Cotton Drops as Crop News Fails To Bring Buying

Market Breaks Sharply at Close Under Selling; Final Prices Are 20 to 52 Points Net Lower

The feature in the cotton market yesterday was the continued failure of bullish crop advices to materially stimulate demand. They did cause a very slight advance during the earlier trading, but the market very soon eased off and broke severely late in the afternoon under Southern selling and the liquidation of discouraged long accounts. December contracts broke from 22.52c to 22.08c and closed at that level, with the general market closing weak at a net decline of 20 to 52 points.

After opening steady at a decline of 2 points on July, but generally 3 to 7 points lower, the market sold about 6 to 11 points above the previous closing figures on reports of rapid deterioration in Southwestern crop prospects. A private report making the condition only 57, and the indicated crop 10,600,000 bales failed to bring in much fresh buying, however. Realizing or liquidation became more active following another private report placing the condition at 61.8c and the indicated crop at 11,472,000. There were slight rallies during the early afternoon on the failure of the official Western belt forecast to indicate any rain except for showers in northeast Arkansas and the detailed weather reports, showing very high temperatures in Texas. They soon ran into renewed liquidation, however, and the market reached the lowest levels of the day in the late trading under heavy New Orleans, local and Wall Street selling.

While there was disappointment that prospects for showers did not develop more definitely in the Southwest, the forecast for lower temperatures was regarded as a favorable feature, which may have had some effect on the decline. On the whole, however, the break was attributed to disappointment over the failure of bullish crop reports to make more buying power, and a fear that unsettled financial or economic conditions in Europe would restrict export demand. Southern spot markets, as officially reported, were about 40 to 50 points lower, but a larger business was reported.

The New York market for spot cotton was 45 points lower at 22.25c for middling, with no sales reported.

Liverpool Cables—Spot dull, 18 points lower at 12.60d for middling; sales, 4,000 bales, including 2,000 American. Imports, 3,000 bales, including 2,000 American. Future opened quiet and unchanged to 3 points lower, and closed quiet, net unchanged to 7 points higher. October closed 12.75d; January, 12.44d; March, 12.36d; May, 12.34d; July, 12.12d. Bids cabled to Liverpool at 11.30 a. m.—October, 22.26d; December, 22.29d; January, 22.15d; March, 22.21d.

Cottonseed Oil

The market for cottonseed oil was comparatively steady around the opening, but during the day developed pronounced weakness and closed at the low of the session with net losses of 10 to 25 points. Recent buyers sold quite freely, especially in the old crop positions, and the market felt the influence of the decline in cotton and lard. Total sales for the day were 16,000 barrels. The range of prices: Prev.

Sugar and Coffee

Raw Sugar Futures—Price changes were irregular throughout the day. After opening 2 points higher to a 4 point decline, heavy selling by a broker often representing Western interests, was met with covering of shorts scattered new demand and late in the day, buying by sugar trade interests, thought to have been against actual sugar. The market closed 1 to 12 points net higher on estimated sales of 80,000 tons.

Prices of Wheat Again Fluctuate In Small Range

Final Figures Unchanged to 5-8 Cent Net Higher; Operations Not Heavy on Either Side; Corn Lower

CHICAGO, Aug. 25.—Wheat prices fluctuated within narrow limits today, the market being subject to no heavy operations on either side. Final figures were: Unchanged to ⅝c higher for wheat, with September, $1.00⅝@$1.01⅞, and December, $1.03¼@$1.03⅝. Corn was off ⅝@½c. Oats showed a gain of ⅛@⅜c, and provisions ranged from unchanged to 15c lower.

Weakness at Liverpool and the German financial situation caused values to break at the start. The market showed considerable resistance to selling pressure, however, and commission houses bought on the declines. The resultant advance brought out increased offerings and thereafter neither side made any decided effort to dominate the trading. Export demand was reported slow, with slight prospect of improvement. Hedging pressure was lighter than usual.

Corn was unsettled with wheat and failed to maintain some early advances. Rather sensational crop reports were received from parts of Kansas, Nebraska and South Dakota to the effect that in some sections there would not be sufficient grain harvested for local reuirements. Temperatures were lower over the corn belt, with scattered rains. Oats were dull but firmer. Provisions were lower under scattered selling, which offset an advance in Liverpool and strength in the live hogs market.

Day's Dealings in Bonds

The Market

A decline in prices of foreign government bonds, notably of French issues, was the outstanding feature of trading in investment securities yesterday. The movement was largely in sympathy with the further depreciation of foreign exchanges and reflected discouragement over the outlook abroad. The semi-speculative rail issues were quieter and generally lower. Otherwise the list disclosed few concessions. Liberty bonds steadied somewhat on narrow dealings. Bankers report that while the advance has lost momentum the market continues essentially a sellers' market and that no large blocks are capable of dislodgment.
