Reactionary Movement in Stock Prices

Announcement of Ford's Decision to Close Down Plants a Factor in the Downward Trend

Henry Ford's announced decision to close down his plants in the middle of next month, owing to the exhaustion of coal reserves, stripped of the particular and sensational interest attaching to the man, was typical of the unsettling forces which operated to impair the full breadth of underlying optimism in yesterday's stock market and to cause a price reaction of some consequence. The bituminous coal strike has been settled, the shopmen's strike is petering out with victory resting with the roads, and the crop and money outlooks are indisputably excellent. All these things contribute to the return of prosperity, but they are not in themselves sufficient to restore good times and occasionally Wall Street registers recognition of that fact.

Yesterday was such an occasion. Ford's action was unsupported by other announcements of similar import, but it called attention to the fact that a nearly five months' interruption of normal coal production and movement cannot be without restricting effect upon industry. Coupled with this was the drifting situation in the railroad strike and the continuing deadlock in the anthracite negotiations, both bringing more imminent the threat of government seizure. The foreign news also was not encouraging. The speculative community has for some time neglected this, but yesterday its attention was forcibly called to the seriousness of the situation by a sharp break in French government and municipal securities. In the light of these circumstances and of existing technical conditions, it was, perhaps, not unnatural that moderate selling of stocks was the order of the day. Pool operations for the rise were unable to make much headway against this trend beyond pushing to higher levels a few tobacco and public utility stocks.

The reaction in stock prices was paralleled in the bond market. Aside from the decline in French bonds, extending to as much as 3 points, the semi-speculative rails developed weakness and the list generally was unsettled. Liberty bonds comprised the steadiest division. Money was not an important consideration in either department, renewing at 3¾ and firming to 4 per cent at the close.

There was some attempt to read into the slight further recovery of francs, lire and marks a more hopeful view of the European prospect, but the moderate gains were no more than would properly follow the sharp decline recently experienced. International bankers placed little confidence in results from the suggestion that Germany submit to receivership to be administered by American and other impartial interests and examination of the news likewise failed to disclose much promise of an effective decision at the impending meeting of the Reparation Commission. An increase of 10,000,000,000 marks in German note circulation offset any constructive interpretation attaching to the marking up of the bank rate to 7 per cent. Sterling and the late neutral exchanges gave fractional ground as the other currencies recovered.

Cotton prices netted gains of 28 to 35 points on weather news, trading being fairly confident despite proximity of the government report. Wheat variously advanced, reacted and rose on short covering to close ⅛ to 1⅝ cents higher.

Money and Credit

Call money opened and renewed at 3¾ per cent yesterday on the Stock Exchange and held at that level until the closing hour, when the rate was marked up to 4 per cent. Conditions as to supply and demand did not vary much from those in force last week. Time funds were in only moderate request and rates were unchanged. Most of the business done was represented by renewals.

	Yesterday.	Year ago.

On mixed collateral	3¾	7
Sixty days	4 @4¼	8@8½
Ninety days	4 @4¼	8@8½
Four months	4¼ @4½	8@8½
Four to six months	4¼ @4½	8@8½

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $307,300,000; balances, $50,100,000.

Silver—London, 31⅛d; New York, domestic bar, 99⅝c; foreign, 69⅝c; Mexican dollars, 53¼c.

The Dollar in Foreign Exchange

Irregularity again marked dealings in foreign exchange here yesterday, sterling being in supply, while francs and lire worked higher on increased demand. German marks recovered on the announcement of an increase in the Reichsbank discount rate from 6 to 7 per cent. Swedish crowns were in supply, however, and dropped back.
