The Water Cure.

BRATTLEBORO, Vt. Sept. 27.

In relation to the Water Cure. I of course have been here too short a time to be able to give you a very lucid account of the system. But whatever may be its theory, *facts* are not to be combatted. During the short time I have been here, I have witnessed some most extraordinary cures of cure. It seems to be almost infallible cure for all cases but consumption; it will avert that if commenced in time, but if it has once settled firmly on the lungs. I believe that no benefit can be derived from the Water Cure. One of the most celebrated Physicians in England visited Graefenburg, where Priesnitz, the founder of the system, is established; here he remained some ten or twelve months to examine personally into the truth of the apparently most extraordinary accounts of the miraculous cures at Graefenburg. He noted every case, followed it through all its symptoms, and finally came away a firm believer in the system, and has published a most valuable work on the subject. It is a work well worth your perusal. Dr. Johnson is the Physician I allude.

A lady was brought here two months since from Lowell, Mass. on a feather bed. She was given up by her Physicians, and so low that they were eight days bringing her on; her limbs were utterly useless, so much so that she had not used them for twelve months. She now walks over these mountains as nimbly as any girl, and you would hardly suppose that she had ever been sick.

The water seems to possess the property of ejecting from the system every thing impure and not necessary to sustain life. Men are here whose systems are perfectly saturated with mercury, and when they come out of the sheets in the morning, after sweating an hour or so, they are stained with mercury—in fact, it brings out every impurity.

The course we have to go through is, first—sweating in a wet sheet in the morning; from the wet sheet we are plunged into a cold bath and rubbed down for about fifteen minutes, and then started off to walk some three or four miles before breakfast—at 11 or 12 o'clock, a douche bath, or stream of water falling at a distance of from 15 to 20 feet on all parts of the body—rubbed down and walk again—at 5 o'clock a hip bath, and at night a foot bath. During the intervals we walk and drink water to the amount of 30 glasses per day.

LARGE ROBBERY ON BOARD THE STEAMER PENOBSCOT.—The clerk's office of the steamer Penobscot was broken open on Thursday night, while the boat was on her passage from Bangor, and from 1000 to $1500, and a gold watch belonging to the clerk, stolen from the desk. From $50 to $100 of the money was in specie. The robbery was discovered just before the boat reached the wharf in Boston, and she was immediately brought to, in the stream, and officers were sent for, who searched all the male passengers, but without finding any of the stolen property. [Boston Traveller.

ACCIDENT.—An aged man, from Montgomery county, while crossing Broadway, opposite Stanwix Hall, Wednesday evening, was struck by the pole of a carriage and knocked senseless. It was at first supposed that he was killed, but he came to, and though much injured, was enabled to leave the city in the evening train of cars for home. [Alb. Ev. Jour.

KIDNAPPING.—Wm. R. Boswell was yesterday arrested on a charge of attempting to sell a free colored man named Hillard Evans as a slave, to a gentleman of this city. [N. O. Pic. 26th.

☞ The Boston Bee says a married man and the father of three or four children, residing in Cambridgeport, and who carries on the business of *match-making*, incontinently eloped with a young girl in his employ, on Thursday morning last.

☞ Gen. R. B. McAFEE, of Kentucky has been elected honorary member of the Royal Antiquarian Society of Denmark, at Copenhagen.

MEMORANDA.

The packet ship Patrick Henry, Capt Delano, will sail for Liverpool to day.

U. S. brig Lawrence was reported off the Balize on the 20th ult. but the wind blowing a gale stood off in the evening, without having communication with the shore.

NOTICE TO MARINERS.—*Swedish and Norwegian Consulate General, New-York, Oct. 4, 1845.*—The Swedish Royal Marine Department has transmitted to the Consul General in the United States information that from and after the 15th August, 1845, a Lentile Beacon Light of the third order, with fixed light (a fea fixe), will be substituted for the former Coal Fire Beacon at Gronskaer, situated outside the Sandhamn entrance to Stockholm harbor. The new light can be seen from a ship's deck at a distance of our geographical miles. The whiteness of its light makes it easily distinguishable from the more yellowish light of Korso Beacon, situate ¼ of a mile within Gronskaer.

DISASTERS.

THE SHIP ASHORE.—The vessel seen ashore 27th ult. on Hatteras Shoal, by Capt. Manchester, at this port and the Claiborne, at Charleston, proves to be the packet ship Catherine, Crane, hence for Charleston. She was gotten off after remaining 24 hours on the Shoal, without any material damage save the loss of part of her cargo, which they were compelled to throw overboard. She arrived safely at Charleston on the 1st inst.

WRECKS AT KEY WEST.—The Br. ship Atlanta, before reported ashore, is condemned and will be sold. The sugar has been sold by the U. S. Marshal, having been found in a damaged state. The case of the A and that of the Eronia, has been tried but the court has not yet come to a decision.

Brig Peconic, Parks, hence for Pensacola, with a quantity of powder on board, put into Key West on the 20th ult. having been threatened by severe thunder and lightning. Capt. P. was obliged to throw overboard the greater part of the powder in order to escape an explosion. He has noted a protest and requested consignees here to sign an average bond.

Schr Van Buren, bound to Pensacola, was compelled to put in to Key West, in consequence of the lightning, having also a large quantity of powder on board. She sailed again on the 21st for her destination.
