SWISS NOSTALGIA.

BY MRS. J. W. MERCUR.

"'T' is pining to revisit their native land, peculiar to the Swiss, is termed Nostalgia, which signifies a desire to return. They have been known even to die when this cannot be attained."

They pine to feel the cooling breeze
Sweep from the sunlit Alps along;
They pine to see thy lakes and trees,
And Jura's mountains firm and strong.

And wheresoe'er they wandering bend
Their gaze upon another clime,
Still, still, with outstretched arms, they send
On high a fervent prayer for thine.

With yearning hearts thy children turn
To thee, from every clime of earth;
Their beacon light of life doth burn
But in the land which gave them birth.

They pale beneath the brightest skies
Which circle o'er our earthly sphere,
Regardless that rich beauty lies
Around them scattered far and near.

In dreams they see their native hills
And towering glaciers boldly rise;
They hear the peasant's voice, which fills
With joyful shouts the bending skies.

For them the chamois swiftly bounds,
With graceful leap, from rock to rock;
The torrent in its course resounds,
And wakes them with its onward shock.

Wakes them to mourn in other climes
Their absence from their cherished home,
Where every ray of sunlight shines
More pure than other lands have known.

Wakes them to mingle in the throng
Of careless strangers, far away
From those who, with affection strong,
Illumed with joy life's Summer's day.

And thus they sink, they pass, they fade,
Like Summer leaves, from earth away
Too deeply on their hearts was laid
The burden of love's purest ray.

Hannah's Rest, Santa Cruz.

CITY ITEMS.

THURSDAY, Jan. 28.

FREE EVENING SCHOOLS.—The Board of Education propose to establish a system of Evening Free Schools for apprentices and others whose occupations leave them at leisure in the evening only. They have accordingly framed a bill to be submitted to the Legislature authorizing the Supervisors to raise by tax such an amount of money as may be necessary for the purpose, not exceeding six thousand dollars a year. We trust that the measure will be adopted. Economical considerations alone, were there no higher reasons, ought to ensure it. There can be no doubt that a vast amount of crime and consequent expense might be saved to the city by employing in useful education the evenings of thousands of youth now devoted to idleness and mischief. The matter is one however in which saving of expense ought not to be the most powerful argument. In the following sentence the Committee of the Board put it on the strongest and most humane ground:

Let it not be said that our neglect is forming a large class of our community for crime and misery, but let us embrace every opportunity to recommend, and if possible be the means of establishing a measure so necessary, as well as benevolent in its intentions. No one can doubt but it is more prudent and more beneficent to *prevent* crime than to punish it—to prevent poverty than to support it.

☞ We understand that fighters are slongside the Garrick. The probability is that after discharging part of her cargo, if the weather continues moderate, she will be got off without much damage. The passengers were all taken out of the ship, 300 in number, by the steamboats Hercules and Duncan C. Pell and brought up to the city early this morning. We learn from a passenger that twelve died on the passage, and one this morning on board the steamboat—a young woman about seventeen years of age.

☞ Nearly one hundred pauper immigrants were landed about 9 o'clock this morning from the packet ship Garrick, now ashore at Squan Beach, from Liverpool. They stated that they had eaten nothing for forty-eight hours, and had not the smallest means of procuring even a loaf of bread. They were conveyed in a body to the station-house, food provided for them, and ways and means put in process of adoption for their future disposition.

☞ About 10 o'clock yesterday a woman, bearing a child about 15 months old in her arms, entered the house of Mrs. Strang, 479 Cherry-st, and requested Mrs. S. to take care of the young one ten minutes, which being assented to the unknown woman departed, and left Mrs. S. to add one to her already full stock of little responsibilities. Any old bachelor or childless married couple, can have a fine heir and representative by applying to Capt. Wood, at the Seventh Ward Station House.

FIRE.—A fire broke out this morning about five o'clock in the rear of Nos. 33, 34 and 35 Mulberry-street, entirely consuming a stable and burning three horses to death, beside injuring considerably the front buildings. Six or seven horses were saved by the exertions of Captain Gardner and his men.

☞ Roxanna Trotter was arraigned on charge of stealing $370 in gold from Mary Parker.....Elizabeth Bush appropriated $10 belonging to Margaret Greenburg to her own use, which, not meeting the approbation of the first holder, Elizabeth was held in durance.....Geo. H. Fielding, being "three shillings short of any change," undertook to replenish his pockets by robbing his own mother. The worthy dame not deeming it consistent with the rule of "training up a child in the way he should go" to wink at the transaction, had the unfilial son arraigned before the tribune of the Halls of Justice.....Samuel DeWitt and John Thompson were found secreted in the store of J. B. Scott, No. 33 Nassau-st, this morning.

☞ The plan of establishing a Branch Post-Office in the upper part of the City is in agitation and we trust will not be allowed to rest until it is put into execution. A meeting was held at the Wallace House on Tuesday evening, at which the reasons for such an office were conclusively stated by Assistant Ald. Webb of the Sixteenth Ward. When insignificant country villages three or four miles apart can each have its own Post Office we cannot see why the vast and widely extended population of New-York should all be confined to a single office. Other meetings are to be held in different Wards; let us have the work done in earnest.

BROOKLYN AFFAIRS.

☞ A rich discursive lecture on the subject of the War in Mexico, was delivered a few evenings since at Brooklyn by Rev. John N. Maffit, which created quite a sensation in that usually quiet city. An entirely original view was taken by the lecturer of our relations with that country, and an interest thrown about it of peculiar intensity. Why cannot the Professor favor the citizens of Gotham with its repetition? The Tabernacle itself might be filled with attentive hearers.

THE LIBRARY OF AMERICAN BIOGRAPHY, conducted by JARED SPARKS: Second Series: Vol. XII. Boston: Little & Brown—1847: pp. 408.

The present volume of Mr. Sparks's excellent series, contains a Life of Com. Preble, by LORENZO SABINE, Esq. of Eastport, Me. and one of William Penn, by Rev. G. E. ELLIS, of Charlestown, Mass. Both of these are worth reading. The life of Penn especially, can scarcely be read too often. We commend it to politicians that make nothing of robbing a nation of its territory and slaughtering its women and children.

LOSS OF THE CREOLE.—The Havana papers contain fuller details of the wreck of the American ship Creole, Capt. Cayol. She was from Bordeaux, bound to this port. She was wrecked in the night of the 19th of December on the reefs of the *Real de los Catalanos*, [four leagues from the entrance of the port of Nuevitas and eight from Guincho,] and went to pieces the following day.

There were 147 persons on board the Creole, including the crew, of whom 47, of different ages and sexes, perished. Capt. Cayol was among the victims. The survivors repaired to Neuvitas. The adjacent coast presented, according to the *Gazeta* of that city, a horrible spectacle. It was strewn with the remains of those who perished, with the fragments of the wreck, and the various effects of the unfortunate passengers.

According to the *Gazeta*, those who survived suffered from the barbarity of five of the crew, who plundered the living and the dead of every description of property—mutilating corpses to obtain rings from their fingers. These miscreants are said to have been arrested, so that their atrocities will be punished. Efforts were made to extend succor to the passengers of the Creole by boats from Nuevitas, but the violence of the wind made every exertion futile.

Another paper mentions that among the victims of this catastrophe was one entire family, consisting of father, mother, three grown daughters, the oldest aged 22 years, and several little children. The French steamer of war *Le Tonnerre* proceeded at once from Havana to Neuvitas to render aid to the sufferers, whom we presume to be principally French emigrants.

[N. O. Picayune, Jan. 20.

☞ THE LAKE is covered with ice again nearly as far as the eye can reach, and our fishermen are preparing for an attack upon the Lake trout that are only caught to any extent through the ice. No finer fish than these grace any market in the world. They are large and deliciously sweet when baked or boiled. Nothing compares with them when properly served.

[Buff. Express, 25th.

Steam Engines and Engineers.

To the Editor of The Tribune:

A communication signed "Scrutator" in The Tribune of the 12th inst. warmly recommends a Board of Scientific Engineers to determine the qualifications of Steamboat Engineers, and renews the long-exploded idea of having only Mechanics who have learned a few of the many branches in manufacturing engines, to run them. As well might the Board of Underwriters and the Chamber of Commerce make it imperative upon shipowners to employ only Ship Carpenters as navigators of the ships they build.

Many of the steamboats in our harbor have cost their owners from 50,000 to $100,000 each, and is it reasonable to suppose that they would entrust this immense amount of property in the hands of unskilful and incompetent men? Are not the owners of steamboats, in the nature of things, the most capable of judging who are and who are not trustworthy, skillful, and capable, in any emergency, of protecting their property, and thereby the lives of all on board? It certainly seems so to me.

"Scrutator" refers to "an instance which occurred on board one of our finest boats on Long Island Sound, where the side pipe broke, and after the boat was brought to this City her skillful, mechanical and practical Engineer, insisted upon having a new pipe put in, which the Superintending Engineer would not allow, but ordered it patched up any how." This fine boat is no other than the Massachusetts, which has run with this "patch" in her side pipe for the last three months, and probably will for the next three years, and the "Superintending Engineer" invites the most scientific Engineer in the country to examine the "patch" at any time.

"Scrutator" says that the mechanical Engineer of the Massachusetts resigned his situation in consequence of being not being allowed a new pipe. *Not so!* He was discharged as utterly incompetent, and for want of sufficient skill to repair so trifling an injury as that sustained by the Massachusetts. If this is the kind of "mechanical" Engineers that "Scrutator" recommends being licensed, our steamers would much oftener be left at the mercy of the wind and the waves than they now are.

In conclusion allow me to say, that from long experience I am fully satisfied that the best Steamboat Engineers are those who have learned their duties on board of boats, commencing their apprenticeship as firemen, and completing their education by acquiring a thorough practical knowledge of every part of an engine in its working state—and the most important of all, obtaining also a thorough knowledge of the strength and capacity of the boilers, which a "mechanical" Engineer knows no more about than the glass-blower who makes watch crystals knows about making the main-spring of a watch; and I do not hesitate to assert, that as a body of practical Workingmen their equals in intelligence, sobriety and gentlemanly deportment, cannot be found in or out of the City.

One word more. Is "Scrutator" a Mechanic and practical Engineer? If not, it is wrong for him to handle a subject of which he has no knowledge. It is an old saying and I believe a true one, that a fool can ask more questions in an hour than a wise man can answer in a week; and I think Editors should be careful how they open their columns to a person who does not possess a particle of knowledge on the subject of which he writes. A faculty of turning a period smoothly does not necessarily imply a knowledge of mechanism, but often misleads and alarms the timid traveler unnecessarily. S.

EXTRAORDINARY CASE.—We learn that one of the workmen on the Central Railroad, between here and Montpelier, was killed last week in the following distressing manner. A rock that they were blasting not going off readily, one of the hands went on to the rock, supposing the match had gone out; but while on the rock the charge went off, producing a seam sufficiently large to take in his legs and a part of his body. The seam then partly closed up, confining him closely. After using every means in their power to extricate him with no hope of success, a consultation of physicians was called, and at his earnest solicitation a blood vessel was opened, by which an end was put to his sufferings.

[Burlington, Vt. Liberty Gaz.

The above statement is of so extraordinary a character that we felt some hesitation in crediting it; yet the source from which it comes seems to authorize full belief. It strikes us, however, that the decision and action of the physicians consulted in this case were most remarkable and reprehensible. On the same principle of reasoning, any person whose life is given over by consulting physicians, may be bled to death or otherise hastened into eternity. [Boston Trav., Tuesday.

☞ An immense iceberg recently found its way the harbor of Eastport, Me. and dashed in pieces some vessels lying at the wharves. It was supposed to have been blown from the Arctic sea by the strong wintry gales.

Miscellaneous.

TRIBUNE JOB PRINTING OFFICE,
No. 7 SPRUCE-STREET—*Three doors from Nassau-street.*

THE facilities of this establishment for JOB PRINTING are, perhaps, unsurpassed by any office in the city. The patronage of the last year has been such as to guaranty a great extension in our resources. We therefore, with confidence, issue the following Card:

TO MERCHANTS—Merchants supplied with all kinds of PRINTING at the cheapest rate, viz:

Cards,	Bills Lading,
Circulars,	Receipts,
Bill Heads,	Checks, &c.

TO LITERARY GENTLEMEN—*Original Manuscripts* printed with accuracy.

Pamphlets, Books.	Stereotype Work, and all kinds of *Letter Press Printing.*

TO LECTURERS AND MUSICIANS—*Programmes* beautifully printed.

Lecture Bills, *Mammoth Bills,*	Small Bills for Distribution, &c.

And every description of *Plain* and *Ornamental Job Work* executed with great neatness and punctuality, at the office, No. 7 Spruce-st.

The improved POWER PRESSES, for BOOKS, PAMPHLETS, &c.

All Work on the above Presses will be done at extraordinary low prices. J. A. FRAETAS,
j12 tf Tribune Job Printer.

FOR SALE—One half of a new and well arranged Iron Foundry, Engine and Machine shop, Blacksmiths' Shop and Boiler Shop, with an Engine, Lathes, Machinery, Tools, &c. and an extensive assortment of Patterns of every description, including a large catalogue of Mill-Gearing Patterns, from which many of the best flouring mills in the West have been built.

This is the largest establishment and has done the principle business in Engine and Machinery building since the first settlement of Michigan. It is located near the wharf, convenient for steamboats, and on the opposite side of the street from the proposed location of the Michigan Central Railroad depôt.

The subscriber has purchased the entire interest of the other partners, and is now desirous of selling one half to a man of a capital of from $5000 to $12,000. A practical man who has had experience in the business would be preferred. Address the subscriber at Detroit, Michigan.

j20 2wD2mW&SW GEORGE J. DORR.

STOCK OF GOODS FOR SALE, and Store To Let.—The undersigned offers for sale the stock of Dry Goods, (consisting principally of staple goods,) late the property of William L. Hall, at the store lately occupied by the firm of W. L. & W. A. Hall, No. 35 Catharine-st. (between Henry and Madison-sts.) in the city of New York, together with the privilege of the store. The location is considered one of the best in the street. The store has a large front, is in depth about 70 feet, and has been newly fitted up with two new sky-light back, and with six splendid mahogany top counters and desks of the most modern style. The stock of goods is small, but consists almost entirely of staple goods; and persons commencing business will find it for their interest to call and examine the premises and property for themselves. The goods will be sold on advantageous terms, and are to be disposed of immediately to close a trust. JOHN H. TURNER,
New-York, Jan. 14, 1847. [j18 2w*] Assignee.

FRANCIS'S MANIFOLD Letter-Writer—For Writing and Copying Letters.—By this simple process a letter and duplicates can be written at the same time. It is therefore invaluable to business men and all who desire copies of their correspondence or other documents. The manner of writing is easy, agreeable, expeditious and economical. The manufacturers invite the attention of the public to this useful article, which they are prepared to supply at wholesale and retail.

FRANCIS & LOUTREL, Manufacturers,
j25 77 Maiden-lane.

Blank Books, Paper and Stationery of every kind at low prices.

WINTER GARMENTS—The balance of our stock of winter garments, comprising Overcoats, Sack Cloaks and Business Coats, will be sold at greatly reduced prices. WM. T. JENNINGS & CO.
j21 tf 201 Broadway, American Hotel.

Books.

All qualities, prices and kinds suitable for men, women and children, at very low prices. Also, can be found at Day's India Rubber establishment, Cortland-st. 2 doors below Western Hotel. Overshoes repaired in the best manner. d12

Miscellaneous.

ASHES INSPECTION.
THE UNDERSIGNED have associated themselves under the name and firm of FREEBORN, JEWETT & CO. for the purpose of pursuing the business of inspection of Pot and Pearl Ashes, and have opened an office No. 63 and 65 Washington-st until the 1st of May next, after which time they will be found at the old established Inspection Warehouse, 48 and 49 West-st, in the city of New-York.

The manner of inspection in Europe, being less restricted and free as regards legal requirements, still it is presumed, it will not supersede the necessity of the classification of these articles according to the proper standard by persons competent to perform the same. This seems to be called for from the skill and experience necessary to arrive at the different properties of the articles, the preservation of the character of our Ashes in foreign markets, and to afford a proper regard to the convenience and facilities of dealers in these articles.

The undersigned feel assured that they are entitled to the confidence of the public on the score of a thorough knowledge of the articles they propose to inspect and classify, all the members of the firm having been practically and almost constantly, for many years past, engaged in the inspection of ashes, and in future will give their personal attention to the business. It will be our aim to preserve the standard of inspection and do justice to the manufacturer and the consumer.

The fees of inspection will be reduced from former rates, twenty per cent, and fixed at eight cents per hundred pounds, which will be invariable.

Ashes will be received at the Warehouse on storage, at the usual rates, subject to order for inspection or otherwise.

Submitting the above matters to your consideration, we shall be pleased at all times to receive any ashes you may see fit to entrust to our care.

Very respectfully, your obedient servants.
FREEBORN, JEWETT & CO

Patent Medicines.

SANDS'S SARSAPARILLA,
FOR THE REMOVAL AND PERMANENT CURE OF ALL DISEASES ARISING FROM AN IMPURE STATE OF THE BLOOD, OR HABIT OF THE SYSTEM, VIZ:
Scrofula, or King's Evil, Rheumatism, Obstinate Cutaneous Eruptions, Pimples or Pustules in the Face, Blotches, Blles, Chronic Sore Eyes, Ring-worm or Tetter, Scald Head, Enlargement and Pain of the Bones and Joints, Stubborn Ulcers, Syphilitic Symptoms, Sensitive or Lumbago; and diseases arising from an injudicious use of Mercury, Acrites, or Dropsy, Exposure or imprudence in Life; also Chronic Constitutional Disorders, &c.

"EVERY CELL AND ORGAN of the human body," says a distinguished medical writer, "is originally built of, grows, and is renewed by an independent vital force; and when causes which have arrested such growth, or renewal, are removed, then by the influence of this vital force, the actions in a part, or in the whole system, resume their harmonious course, and the ravages consequent upon disease, are overcome, obliterated and repaired." Here is the whole theory of disease, and the same author proceeds to say, that in many diseases "substances are conveyed into the blood which are incapable of assimilation." In order, therefore, to restore this "vital force," and get rid of these "substances," it is necessary to employ an agent which will act with directness and certainty upon the blood in the process of its manufacture, preventing the introduction of nonassimilating substances, and thus cutting away, as it were, the very roots of disease. That this preparation is such an agent is abundantly proved by the innumerable successful results that have attended its use. It expurgates the source of the disease, and of course its outward evidence, rolling out of their infectious substance in the blood, are rapidly absorbed, and the patient is restored to health.

The proprietors submit to the public the following certificate from a highly respectable source, of a cure made by using their preparation of Sarsaparilla.

NORWICH, N. Y. Oct. 4, 1846.

Messrs. A. B. & D. Sands:

Gentlemen—Feelings of gratitude induce me to make a public acknowledgment of the benefit I have derived from the use of your Sarsaparilla. I have for several years been afflicted with scrofulous swellings in my head, which at times would gather and discharge at my throat nose and ears, and at others would break out in different parts of my face and head. These continued until my throat, face and head were almost one complete sore, and for a long time I was so hoarse that it was with the utmost difficulty that I could speak above a whisper. During this time I had several attacks of pleurisy and other diseases. I consulted different physicians, and tried various remedies, but received no benefit until I commenced using your Sarsaparilla. I am now well, my sores are all healed, and I attribute the result entirely to the effects of your valuable medicine. Yours, with respect and gratitude.

PHEBE CAHOON

Being personally acquainted with the person above named, I believe her statement to be correct.

JAMES M. D. CARR, Justice of the Peace.

The following testimonial from the Agent to the value of the Sarsaparilla in a case of leprosy will be read with interest by all similarly afflicted.

BEAVER, Pike Co. Ohio, Sep. 7, 1846.

Messrs A. B. & D. Sands:

Gents—A man near here used six bottles of your valuable Sarsaparilla for the leprosy, and has received more benefit from it than all other remedies combined for six years past. It removed a hand, leg and foot from a situation that no person would have known they belonged to a human body, as all appeared to be one mass of putrifying sore. His hand and other diseased parts are all restored to their natural size and feeling; are entirely healed over, and his leprosy gone. I think it worth to the leprous a few more bottles to permanently establish his health.

Yours, most respectfully, G. W. RAYNOLDS.

For further particulars, and conclusive evidence of its superior value and efficacy, see pamphlets, which may be obtained of Agents gratis.

Prepared and sold by A. B. & D. SANDS, Druggists, 100 Fulton-st. corner of William, New-York.

Sold also at 273 Broadway, and 77 East Broadway, and by druggists generally throughout the United States.

Price $1 per bottle. Six bottles for $5. j21 1m

GREAT AMERICAN REMEDY.
WESTERN NEW-YORK COLLEGE OF HEALTH, 207 MAIN-ST. BUFFALO, N. Y.

DR. G. C. VAUGHN'S VEGETABLE LITHONTRIPTIC ADVERTISEMENT FOR 1847.—"*I Came, I Saw, I Conquered,*" is most emphatically the case with this article. Disease has ever yielded to its most marvellous medicinal power. Wherever it has gone, and South America, England, Canada, and the United States have proved the truth of this statement, the above quotation, in a strong and pithy sense, tells the whole story. Its wonderful principle upon which you are cured may not be known to you, but the result of a trial of the article is satisfactory; you are restored, and the secret of the cure remains with the proprietor. The medicine is a compound of 22 distinct vegetable agencies; each individual root has its own particular, exclusive, medicinal property, combining with no by-disease, but striking a sure curative blow. Its
