Law Courts.

SUPERIOR COURT—Before Judge Oakley—*Henry C. Thompson vs. John Tryon.*—The plaintiff at the request of a young man named Drake, presented an order at the box office of the Bowery Amphitheatre, signed by John T. Tryon, son of defendant for $5. It is said that Mr. Tryon charged that the order was a forgery pushed the plaintiff and caused him to be carried to the station house and next morning before Justice Taylor, when the charge of forgery was not pursued, and plaintiff was dismissed. He brings action for assault and battery and false imprisonment. To be concluded this forenoon.

CIRCUIT COURT—Before Judge Edmonds.—*Eugene Fogert vs. Stephen Burkhalter.*—Mr. Bogart purchased lots 181 and 183 Prince-st. adjoining Sullivan. He sold No. 183 to Mr. Burkhalter. At the time of purchase it was agreed that $100 be paid down, and the balance, $2700, on the 1st July, 1843, at which time Mr. Bogart was to give a full warrantee deed. The agreement for purchase contained these words: "It is understood by this sale that the purchaser shall erect a good brick dwelling house on said lot, to be occupied as such, and that he shall not erect on said lot any building to be occupied in a manner that will be a nuisance to the place." Mr. Bogart erected on lot 181 a first-class three-story brick house, and contends the oral agreement to have been that Mr. Burkhalter should have erected a similar one on 183, as the object of Mr. Bogart in buying both lots was to secure such being done. Mr. Burkhalter, however, after purchasing, re-sold his lot to a baker, Mr. John H. Inman, who erected a brick building on the front, in which was his baker's shop, and a bakery and store-house in the rear, also keeping his horses in the cellar, entered by a passage way. It is contended that the smoke from the bake house, the barrels often in front of the house, and the stable, are a nuisance, and action was brought for damages. A demurrer was put in, which has been to the Supreme Court, in which Mr. Burkhalter contended that the original agreement was merged in the warrantee deed, which contained no provision of the kind. The Supreme Court, however, held that the original agreement formed part of the equity of the case, and sent the case for trial.

For defence it was alleged, 1st, that in order to make a previous agreement binding it must be incorporated in the final, or warrantee deed, which was not done in this case; 2d, that the agreement was void from the fact that Mr. Bogart could not give title on the 1st July, owing to a mortgage which existed and did not give such till ten days after, with verbal notice that Mr. Burkhalter did not consider himself bound, after the 1st, by the agreement; and 3dly, that a bakery is not a nuisance.—The Court considered that the latter was the great point. Mr. Inman, in his testimony, stated that the front building is a good three-story house, that the bakery has a high chimney, according to law, that he uses nothing but pine wood, and his fires are only 15 to 20 minutes, twice a day. The Court stated that the word "nuisance" must be taken in its legal meaning, and a bakery, as usually conducted, did not appear to come within it. A nonsuit was granted.—For plaintiff, Messrs. Tucker and Crapo; for defendant, Mr. E. L. Truscher.

The Rotary Book Comparer.

On a call which we made a few days since upon our old friend, Lyman Cobb, A. M. the father of American school book authors, (now that Dr. Webster is no more,) at his residence in Lexington Avenue, we saw, in his study, that same old labor saving and mind-relieving machine, the "Rotary Book Comparer," which he had in use fifteen years ago, when we were wont to drop in upon him to see the manner and ease with which, by its aid, new, revised, corrected and improved dictionaries and other school books, were ground out, as it were, of a parcel of apparently miscellaneous, chaotic rubbish, and transmigrated, (if we may be allowed the expression,) into a perfect system or order, regularity, and symmetrical harmony, as with the wand of enchantment.

This Book Comparer is a very simple machine, without anything complicated in its construction. It is but little larger than an ordinary center table, which it resembles in its circular form, the place for the books being something like, in shape, a gentleman's hat, in its position while on the table, the books standing upon the narrow shelf, or rim, nearly in a perpendicular position, being fastened open, and back against the crown or upright cone, by wires, so that from thirty to fifty dictionaries, or other books, may be held open and brought before the eye at the same moment, by giving this table-wheel a rotary turn on the axis or shaft upon which it moves as on a pivot.

This machine is the contrivance of Mr. Cobb himself, and if not directly connected with the use of diphthongs and tripthongs, it is certainly a great aid in facilitating the analyzation and comparison of such like things. Mr. C. thinks that for the twenty years during which he has had it in operation, it has enabled him to perform twice the amount of labor that he could otherwise have accomplished, and with a far greater degree of accuracy than would have been possible in the ordinary way.

We should think such a machine as this would be a great aid to historians in compiling their works, and in fact to all authors who have need of frequent reference to other authorities. And it has occurred to us that it would be an invaluable help to the commissioners who shall be engaged in condensing, codifying and revising the laws of this State, under the new organization.

We are glad to find Mr. Cobb still engaged in preparing new books for the use of schools and for the benefit of the rising generation. Mr. C.'s new Spelling Book, and his valuable series of Reading and other School Books, have justly gained for him a reputation that will be more enduring than monuments of marble or statues of brass. We think he has done more to correct the discrepancies of the language, and toward elucidating and systematizing the elements of our vernacular language than any other author extant in this country.

COMMERCIAL AND MONEY MATTERS.

For sales of Stocks, &c. see Fourth Page.

MONDAY, P. M.

The Stock Market was quiet to-day, with some fluctuations, but no general feature. The Long Island bears were not active. For Government stocks there was a moderate demand at about previous rates.

The Exchange Market remains very quiet, and rates are heavy. Good sterling can be had at 5¾ and first class at 5¾. Francs 5 40. There will not be much done until the sailing of the Sarah Sands 24th, and the steamer of the 1st prox.

The immense amount of Corn recently bought for export has employed all the tonnage ready for loading, and we understand our port is nearly if not quite bare of unengaged vessels suitable for the Liverpool trade.—This scarcity of vessels has driven shippers to other ports both for vessels and produce. Three ships have been taken to go from Boston to Baltimore and Norfolk to load for Liverpool at 8s. and 26d. Some engagements were made here for Liverpool at 7s. 6d. and 26d. and four vessels for Limerick, Londonderry and other ports in Ireland at 27d. in bags and 28d. in bulk. A vessel was also taken to go South to load at 27d. in bags.

It is now stated that the Secretary will need a farther loan of ten millions, as no estimate was made in the former loan for the expenses, bounty, &c. of the ten regiments to be raised under the late bill.

The True Sun this morning states that the Delaware Bridge and New Hope Bank belongs to Beach & Sons. We are requested to state that Mr. Beach has not a dollar of interest in that Bank and never has had.

Plainfield notes have been selling to-day limitedly at 50 cents on the dollar. Holders generally prefer to keep them. For Lehigh there was no sale.—The Sun of this morning says:

Exaggerated reports having been set afloat as to the amount of bills issued by the Plainfield Bank and now in circulation, we deem it proper to state, from authentic and positive information, that the actual amount does not exceed $90,000—as an effect to which the Receivers have in their hands resources and assets of the institution to the amount of not less than $130,000. From these assets, with a liberal allowance for bad debts and losses, certainly $100,000 will be realized, so that the public may see that not a single dollar is ultimately to be lost.

The Philadelphia North American contains a long and pungent communication from Mr. Gliddon, late Consul at Cairo, addressed to W. Lea Roberts, Esq. of this City, opposing the recommendation of the Secretary to appoint a Consul General with a salary, for Egypt, on the ground that simple Consuls cannot have personal access to the Viceroy. Mr. Gliddon proves, from his own experience and from the testimony of travelers in Egypt, that such an appointment would only entail useless expense on the country and furnish no more facilities to our countrymen than the simple Consular system.

A Committee of the Legislature of Delaware has just completed an examination of the condition of the Farmers' Bank of Delaware, at Wilmington, and report the institution sound. The notes in circulation amount to over $92,000, and the specie and specie funds to about $50,000.

By a letter on the outside it will be seen that there is a fair prospect that Maryland will soon resume payment of the interest on her public debt.

It is stated that it is not the intention of the Canal Board of this State to make any reduction on the present rates of tolls on breadstuffs, except on the article of corn meal, which heretofore has been subject to the same toll as that on wheat and wheat flour. Instead of paying four mills per 1000 pounds per mile as at present, the toll on corn meal will be reduced to three mills per 1000 pounds, which is the same rate as is now charged on corn.

The shipments from New-Orleans to New-York from 1st September to latest date have been 826 bbls. Beef, 128,167 pgs Lead, 776 bbls Whisky, 4,482 sacks Wheat, 5,380 sacks Corn, 24,618 bbls Flour, 23,785 bbls. Pork, 2,069 hhds. Bacon, 9,855 bbls. Lard, 15,825 kegs Lard.

The Indiana Legislature has granted a charter for a Railroad across that State via Terre Haute, Newcastle, Indianapolis and Richmond. The right of way had been previously granted to another Company from Richmond to the Eastern line. The capital stock is $800,000, to be increased at the option of the stockholders.

The amount realized from the recent sale of St. Louis bonds, after deducting the expenses of the agent, is as follows: on bonds for $10,000, 84½ per cent. and on the residue 81½ per cent.

MONDAY, Feb. 15.

ASHES—There is no marked change. The sales reach 250 bbls at 4 87½ and 5 50 for Pots and Pearls—Holders are steady.

COTTON—The sales to-day have not been large, amounting to only 700 bales. Prices are scarcely yet settled but range in proportion to 12¼ cents for "Fair" Uplands in square bales. Freights on Cotton to Liverpool continue very dull, several small parcels having been taken at ⅝d for square and 7-16d for round bales.

COTTON ESTIMATE—The Collector of the port of Mobile, having been requested to ascertain the quantity of Cotton made in the year 1845, in pounds—the average weight of bales at each of the ports where the article is received for shipment; and whether any increase or decrease is accruing in that respect this season—not long since addressed letters of inquiry to the Collectors of New-Orleans, Charleston and Savannah, and has obtained the following information, which he has politely furnished for the use of all concerned.

The books in the Mobile Custom House show only the portion of the crop shipped to foreign countries. Use this as a basis of calculation, with the Prices Current in the hands of every merchant, the results which follow have been obtained.

At New-Orleans the average weight of the bales received last year ending 31st August, 1846, was 450 pounds, and no information of any change this season.

At Mobile it was 459 pounds last season; and so far in this 484 pounds.

At Charleston last season and this 360 pounds.

At Savannah it was 415 pounds last season, including Upland and Sea Island, and 430 as far as this. The Upland has not increased beyond the average of last season, which was 402 pounds; but the result is due to the small quantity of Sea Island received this season, which does not average much over 300 pounds to the bale.

Table No. I. presents the number, average and aggregate weight of bales received at the Southern ports of the United States, (exclusive of Texas,) of the crop of 1845—whole quantity 905,880,739 pounds. The average weight of the bales in Florida, North Carolina and Virginia, is conjectural.

Table No. II. shows the receipts of the crop of 1846, up the 8th of January, an estimate of the total receipts during the season at each port, provided the same proportion be maintained throughout, and the crop amount to 2,000,000 of bales. The quantity in such case would be in the aggregate 859,880,739 pounds.

Table No. III. shows the deficit from the crop of 1845 in pounds, and in average bales of 440 pounds, should the crop of 1846 be respectively 2,000,000, or 1,900,000, or 1,800,000 bales.

FLOUR AND MEAL—There has been but a moderate business done but we have no change to note in prices. There were sellers of Genesee at 7 37½, although some holders ask 7 50, but no buyers for shipment at over 7 25. The sales reach about 3000 bbls at 7 25, including one parcel of 1000 bbls of Genesee. It was not easy to pick up Genesee at that rate. In Southern we hear of but little doing. Georgetown, Howard-st. Alexandria, &c. were held at 6 87½, but some parcels of Baltimore could have been had at 6 75. Meal is less active and nominally $5@5 25. Rye Flour $5, without sales.

GRAIN—The inquiry for Wheat is good, but the supply is moderate and the market is held too high for buyers. Sales 2600 bushels Jersey and Long Island at 140 @ 1 45 for milling. To arrive after the opening of the Canal 20,000 bush. pure Genesee sold at 145 cents. Corn was rather heavy but improved toward the close and could not probably then have been bought to any extent below 98 cents. The sales are 25,000 bushels Yellow and mixed at 94@97; 5000 do Long Island White at 95, and 20,000 do Northern, to arrive by 5th March, at 90 cents. Barley to arrive is offered at 75 cents. Oats are steady for Northern at 48@50. Jersey 40@43. Black-Eyed Peas 2 37½ per bag 2 bushels, and White Beans 1 37½@1 50 per bushel.

WHISKY—The supply by the Housatonic Railroad continues to fair extent and sales 100 to 150 bbls have been made at 28½@29 cents. Drudge sold to the extent of 50 hhds at 29, but distillers ask 30 cents.

FRUIT—We note sales 30,000 lb Dried Apples at 4½ cents ℔ lb. Ohio Peaches are 3 50 per bushel; New-York 4 50 per bushel.

TALLOW—A sale of 10,000 lb was made at the full market rate.

GROCERIES—The trade are not doing much. They are holding back for supplies soon expected. Holders are, however, firm in their demand. N. O. Molasses held at 40 cents. Sugar 8@8½. Brazil Coffee 7¼@7¼ cts.

RICE—There were sales of about 300 tcs. to day at 4 75 for parcels not strictly prime, for export.

SEEDS—A small parcel of good Timothy sold at $20 ℔ tierce, and 60 tierces new Clover, a forced sale at 8½ cents. Rough Flax is nominally 10 50@10 75.

No change to note in Butter and Cheese. The markets are very firm.

General Notices.

☞ **The Concentrated Compound of Yellow Dock,** prepared by Dr. GRISWOLD at 657 Broadway in the Medical College, is a remedy adapted to the nature of scrofula, as it is now understood, in all its various forms. It is not either a patented or secret medicine, as its formula has been submitted to a large number of medical men, by whom it has been used the last year, and from their experience it is proved that it will not only cure scrofula and many other chronic complaints, but will eradicate from the system the predisposition to this fast increasing disease, and with this view it is advertised, that a greater number may avail themselves of the benefit of its use.

For sale by the principal Druggists throughout the city. 16f 3teodos*

☞ **Temperance Anniversary.**—Franklin Union No. 1, Daughters of Temperance, will celebrate their Second Anniversary at the Broadway Tabernacle, on Tuesday evening, Feb. 16. Hon. ☞ **Dr. Wood's** Sarsaparilla and Wild Cherry Bitters, for the permanent removal of all such diseases as take their rise in an impure blood impaired digestion, morbid state of the liver and stomach, weakness of the nervous system, and a disordered habit of constitution, and the whole class of diseases, for which the medical faculty have for years unanimously prescribing the celebrated Sarsaparilla and the Bark of Wild Cherry.

Dr. Wood's Sarsaparilla and Wild Cherry Bitters, is the only medicine ever made of these articles, and founded as it is on the best medical principles, and their virtues extracted by a rigid chemical analysis, experience has shown its unusual power and efficacy, and will be found on trial, to be a sure and speedy remedy for the diseases enumerated above. They purify the blood, secure regular digestion, promote a healthy action of the liver and stomach, and strengthen the nerves, at once securing health and vigor to the whole system. In all cases of despondency, from indigestion or nervous irritation, they have been used with remarkable success; nor are they less useful as a remedy for headache, flatulency, loss of appetite, and a general prostration of the system. At the same time, it must be stated, that they are neither violent, nor at all dangerous in their operations, securing as they do the desired end, by a steady, regular, and easy influence.

Sold wholesale and retail by WYATT & KETCHAM, general agents, 121 Fulton-st.; at retail 192 Broadway; 311 Bleecker-st. N. Y.; J. W. Smith, cor. Fulton and Cranberry sts. Brooklyn. Price $1, large bottles. 14 3mis*

General Notices.

☞ **"Facts for the People."**—Exposure to cold when the body is heated, wet feet, putting on or keeping on wet clothes, in addition to hereditary disposition or unwholesome employment, are some of the primary and most frequent causes of that fearful disease—PULMONARY CONSUMPTION. For the removal of the effects of these causes, freeing the system of all obstruction, allaying irritation and promoting a healthy action of the lungs, the most speedy and certain remedy is THOMSON'S COMPOUND SYRUP OF TAR AND WOOD NAPHTHA.

This preparation is formed by a union of some of the principles of our most valuable vegetable pectorals in a combination with TAR—the value of which, in all affections of the breast, all know and confess. Since its introduction, of those who have employed it,

"None name it but to praise."

And even the prejudice of Physicians to the employment of combinations, of whose exact constituents they may be ignorant, has been so far overcome that this cure has been recommended and is now daily prescribed in their practice. Prepared only by Aspinwall & Dickson, successors to S. P. Thomson, cor. Fifth and Spruce sts. Philadelphia. Sold, wholesale and retail, by WYATT & KETCHUM, 121 Fulton-st. and at retail by H. Johnson, 273 Broadway, New-York. Price 50 cents a bottle; six bottles for $2 50.
