64
In Swedish	1.02	1.02	1.15
In Spanish	1.23	1.22	1.46
