COMMERCIAL AND MONEY MATTERS.

For sales of Stocks, &c. see Fourth Page.

SATURDAY, October 14—P. M.

Sound Stocks are in fair request, and the quotations are firm—Treasury Notes 5 and Government Sixes 6. There is not much doing in the fancies, and the quotations were fluctuating.

There was nothing of importance doing in Exchange, and the market is without change.

There is a fair amount of business done in freights, and the market is steady. Flour was engaged at Liverpool at 2s 6d, and Grain at 5½d. Cotton is dull at 3¾d, heavy goods 27s 6d@30s. Within a few days 10,000 to 15,000 boxes Cheese have been engaged for London at 35s@37s 6d.

We copied a paragraph a few days since from *Thompson's Bank Note Reporter* stating that the Seneca County Bank, Ohio, had been protested here. We understand that the matter has been arranged, and the protest arose from the accidental delay of a remittance, which has since come to hand.

The entire shipments of Coin during last week were $89,240, including $175,000 to Havre and $105,000 per steamer to Bermuda. The entire shipments since 1st January have been $9,611,175. There is continued receipt of Coin from the interior, but not much from abroad, excepting that which comes in the pockets of immigrants. The quotations are:

	Per cent. discount.		Value.
Gold coin, old	105 @ 106	Carolina dollars	$1 02@ 1 04
Gold dollars, new	100 @ 100½	Five francs	95@ 96
Half dollars	100 @ 100½	Doubloons	15 @ 16 10
Quarter dollars	100 @ 100½	Doubloons, patriot	15 60@ 15 70
Spanish dollars	102 @ 104	Sovereigns	4 85@ 4 87
Mexican dollars	101 @ 102	Napoleons, old	15 @ 15 10
Quarter dollars	99 @ 100	Napoleons, new	3 85@ 3 87
Treasury Notes	100 @ 103		

The value of merchandise imported into this district, excepting that sent to the warehouse, and the amount of duties received during the week ending on the 13th inst. in each of the three years, is as annexed:

	1846.	1847.	1848.
Dry Goods	166,172	69,862	59,473
Dutiable Goods	734,115	638,098	1,244,792
Total	900,287	707,942	1,304,271
Duties	312,363	267,495	175,628
Cash received	210,353	179,095	324,675
Average rates of duty	26 4-7	27 2-3	25 5-6

It will be seen that the imports are for the week nearly one hundred per cent larger than for the corresponding week of last year. The amount, however, is moderate compared with the imports some weeks since. The imports of Dry Goods in the above were $651,395, of which $291,702 were manufactures of Silk, $80,608 of Cotton and $149,601 of Wool. The goods withdrawn from warehouse amounted to $65,928, and the amount entered for warehousing was $99,841. The exports of the week were $1,218,570, including specie, showing an increase of $140,000 on the previous week. Of the exports Great Britain took $532,000 and China $160,000.—The exports to China embraced 153,000 lbs Ginseng and 1,200 packages Cotton. Nearly a million pounds Cheese were shipped to England; also, 133,000 bushels Corn, 3,000 bushels Wheat, 28,000 bbls Flour, 100,000 lbs Tallow, 204,000 lbs Lard, 1,950 bales Cotton and 1,000 bbls Apples. The *Washington Union* contains a statement of the value of merchandise remaining in the several United States Warehouses on the 31st March, 1848, of which the following are the totals:

In Boston	$1,163,286	In New-Orleans	$210,924
In New-York	2,727,508	In Charleston	96,206
In Philadelphia	755,044	In Elsewhere	269,364
In Baltimore	60,820		

The value of the above amount to $5,291,179, and the duties to $1,669,067 37.

The auction season is nearly over, and the sales of the past week have not been important. Generally prices were not sustained. Woolen goods are in fair request, and the market is steady. At present prices it is believed that well regulated and economically managed mills are making a small profit on cotton goods.—The *Dry Goods Reporter* furnishes the following table, showing the cost per yard for manufacturing different styles of cotton goods in the United States. From all numbers of yarn and at all prices of the staple:

PRICE OF COTTON.

This table will give a clearer insight into the present state of the manufacturing interest in our country than any theoretical treatises that can be written, as these are practical results. It must also be borne in mind that this is the net cost, and the manufacturer cannot expect to receive returns in less than ten months. Desirable stuff goods continue scarce, and are in good demand.

Of Cloths the stock in the hands of all classes of dealers is large, and sales at present slow. We learn of instances in which bids have been rejected, as being likely to do better in England than here. Time were month of the grades most in demand, and it is generally conceded that our best American goods, and also have an overwhelming competition from the German manufactures. Extensive preparations are making to push forward with increased energy the productions of our print works. Dress Goods have been quite active lately and at prices somewhat less. In heavy Woolen Shawls we have but low in market of the low priced grades, (as compared with previous years,) but so many goods of this description are now made in Massachusetts that the want of the imported article is not felt. Linens have been ruling at such low prices, that we have had little or no inquiry for them of late. Cottons have, but they remain as before reported, dull, and held at low prices. Our importers are now so far through their season's business that an estimate can be made as to the amount which will be done. The general impression, full from our investigations we think a correct one, appears to be that the sales of the three months of last year's trade.

There is a negotiation now going on between the managers of the two great avenues to the Pennsylvania coal fields, the Reading Railroad and the Schuylkill Navigation Co. by which a remunerative rate of toll will be fixed upon for next season. There is every probability that an amicable arrangement will be made, and that the present suicidal course which has brought both companies to the point of bankruptcy will be abandoned. The supposition that such an arrangement will be made has carried up the stock of the Reading 2 per cent within a week.

The quantity of Coal transported from the Anthracite coal regions of Pennsylvania for the past week was as follows:

Week ending Oct. 12	Previously.	Total for the season.
Schuylkill Canal....tons	11,281	337,072	348,353
Reading Railroad	24,533	574,540	599,073
Lehigh Canal	18,108	566,784	564,892
Totals	53,772	1,478,396	1,512,318

The business on the Wabash and Erie Canal, Indiana, continues to show an increase. The tolls received at Lafayette and Fort Wayne, for the month of September, were:

	1846.	1847.	1848.
Lafayette	$6,321 95	$7,763 36	$13,306 99
Fort Wayne	3,602 01	6,307 07	8,242 16
Total	$9,923 96	$14,163 03	$21,749 15

At Portland money is exceedingly tight. At Boston there is a little relief, and money can be had if paid for. At Philadelphia the market is still very tight, but paper sells at rather better rates. At Baltimore the market is still stringent.

A train has been run over 24 miles of the Syracuse and Oswego Railroad and regular trains to Fulton are to commence on Monday next. The capital of the Company is $300,000, and it has borrowed $100,000, which will build and equip the road the entire distance, 35 miles. The iron used weighs 57 lbs. to the yard. The track is very straight and the maximum grade does not exceed twenty feet to the mile.

The *Washington News* says:

The dealers in Land Warrants to-day were offering from 100½ to 101, for a great many on the market, and the rate rather tending upwards.

Markets....CAREFULLY REPORTED FOR THE TRIBUNE.

SATURDAY, OCTOBER 14.

ASHES—Pots are rather better, and selling at 6 12½@6 25; Pearls are 6 18¾. The sales of both are 150 bbls.

COTTON—There is a moderate business and no change. Sales 8 or 300 bales at previous.

FLOUR AND MEAL—The market for Flour to-day has been heavy, and the demand has been good. There were no good purchasers, and the demand has been good. There were no good purchasers, and the demand has been good. There were no good purchasers
