MEMORANDA.

The barometer on board the U.S. Cutter Taney began to fall on Friday morning, but run down very slow—at noon it was 29.75 inches, wind from South and rain—at 8 P. M. (about which time the gale commenced) it fell rapidly, wind strong from the North and snow, and continued to go down until midnight, when it was at its lowest point, 28.75. Thermometer 42, wind heavy from N. N. E. About 4 A. M. on Saturday it began to rise, and at noon was 29.25; but the gale did not reach its height until after 3 P. M. At 8 o'clock the mercury was at 29.75, wind abating and weather beginning to look like moderating. At the commencement of the storm the compasses were much agitated and unusually distracted, and for half an hour were almost useless; but as soon as the gale appeared to have taken its character the magnetic needles assumed their polarity, and were not again affected.
