Why Southern Mortgage Bonds Pay 1% More

First mortgage bonds, secured by income-producing real estate in leading Southern cities, pay on an average 1% more than similar bonds issued against properties in Northern and Eastern cities. The same safeguards, the same kind of property (apartment structures, hotels, warehouses, etc.), the same careful methods apply to Southern bonds as to those issued elsewhere.

The premium of 1% on Southern first mortgage bonds measures the South's bid for capital to develop the vast resources of the region. Southern investments yield a higher return because the South can make profitable use of funds. Southern investments are fundamentally safe because increasing property values are constantly increasing the margin of security.

Miller First Mortgage Bonds, paying 7% or 7½%, conform to the rigid safety requirements of high-grade real estate bonds. They possess an unbroken safety record.

Mail the coupon for booklet, "The South Today," which describes the remarkable expansion of the South's business and industry.
