Upward Trend Is Resumed in Stock Market

Chief Interest Appears Centered on Industrial Securities; Public Utility Shares Continue Strong

Stocks returned with vigor to the advance yesterday as the divers situations which have spasmodically worried traders took on a more encouraging aspect. The upward swing was more general and on a grander scale than for several sessions and was unquestionably aided by the moderate shake-down of prices on Monday. Interest of the professional element was chiefly in the industrial shares, but the average appreciation of railroad stocks was only slightly less. The price level of the industrial group went to a new peak for the year, carrying the average for fifty representative stocks also to its 1922 top.

Gains of a point or more were scattered without discrimination over virtually the entire list. There was some evidence of pool operations, but the movement was broader than could be attributed to isolated activities of professional operators. In fact, the emphasis was on the dividend paying stocks rather than on the more speculative shares. Public utility issues continued to forge ahead, with several new highs for the year in this group, and special buoyance also appeared in the equipment stocks.

Restoration of confidence was associated primarily with three main developments in the news. Most importance was attached to the determination of President Harding's intentions regarding the coal and railroad situations, involving a limitation of his request for emergency powers to provision of means to cope with all eventualities, without purpose for their immediate exercise. The outlook for settlement of the anthracite coal strike was also pictured more hopefully and there was some promise of helpful action affecting the European financial tangle. The latter phase of the outlook was stressed by the recovery of French bonds and improvement in the foreign exchanges.

An advance in marks that carried them to nine hundredths of a cent, almost twice their minimum valuation realized last week, was the most formidable effort of the foreign exchange market to discount the results of to-day's meeting of the Reparation Commission for consideration of a moratorium and guaranties. Francs rose 13 points and lire 7½ under the play of like forces. Sterling was moderately stronger as offerings of commercial bills fell off. A majority of the other Continental currencies went lower under liquidation following their recent advance.

Cotton prices continued to climb as reports from crop regions confirmed expectations of a bullish government statement on condition. Net gains amounted to 28 to 36 points. Wheat tended lower almost throughout, speculative support being lacking, and ended the session 1⅜ to 1¾ cents off on the day.

Money and Credit

Call money again advanced yesterday afternoon to 4 per cent after opening and renewing at 3¾ per cent. As yet no restriction of the supply incident to preparations for the September 1 disbursements has made itself felt. Time money continued without change as to rate, with few loans for sixty days or longer arranged at less than 4¼ per cent. The demand for new money is limited and the bulk of business consists of renewals.

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $693,100,000; balances, $51,400,000.

Silver—London, 31⅛d; New York, domestic bar, 99⅝c; foreign, 69½c; Mexican dollars, 53⅛c.

The Dollar in Foreign Exchange

Sterling continued to runle easy in yesterday's foreign exchange trading on the appearance of an inincreased supply of commercial bills. Sontinentals held steady, however. Marks continued their recovery, but Scandinavian crowns sagged. Portuguese exchange had a better tone.
