Stock Prices Lower After Firm Opening

Steel Common Reaches New High Before Reaction; Railroad Securities Hold Steady

Speculation in industrial shares was confused and irregular yesterday. After firmness at the opening, recessions started, and after vacillating, final quotations were distinctly lower on the average. Railroad issues were steady, as traders placed a favorable interpretation on the statistics revealing close to the heaviest car loadings ever recorded.

The volume of trading at the Stock Exchange was slightly larger yesterday, but it was largely under the sway of professional speculators. Steel common returned to its traditional role of leadership and reached a new high mark for the present recovery before reacting.

Internal market considerations were the primary influence. Foreign developments were scarcely a factor, for the Continental European exchanges, even German marks, rallied from their excessively depressed level of the previous day. There was no special significance to the rally, which represented short covering and trade buying by those convinced that prevailing quotations offered bargains. The commodity markets, which are sensitive to foreign news, were fairly steady to firm. Wheat prices at the close showed ¾ of a cent net decline to ⅛ of a cent advance. Cotton quotations, on the other hand, continued their upward sweep, which gathered fresh momentum on Wednesday from the publication of ginning reports which confirmed expectations of a short crop.

Call funds were available at the Stock Exchange at 5½ per cent all through the day. The expected continuation of credit expansion for growing commercial and agricultural requirements was revealed in the current weekly statements of condition of the Federal Reserve system. Changes in reserve ratios were slight.

Money and Credit

Call money was put out on the Stock Exchange at the opening yesterday at 5½ per cent, and held at that rate throughout the trading. Bankers and brokers see little prospect for a change in the conditions affecting the market, at least until after the first of the year. Time money was in only moderate demand, and most loans were arranged on a 5 per cent basis. Little interest was shown in the shorter period loans.

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $816,000,000; balances, $78,000,000.

Silver—London, 83 7-16d; New York, domestic, bar, 99¼c; foreign, 66⅝c; Mexican dollars, 50½c.

The Dollar in Foreign Exchange

While francs registered a substantial recovery in yesterday's foreign exchange trading and other Continentals ruled generally firm, sterling dropped back seven-eighths of a cent after an early display of strength. Cable rates on London fell to $4.45⅝, while French francs rallied to 6.52 cents. Lire continued strong.
