Stock Prices Lower Despite A Late Rally

Movement of the Market Interpreted as Representing Further Liquidation of the Long Account

Stock prices steadied or advanced in the last hour of trading yesterday after call money had been marked down to 4 per cent, compared with an opening rate of 5 per cent, but the achievements of this unevenly distributed rallying power were not sufficient to offset the losses recorded during the earlier phases of the day's market. Liquidation was again the dominant motive and was particularly forceful at the outset. After initial activity, transactions tapered off, with prices drifting lower rather than swinging downward. The firmness acquired before the finish limited the decline in the average price level to less than half a point in the industrial stocks and to only slightly more than that in the railroad division.

The market's movement was interpreted as representing a further liquidation of the long account to modify internal conditions. Many had counted upon a resumption of the advance following the recent period of irregular fluctuatons, and the decline has come apparently because the efforts to start prices upward from the low point previously reached in the reaction were ineffective. There were only scattering instances of strength in evidence yesterday, these appearing mostly among the industrial stocks, with preference being given sugar company shares. Selling pressure was directed most successfully against stocks of the carriers and many of the standard rails went into new low ground on the reaction. Their loss was despite a favorable report on car loadings.

The situation in speculative securities was reflected in the bond market specifically in the weakness of rail issues and generally in a disturbance of the underlying tone. Liberty bonds were fractionally lower on the day.

Foreign exchange quotations flashed strong at the start and then turned downward. Momentarily, sterling cables were quoted above $4.50, but at the finish they were down to $4.49½, off ¼ cent on the session. Francs lost 17½ hundreths of a cent, while marks and lire were steady.

Cotton prices stiffened on renewed mill buying and closed 18 to 38 points net higher. Wheat was weak almost throughout and declined ¼ to 1 cent.

Money and Credit

Call money was offered on a more liberal scale yesterday and the rate, after opening and renewing at 5 per cent, shaded off first to 4½ per cent and in the last hour to 4 per cent. No government withdrawal is scheduled for to-day. Time funds held at the previously established quotation of 5 per cent for all maturities. Not much business was done.

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $650,000,000; balances, $65,000,000.

Silver—London, 32⅛d; New York, domestic bar, 99¼c; foreign, 64½c; Mexican dollars, 49¼c.

The Dollar in Foreign Exchange

Despite the fact that foreign exchange rates on Europe again reacted yesterday, there appeared to be a firmer tone and not all of Wednesday's recoveries were lost. Cable rates on London fell ¼ of a cent to $4.49½.
