TRIBUNE SUPPLEMENT.

NEW-YORK, APRIL 18, 1849.

See Regular Sheet of This Morning.

MISCELLANEOUS NEWS ITEMS.

TREES.—It may not be improper to urge upon the attention of our citizens at this time the setting out of trees. There is no sort of labor connected with the beautifying of private residences or a city, so insignificant in itself and at the same time productive of such valuable results. Nature in her dispensations seems to scorn the influence of wealth. She offers light, water and air, all indispensable to our comfort and happiness, and even our existence, free alike to the high and the low, to the rich and the poor. In obedience to the same liberal system, she places within the reach of the humblest among us the means of gratifying a taste for the most beautiful and elegant of her ornaments. The tree that casts its grateful shade in the door-yard of the humble cotter, waves as gracefully in the free air of Heaven, blooms as greenly and as proudly spreads its branches, as that which throws its shadows against the stately mansions of ease and opulence. Nature sometimes, indeed, seems to rebuke the embellishments of Art, or to recompense the poor for the paucity of their enjoyments, by rearing in the presence of the lowliest tenements the most beautiful of these elegant evidences of her handiwork. There are none among us, who can offer any *valid* excuse for neglecting to avail themselves of the opportunity which the season now offers to embellish their property and the city, by the setting out of trees. The neighboring woods are full of the most thrifty and beautiful kinds, and they can be obtained for the trouble of taking them away. Maple, Sugar, Tulip, Poplar, Elm, and several other varieties can be had in the immediate vicinity, or if nursery trees will better suit the taste these can be purchased at very reasonable rates. *Will not* our citizens devote their attention more generally to this matter than they have done heretofore? [Dayton (Ohio) Bulletin.

SHOE PEGS.—The following interesting sketch of a factory where 1,000 bushels of pegs are made annually, at Vienna Village, Kennebec County, is from the *Maine Farmer*: The logs are sawed into blocks of suitable length for the pegs, and the ends are planed smooth. Grooves are then cut on the ends of these blocks, crossing each other at right angles, and these form the points of the pegs. They are then separated by splitting the blocks, a knife being introduced between each row of points, corresponding with the grooving. All these operations are performed by the machinery with the utmost precision and celerity. The pegs are then bleached, dried and prepared for market. We do not know what further improvements can be made in the manufacture of shoe-pegs. We recollect the time when the "sons of Crispin" made their own pegs—splitting them from the block, and pointing them with the shoe-knife. The machinery in this establishment, we will venture to say, is capable of turning off more pegs in one day than all the shoemakers in the State could make in the old way in the same time; while the machine pegs are altogether superior. The machinery here used was invented and patened by a New-Hampshire Yankee. Mr. Thomas C. Norris, the proprietor of this factory, informed us that since September last, he had sent 127 barrels of shoe pegs, and pins for cabinet work, to Manchester, England. He has farther orders from the same place, which he is unable to supply at present, in consequence of the water being so low in the stream that he could not keep his works in operation through the Winter.

A WORD ABOUT GARDENING.—No one can be truly said to live who has not a garden. None but those who have enjoyed it can appreciate the satisfaction—the luxury—of sitting down to a table spread with the fruits of one's own planting and culture. A bunch of radishes—a few heads of lettuce—taken from the garden of a Summer's morning for breakfast; or a mess of green peas or sweet corn, is quite a different affair from market in a *dying condition*, to be put away in the cellar for use. And a plate of strawberries or raspberries lose none of their peculiar flavor by passing directly from the *border* to the *cream* without being jolted about in baskets until they have lost all form and comeliness. And yet, how many in the smaller cities and villages of our country, possessing every facility for a good garden, either through indolence or ignorance are deprived of this source of comfort! And how many farmers, with enough land laying waste to furnish them with most of the luxuries of life, are content to plod on in the even tenor of their way, never raising their tastes above the "pork and beans," of their fathers!

☞ THE PRINTERS' UNION FESTIVAL on Saturday evening, came off in very fine style. In the address delivered at the Tremont Temple by B. Perley Poore, Esq Editor of the *Rex*, life and learning were ingeniously and agreeably blended. It contained much historical information in relation to the means of disseminating news in the olden times, and was in every respect exceedingly appropriate to the occasion. The supper at the Revere House was a gay and elegant affair, and good cheer, and speeches, sentiments, and singing abounded. The speakers were Mayor Bigelow, T. R. Marvin and Moses Kimball, Esqrs. of the Common Council; Col. Schouler of the *Atlas*, Elizur Wright of the *Chronotype*, Wm. Filmer, Corresponding Secretary of the Printers' Union, D. C. M. Rupp, Chairman of the Committee of Arrangements, and Henry A. McGlennen, late of the Massachusetts Regiment of Volunteers, called out by a compliment to the Regiment. Edward G. Abbott contributed a spirited and beautiful original song for the occasion [Bos. Post.

TRIAL FOR SEDUCTION.—The March term of the Circuit Court closed on Thursday night. The last cause, which was a trial for seduction, occupied two days, and excited a considerable degree of interest. The action was brought by John Frayer, father of Esther Frayer, against John Easelstyne. The parties reside in the town of Claverack, the defendant a well-off bachelor 'mong some 30 years of age; the girl, young, simple and uneducated, and previous to the seduction, accustomed to earn her livelihood as a domestic in the family of David S. Ten Broeck. The Jury gave a verdict for the plaintiff of $1,200. [Hudson Republican.

THE REPORTED MURDER OF GEN. PAEZ'S SONS. Letters have been received in this city from Maracaibo, Venezuela, to the 8th of March, which state that though that province has been free from war since the beginning of the year, confidence but slowly returns, and trade is dull. We also learn from the recipient of the letter, who has long been engaged in trade with Venezuela, that the report of the assassination of Gen. Paez's sons by Monages is without doubt unfounded. The penalty of death for political offenses has been abolished in Venezuela, for the same reason as in France, viz: that the oft recurring revolutions would endanger the heads of all parties. [Boston Traveller.

NEW MODE OF WASHING.—A Mr. Tibbets advertises in the Mobile papers that he has made a discovery of a chemical nature, by which a large washing of clothes—say *five hundred pieces*—may be done by one person in *twenty-five minutes*, without any machine or any *rubbing*, and without injury to the clothes. The Editor of the *Register* says, that the experiment was tested at the American Hotel in that city, in the presence of a number of persons, and with the most complete success; and adds, that a knowledge of the ingredients employed in preparing the water enables him to say that their use can work not the slightest injury to the clothing.

FROM NICARAGUA.—Letters from Gordon's California Association, which sailed from New-York in the brig Mary, to take the route by Lake Nicaragua have been received, dated March 27. The company was detained there, to put their iron steamer together, which was to convey them up the San Juan River, and through Lake Nicaragua to Lake Leon. Thence they were to go by land to the Pacific Coast, where they hoped to find a vessel to take them to San Francisco. They were all in good health. An agent of a new-York house had succeeded in making an engagement with the Government for the right of constructing a Railroad from Lake Leon to Realejo on the Pacific. [Phila. Bulletin.

CALIFORNIANS IN CAMP.—Altogether viewed this life of ours is a scene of pleasing excitement. We have the spirit-stirring drum of Professor Offutt, the horse tamer, the tented field of the Californians, and all that is wanted, is the ear-piercing fife to give to all things a thorough military appearance. However, what is deficient in that respect is made up by bowie-knives and pistols. A company, about eighty-five strong, from Alabama and Missouri, is camped near us, under the command of Dr. W. B. Smith. [Van Buren (Ark) Intelligencer.

☞ Edwin Robinson, Esq. late publisher of the *Vermont Gazette*, at Bennington, left this city *en route* for California, on Monday last. He is a Green Mountain boy, and prides himself in being the descendant of old Col. Sam. of the Revolution Battle memory.... Among the many strangers among us, *en route* for California, is Mr. C. R. Thorne, whose name is familiar to all playgoers. He is accompanied by his two sons.... We hail with pleasure the arrival of gentlemen of mature age among the emigrants. They will prove the little leaven that leavens the whole lout! [Van Buren (Ark) Intelligencer, March 31.

AN IMPORTANT INVENTION.—We learn from the Scientific American, that Mr. W. Froehlich, engineer in the navy-yard at Washington, has invented an apparatus, which is *radically self-acting*, to prevent railroad collisions. He has executed an operative model, which demonstrates that even in the event of two trains meeting at full speed, it will operate without the help of engineer and fireman, and prevent a dangerous collision. He has taken measures to secure a patent, and is now ready, we are informed, to enter upon negotiation with railroad companies on reasonable terms.

A MAN WHAT'S SOME.—Last week at Cleveland, a canal boat broke away from her moorings in the river and went out into the lake. There was but one man on board, but he having acquired much skill in the perils of the "raging canal," was equal to the fearful crisis. Of course his poles were not adequate in that depth of water, so quickly splicing the sum total of ropes and tow lines he shouldered the cook stove, brought in on deck, made fast, and cast anchor! Next morning he was discovered securely riding at anchor, and was brought into port.

MASSACHUSETTS—Among the most important proceedings in the Legislature on Friday may be mentioned the passage to a third reading of the bill to establish the Superior Court of Boston, and the appointment of a Committee to devise means of abridging the sessions of the Legislature. [Bos. Rep. 16th.

LOSS OF SPECIE AT SEA.—Capt. Martin of the schooner Abby Hammond, lost at sea on the passage from Aux Cayes for Boston, reports that the schooner sunk so rapidly that $15,000 in specie on board, went down with her. It was insured in this city—$11,000 at the Equitable and $4,000 at the Warren. [Boston Traveller, 16th.

KIDNAPPING.—Benjamin W. Fairver, a colored man, Pond Settlement, Gallatin Co. Ill. offers a reward of $25 each for the return of his four children, Louisa, Emily, George W. and Wm. Q. stolen from him on the 5th. He also offers a reward of $50 each for the kidnappers.

☞ Theodorick Lee, who died near Washington a few days ago aged eighty-three years, was the brother of the patriot and orator of the Revolution, Richard Henry Lee, and father-in-law of Mr. Giles, of the *National Intelligencer*.

Treasury Department.

WASHINGTON, April 14, 1849.

By the third section of the act of the 3d March last, entitled "An act to provide for the settlement of the accounts of public officers and others who have received moneys belonging or arising from military contributions or otherwise in Mexico," it is enacted "that where questions arise in respect to the refunding of duties collected in Mexico, or the remission of penalties imposed, on the ground that the collection was improper, or the penalties wrongfully enforced, the same shall be referred for the decision of the Secretary of the Treasury, who is hereby authorized and required to pay, under the direction of the President of the United States, out of the money in the Treasury raised from contributions, such sums as may be determined by him to have been improperly levied or imposed as contributions, assessments, or penalties."

For the information of claimants under this section of the act, notice is hereby given that this Department will require that all claims shall be presented in writing, setting forth the character and amount of the contribution, assessment, or penalty for which remission or return of duty is claimed; where, when, and wherefore the contribution, assessment, or penalty was imposed, and to whom paid. The application to be verified by the oath of the claimant, corroborated by the evidence of one or more disinterested credible witnesses, and to be accompanied by the certificate of the proper accounting officer that the contribution, duties, or penalties alleged to have been improperly or wrongfully levied or imposed, have been duly accounted for and paid over to the Treasury of the United States, by authorized disbursements or deposits.

W. M. MEREDITH, Secretary of the Treasury.

FIRES.—At Boston, on Saturday, the large brick building on the corner of Nashua and Causeway-sts.—occupied by Simmons & McIntire as an organ manufactory, and the apothecary shop of Dr. Galen Stevens, was destroyed by fire. Loss of S. & McI. $5000—small insurance; of Dr. Stevens $5,000, no insurance.

☞ A jury has been empannelled in the case of John W. Crafts indicted for conspiracy to destroy the ship Franklin, and the trial is set down for Wednesday.

MEDICINES.

SANDS'S SARSAPARILLA.
IN QUART BOTTLES.

FOR PURIFYING THE BLOOD, AND FOR THE CURE OF

Scrofula,	Liver Complaint,
Rheumatism,	Bronchitis,
Stubborn Ulcers,	Consumption,
Dyspepsia,	Female Complaints,
Salt Rheum,	Loss of Appetite,
Mercurial Diseases,	Cutaneous Eruptions,
Fever sores,	Pimples, Blotches,
Fever Sores,	Debility, &c. &c.

THE PROPRIETORS have spent much time in bringing this preparation of SARSAPARILLA to its present state of perfection; and the experience of fourteen years has furnished them the most ample opportunity to study, in their various forms, the diseases for which it is recommended, and to adapt it exactly to their relief and cure. Patients who wish a REALLY GOOD Medicine are invited to give it a trial, and satisfy themselves of its superiority, and the invaluable property it possesses of arresting and curing disease. The bottle has been enlarged to hold one QUART, and is its present improved form may safely claim to be the BEST AND CHEAPEST medicine of the age. The progress in the fame it has attained may be traced by a long line of facts and cures, like a broad and monumental beacon for the benefit, pointing the way to the haven of health, and what it has already done for the thousands who have used it, it is capable of doing for the millions still suffering and struggling with disease. It purifies, cleanses, and strengthens the fountain springs of life, and infuses new vigor throughout the whole animal frame.

The "cases" for which this article is recommended are those to which it is known from personal experience to be adapted; and those apparently removed beyond the sphere of its action have yielded to its influence. The catalogue of complaints might be greatly extended to which Sarsaparilla is adapted, but experience proves its value, and each succeeding day is adding new trophies to its fame.

REMARKABLE CURE OF BRONCHITIS

NEW-YORK, Feb. 17, 1848.

MESSRS. SANDS:—Having suffered many years with a disease of my throat, affecting the larynx, during which time I was treated by the most distinguished physicians in Europe and the United States, without receiving any permanent benefit, but all the while growing in my general health and strength declining, and the disease making fearful progress, every remedy you recommend, and whatever else was thought most efficient for producing a cure; but I am confident the deplorable situation I was in, the laryngitis being accompanied with phthisis and great difficulty in breathing, would soon have terminated my life had I not obtained relief through the medium of your invaluable Sarsaparilla. I feel it my duty, as a gentleman, when I commenced using the Sarsaparilla I did not place much confidence in its virtues; and this will not surprise you, when you are informed I had tried more than fifty different remedies during the past four years, without any success; but after taking your Sarsaparilla a few weeks, I was obliged at last to yield to evidence. The marvelous effects of the first bottle not only relieved, but cured me; and I therefore think it my duty, gentlemen, for the benefit of suffering humanity, to give you the attestation of my cure. Yours very truly, D. PARENT.

Consulate of France in the United States.

The above statement and signature were acknowledged in our presence, this 17 day of Feb. D. Parent as true

F. de la Corail, Consul General of France, L. SORG, New-York, Feb. 17, 1848. Vice-Consul.

REMARKABLE CURE IN CANADA.

The following truly remarkable cure is contributed to the most respectable authority, and cannot but have the effect of satisfying the most incredulous of the curative properties of this medicine:

PORT HOPE, (Canada East) April 13, 1846.

MESSRS SANDS—Gentlemen. Exposed as we are to the attacks of disease, and so frequently disappointed in proposed remedies, we cannot look upon the efforts of unscrupulous practitioners without interest and gratitude. This is to inform you that I have been afflicted for thirty three years with a disease been known to the medical world as "Lupus," and their prescriptions were which "doctors disagreed," and their prescriptions were still more diverse. I tried various remedies, but found no relief until I commenced using your excellent medicine, at which time I was wholly confined to my bed. After using it a few months, I now am able to walk about, ride out, and enjoy a comfortable degree of health, which I attribute entirely to the use of SANDS'S SARSAPARILLA. Please accept my assurance of gratitude and regard.

JOHN M. NORRIS.

Being personally acquainted with the above statements, I hereby certify that the above are true REV. T. M. MERRIAM.

SARSAPARILLA.—Concerning the value of Sarsaparilla as one of the most efficient remedies for purifying the blood, and eradicating the obstinate diseases of the skin, as well as of the system, we presume there is no difference of opinion either among professional men, or the public generally. The only difficulty has been, that poor material has been used in the manufacture of the various extracts, and inferior preparations, by which a great part of the virtue of the plant is lost; or the public have been imposed upon by base compounds, which have been introduced into the market, and thereby have lost confidence in all. These objections, as appears by the certificates of gentlemen of high reputation, the Messrs. Sands have removed in their extract. Their apparatus, from its power and adaptation to the purpose, is calculated to extract all the medicinal properties of the root, without the evaporation which causes a much less degree of strength, and the mode of putting it up is fitted to keep it in good order. The letters and certificates of those who have used it would leave no doubt as to its efficacy in our own minds, were we not convinced of it from cases among our own friends, where its use has been attended with the most satisfactory results in obstinate cases of diseases of long standing. [Hudson Republican.

CANCEROUS ULCER PERMANENTLY CURED.

LET THE FACTS SPEAK FOR THEMSELVES.—The following striking, and, we believe, the most permanent cure of an inveterate Cancer, is only another link in the great chain of testimony to its merits. Let the afflicted read and be convinced. What it has done once it will do again.

STAMFORD, Conn. Oct. 5, 1847.

MESSRS A. B & D. SANDS—*Gentlemen.* In the year 1841 I was attacked with a cancer in my neck, which soon extended its ravages over the side of my face, eating the flesh, and leaving the cords of my neck bare, discharging very freely running intense pain and suffering, depriving me of rest at night and comfort by day, destroying my appetite, and reducing me almost to the gates of death. I was attended by the first physicians in the State, who prescribed for me, and did all that skill and care could effect, but during all the time I continued to grow worse and worse. In the fall of 1842 I was induced to hear of the cure performed by your Sarsaparilla, and determined to try it. I not not used over two bottles before I felt its effects on my system most sensibly. My appetite was soon restored, my strength was increasing, the discharge from the cancer decreased, and I soon began to perceive that the disease was healing. I continued its use according to directions, and also continued to grow better and better from day to day, until I have been fully and wholly cured by its use. It is now two years since I was cured, and I have remained perfectly well up to this time. I have delayed giving you this certificate, lest I might at certain seasons of the year, disease would reappear; but I am happy and most thankful to again say, that the cure is a perfect one, and effected wholly by the use of your Sarsaparilla. The scars still remain, and all who know me, and many of the citizens of Stamford can testify to the severity of my case and my sufferings, and the health-restoring power of your Sarsaparilla. I feel it my duty to give this evidence of my gratitude to every sufferer afflicted with similar complaints. After experiencing what I have from its effects, I can say to one and all, "Hesitate and doubt no longer, but secure to yourselves the health-giving virtue this medicine can alone bestow."

Most gratefully I am, and shall always remain, your friend. ISAAC STEVENS.

SARSAPARILLA.—The well known house of A. B. & D. Sands of this city have recently made an important discovery in the preparation of this celebrated medicinal root. The apparatus used by the Messrs. Sands in extracting the virtue of the plant is exceedingly ingenious, and very expensive. By reference to an announcement and certificate on the first page of this paper, it will be seen that already this valuable medicine has performed wonderful cures. The community at large and the whole body of physicians throughout the country, are deeply indebted to this enterprising house for their liberal and persevering efforts to advance the cause of medical science. [N. Y. Tribune.

LIVER COMPLAINT.

The following is an extract from a letter received from Rev William Galusha, dated Shoreham, Vt Oct. 22, 1849.

Messrs Sands—I have been afflicted with a severe pain in my side, occasioned by a diseased liver, for the last twenty years, suffering at times what language cannot convey; but since taking your Sarsaparilla I have been greatly relieved, so much so that I have been able to attend to my business, and preach occasionally, for the last eight months. I have tried all other medicine, and thoroughly tried the Sarsaparilla, which I can recommend in truth and sincerity to all those who are in any way afflicted with any species of scrofulous complaints. There have been some remarkable cures effected by its use in this vicinity. Mrs I. Shaw, by the use of six bottles, was restored to better health than she had believed possible for ten years; and Mr. W. Stevens, who has been severely afflicted with erysipelas, was entirely cured by the use of a few bottles. Yours truly, WM. GALUSHA.

CURE OF A SCROFULOUS AFFECTION OF THE EYES.

SOUTH KINGSTON, R. I. Oct 17, 1847.

MESSRS. SANDS:—Gentlemen—My little daughter, when one year old, was attacked with a scrofulous humor on her face, which soon after extended into both eyes, causing almost total blindness and great pain, and disfiguring her most lovely countenance. I employed two physicians to attend her, who exhausted their utmost skill to give her relief, but it proved useless, and finally one of them remarked to me that he had known of some striking cures effected by Sands's Sarsaparilla, and advised me to try it. I obtained one bottle which she commenced using, and before it was all used up it had effected an entire cure. It is now over four years since she was cured, and there has been no reappearance of the disease, and we are satisfied that it is a perfect cure. It gives me great pleasure to add that I can recommend it to every sufferer from any similar complaint.

Respectfully yours, GEORGE ROBINSON.

Prepared and sold, wholesale and retail, by A. B. & D. SANDS, Druggists and Chemists, 100 Fulton-st., corner of William, New York. Sold also by Druggists generally throughout the United States and Canadas. Price $1 per Bottle; six Bottles for $5. 14 tf
