Stock Prices Recover Part Of Early Drop

Close, However, Shows an Irregular Tendency, With Some Shares Scoring Good Gains for Season

Ability of traders to move stock prices without regard to developments in the railroad and coal strikes was noted yesterday, but without decisive results. The coincidence of overnight news that efforts toward settlement were proving futile and an early break in the quotations of speculative securities gave the superficial appearance of indicating that the market had abandoned its attitude of diffidence toward these labor difficulties. The subsequent petering out of this decline and the return to the advance of several of the specialties without alteration in the strike position challenged the correctness of this interpretation and stamped the break as no more than a normal setback arising from technical conditions.

Modification of early tendencies left the market confused and drifting, but before the close speculation for the rise was again the dominant force. This was reflected in a general recovery of at least part of the initial losses and in net advances of a point or more in a number of representative stocks. Declines exceeded gains at the finish, but were usually of smaller extent. Industrial shares suffered more severely than did railroad stocks, the combined average for these groups, embracing fifty stocks, going off from 88.12 to 85.88. Recently advanced favorites experienced the full force of the morning's reaction but were among the first to turn upward again. A few stocks stood out, either for strength or weakness, from the mixed movements of the day. Pennsylvania, touching a new high for the year, was in demand throughout, while Pierce-Arrow, in contrast, was subjected to persistent selling.

It was significant perhaps of the shifting character of market factors that the news of the filing of a voluntary petition in bankruptcy by Allan A. Ryan & Co., made public before the close, was without great influence. This action, involving a broker who two years ago was an outstanding factor, furnished traders with an unusually savory topic of conversation, but no more than that.

Investment securities displayed a much more settled tone than did stocks, strength being evident in several divisions and notably in Liberty bonds, three of which touched new peaks. Easy money is the stimulus to demand in this department of the securities market, and bankers count upon it to hold so long as the current strikes restrain the demands of trade and industry for accommodations. Bond prices now are more influenced by the recent lowering of charges on time loans and of the commercial paper rate than by the call loan rate, which yesterday held firm at 4 per cent.

The foreign exchanges were dull and early appreciation in response to the reported acceptance by Germany of Allied financial supervision was dissipated before the close. The financial district, however, regards recent events as bringing closer to a decision than previously the political and economic complexities of the European situation.

Prices of wheat and cotton went lower. Quotations on the former commodity ran the entire gamut of fluctuations, opening strong on the unfavorable strike outlook and giving ground before selling ascribed in the main to a single house. Conflicting influences were operative in the cotton market, but the slightness of trade demand and the strike situation finally overbalanced weather and crop news conducive of an advance. Final prices were 39 to 46 points net lower.

Money and Credit

Call money did not vary yesterday from the 4 per cent level established at the opening. The market was quiet, the usual Friday competition on the part of lenders to put out funds over the week end being lacking. Time money was in only moderate request and rates were firm on the newly established basis.

Four to six months..	4¼@4½	6@6½

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $851,100,000; balances, $65,900,000.

Silver—London, 35¼d; New York, domestic bar, 99⅝c; foreign, 69⅝c; Mexican dollars, 53¼c.

The Dollar in Foreign Exchange

Movements in the foreign exchange market yesterday were slight in quiet trading, early gains on the news that Germany had agreed to Allied supervision of her financing being lost as the moderate buying subsided. Net results involved fractional advances in the principal currencies, sterling holding only ⅛ cent of its rise, francs 3 points, lire 6½ points and marks ¼ point. Other European exchanges fluctuated narrowly and without definite trend. Far Eastern and South American exchanges were steady.
