among depositors $232,543 47, or about 40 ₱ cent—it thus appearing that, except the loss of the interest, Canal Bank bills are worth par, and deposits 40 ₱ cent. So, excepting for the unhappy stockholder, this failure has not been so utterly disastrous as was at first expected. The desperate condition of the Bank may be imagined, when it is known that for a long time prior to its failure it had paid at the rate of $190 each day for interest and discount, and that its overdrafts amounted to over one third of its capital. The Committee alluded especially to the necessity of the strictest integrity on the part of Banks in New-York or Albany, as they become the depositories of the funds of the country Banks.

The Eagle Life and Health Insurance Co. has declared a dividend of ten ₱ cent.

A large number of men are engaged near Milport on the superstructure of the Chemung Railroad.

We annex, from the *Evening Journal*, an abstract of the condition of the fifty-five Insurance Companies of this State, made up to the 31st December:

Amount of capital stock paid in or secured to be paid to, or invested according to their charters	$10,956,018
Amount of capital stock still possessed over and above losses	10,272,993
Whole value of real estate owned and held by the Companies	453,591
Value of that portion of real estate occupied and necessary to the transaction of business	257,111
Value of stock of other companies or corporations held absolutely	528,311
Value of stock of other companies or corporations held as collateral security for debts	249,403
Whole amount of debts owing to the Companies	6,137,433

Average amount of debts owing by the Companies for each month during the year	188,207

It may be proper to state that the capital of the Mutual Insurance Companies consist of premium notes given by the insured.

The form in which the reports are made is defective, and it is difficult to make up a satisfactory abstract.

There are some twelve or fifteen companies exempt by their charters from the operation of the statute which requires such reports, the greater number of which decline furnishing statements. As these and foreign insurance companies effect insurances to an amount which may be estimated at not less than sixty millions, it is to be regretted that no accurate information of their business transactions can be obtained.

The aggregate value of real estate assessed for taxes in 1848 was $526,624,853, and the personal estate at $125,663,318, making a total of real and personal estate of $651,619,595; but as property in this State is assessed at a rate far below its real value, and as a large amount of stocks, mortgages, shipping, &c, wholly escape taxation, it is but fair to presume that the real and personal estate owned and held in this State is worth at least $850,000,000, of which nearly *one-half* is annually insured.

A convention of the friends of the Great Central Railroad, leading from Pittsburgh, through Steubenville and Columbus, to Cincinnati and St. Louis, according to the call, is proposed to be held in the City of Steubenville on Thursday, the 26th day of April.

A very large Spring business is reported at Pittsburgh.

A meeting was held at Talladega on the 26th ult. to take into consideration the establishment of some direct communication between Talladega and the navigable waters of Mobile Bay. It was addressed at some length by Chancellor Ligon, and a committee of five was appointed to correspond with citizens of the adjoining counties upon the propriety of constructing a Railroad connecting "the navigable waters of Mobile Bay with the Tennessee River."

The Central (Ga.) Railroad Company have declined to render any aid to the Nashville and Chattanooga Road. The reason given is the expenditure for iron, 500 tons, of the Georgia Company, which will employ all their funds

The citizens of Williamsport have had a meeting to assist the building of the Williamsport and Elmira Railroad.

About twelve miles of the Northern Railroad are completed, and considerable portions are graded. Thirty miles are expected to be opened next season. The capital of this Company is $2,000,000. The amount paid up is $903,321, and the amount expended for construction, &c, $842,511. The Company owe $127,697.

☞ **Beware of Counterfeits and Imitations.**—The unparalleled and astonishing efficacy of Dr. WISTAR'S Balsam of Wild Cherry, in all the diseases for which it is recommended; curing many cases after the skill of the best physicians was unavailing, has effected a large and increasing demand for it. This fact has caused many unprincipled counterfeiters and imitators to palm off spurious mixtures, of similar name and appearance, for the genuine Balsam. Some are called "Syrup of Wild Cherry," "Balsam of Spikenard," "Wild Cherry Comfrey," &c. Another, "Wistar's Balsam of Wild Cherry," mis-spelling the name, and forging the certificates to resemble those of the true Balsam, "Dr. WISTAR'S Balsam of Wild Cherry," is the only genuine. The rest merely imitate the name of the original, while they possess none of its virtues.
Look well to the marks of the Genuine—The genuine Balsam is put up in bottles, with the words "Dr. WISTAR'S Balsam of Wild Cherry, Phila," blown in the glass; each bottle bearing a label on the front, with the signature of H. WISTAR, M D.
This will be enveloped hereafter with a new wrapper; copyright secured, 1844; on which will always appear the written signature of "I. BUTTS."
Be careful and get the genuine DR. WISTAR'S BALSAM OF WILD CHERRY. None genuine unless signed by I BUTTS. Address all orders to SETH W. FOWLE, Boston, Mass.

ANTHONY & EMERSON.

THE DOUBLE-ACTING ROTARY CHURN.—In bringing this effectual and simple Churn into use, the proprietors, feeling confidence in its capabilities, do not hesitate to pronounce it the best Churn ever offered to the public.—They have taken an office at 77 Fulton-st, New-York, and in order to convince the incredulous and satisfy the curious, at 12 O'CLOCK, DAILY, A CHURNING WILL BE MADE.
The public are invited to call and examine the machine, and see its utility tested. It combines the following valuable qualities:
1st. It produces better in less time than any other Churn, making it and gathering it from sweet milk in from three to eight minutes, and from cream in much less time.
2d. It produces more butter from the same amount of milk or cream than the ordinary method, as it does its work in a more thorough and scientific manner.
3d. It is the cheapest, simplest, and most convenient Churn ever invented, embodying the true philosophical principles of butter-making.
4th. New milk after being churned is sweet and suitable for family use.
5th. Instead of feeding the calf with milk direct from the cow—churned sweet milk answer every purpose. By this process the butter is all profit.
We offer it upon the following terms: If the Churn does not prove as represented, it may be returned and the money will be refunded.
A liberal discount made to those who buy to sell again.

TARRYTOWN INSTITUTE.

A SELECT BOARDING SCHOOL FOR BOYS, at Tarrytown, N. Y.—This Institution is pleasantly situated on the outskirts of a mile north of the village, near the spot on which Maj. Andre was taken, and about half a mile from the steamboat landing and Hudson River Railroad. In this Institution young gentlemen will be thoroughly instructed in all the branches of an English and Classical education requisite for commercial pursuits or entering College. The Principal having been more than 12 years successfully engaged in the business, feels himself fully competent to give perfect satisfaction to those who may patronize the Institution, and he pledges himself that special attention shall be paid to the manners, morals and intellectual improvement of the pupils committed to his care, their number being limited to 25. There are two terms in a year, each 22 weeks. The Summer term will commence on the 1st of May, and the Winter on the 1st of November. The price of Board and Tuition, including bed, bedding, washing and mending, for the Summer term is $75 to $85, and the Winter from $80 to $90 payable in advance. A NEWMAN, Principal.

THE EAGLE LIFE AND HEALTH INSURANCE COMPANY, 128 Wall-st Manhattan Bank Building.—Capital $100,000—in addition to Reserve Fund.—The business of this Company is conducted upon scientific principles and based upon original tables, carefully prepared by a competent mathematician.
A thorough investigation of its affairs is made annually when such a portion of the premiums is reserved and placed as interest as minute and exact calculation show to be necessary to meet future losses; the capital always forming beyond this an additional security.
The charter makes the Directors personally responsible if the capital is impaired, by returning any portion of it in dividends.
The insured incur no responsibility beyond the payment of the premium; nor any liability to have the sum insured reduced, or to make farther contributions in case of mortality beyond the estimate.
Losses are payable sixty days after proof of death, or immediately, on allowing the discount.
No risk is taken on any life for a greater amount than five thousand dollars, and no insurances are made on fire or marine risks.
Persons insured with this company may participate in the profits, in which case sixty per cent is carried to the credit of the insured, and added to the policy, and becomes payable in addition to the the sum insured, at death. Without participation, a very material reduction in the rate.
The insured may dispose of their policies to the company on f
